MONTSERRAT

KEY HISTORICAL EVENTS

Montserrat was discovered by Columbus in 1493 and colonized by Britain in 1632, who brought Irish settlers to the island. Montserrat formed part of the federal colony of the Leeward Islands from 1871 until 1958, when it became a separate colony following the dissolution of the Federation.

On 18 July 1995 the Soufriere Hills volcano erupted for the first time in recorded history, which led to over half the inhabitants being evacuated to the north of the island, and the relocation of the chief town, Plymouth. Another major eruption on 25 June 1997 caused a number of deaths and led to further evacuation.

TERRITORY AND POPULATION

Montserrat is situated in the Caribbean Sea, 43 km southwest of Antigua. The area is 39·5 sq. miles (102 sq. km). Census population, 1991, 10,639; estimate, 2002, 4,500. What was previously the capital, Plymouth, is now deserted as a result of the continuing activity of the Soufriere Hills volcano. The safe area is in the north of the island.

The official language is English.

CLIMATE

A tropical climate with an average annual rainfall of 60" (1,500 mm) the wettest months being Sept.–Dec., with a hurricane season June–Nov. Plymouth, Jan. 76°F (24·4°C), July 81°F (27·2°C).

CONSTITUTION AND GOVERNMENT

Montserrat is a British Overseas Territory. The Constitution dates from the 1989 Montserrat Constitutional Order. The head of state is Queen Elizabeth II, represented by a *Governor* who heads an Executive Council, comprising also the Chief Minister, the Financial Secretary, the Attorney-General and three other ministers. The *Legislative Council* consists of seven elected members, two civil service officials (the Attorney-General and Financial Secretary) and two nominated members; it sits for five-year terms.

RECENT ELECTIONS

In elections to the Legislative Council on 2 April 2001 the New People's Liberation Movement won 7 of the 9 seats against 2 for the National Progressive Party.

CURRENT ADMINISTRATION

Governor: Tony Longrigg (since 11 May 2001).

Chief Minister: John Osborne (since 5 April 2001, having previously been in office from 1978 to 1991).

INTERNATIONAL RELATIONS

Montserrat is a member of CARICOM and the OECS.

ECONOMY

Currency. Montserrat's currency is the *Eastern Caribbean dollar* (*see* ANTIGUA AND BARBUDA: Currency).

Budget. In 1998 the estimated expenditure was EC$60·6m. compared with actual expenditure of EC$63·5m. in 1997, a reduction of 5%.

Performance. Real GDP growth was –2·9% in 1995 and 0·8% in 1994.

Banking and Finance. The East Caribbean Central Bank based in St Kitts and Nevis functions as a central bank. The *Governor* is Sir Dwight Venner. In 1996 there were 3 commercial and 21 offshore banks. Responsibility for overseeing offshore banking rests with the Governor. In late 1998 there were two commercial banks on the island.

Weights and Measures. Both metric and imperial weights and measures are in use.

ENERGY AND NATURAL RESOURCES

Electricity. Production (1998) 10m. kWh.

Agriculture. 3,700 ha are normally suitable for agriculture, with about half in use, but only 1,000 ha were available in 1996 because of the volcanic crisis. In 1998 there were 2,000 ha of arable and permanent crop land. Potatoes, tomatoes, onions, mangoes and limes were produced in recent times. Meat production began in 1994 and the island soon became self-sufficient in chicken, mutton and beef.

Livestock (1996); cattle, 10,000; pigs, 1,000; sheep, 5,000; goats, 7,000.

Forestry. The area under forests in 1995 was 3,000 ha, or 30% of the total land area.

Fisheries. The total catch in 1999 was estimated at 50 tonnes.

INDUSTRY

Manufacturing has in recent years contributed about 6% to GDP and accounted for 10% of employment, but has been responsible for about 80% of exports. It has been limited to rice milling and the production of light consumer goods such as electronic components, light fittings, plastic bags and leather goods. The volcanic activity has put a halt to the milling of rice in the exclusion zone and curtailed the production of light consumer goods.

These figures changed as a result of the volcanic eruptions of 1995 and 1997 but since then the government, through the Ministry of Communications and Works, has been focusing its road developments in the north of the island, and a number of road work projects are under way.

Civil Aviation. At the W. H. Bramble airport LIAT used to provide services to Antigua with onward connections to the rest of the eastern Caribbean, but it was closed in June 1997 as volcanic activity increased.

Shipping. Plymouth is the port of entry, but alternative anchorage was provided at Old Bay Road during the volcanic crisis.

Telecommunications. Number of telephone main lines, 1997, 3,800. With the migration of people to the north and overseas, and the subsequent destruction of the southern part of the island, the number of telephones has since shrunk to 2,100. There were 300 roobile phone subscribers in 1997.

SOCIAL INSTITUTIONS

Justice. Law is based on UK common law as exercised by the Eastern Caribbean Supreme Court. Final appeal lies to the UK Privy Council. Law is administered by the West Indies Associated States Court, a Court of Summary Jurisdiction and Magistrate's Courts.

Health. In 1996 there were 4 medical officers, 1 surgeon, 1 dentist and 1 hospital with 69 beds.

Tourism. Tourism at one time contributed about 30% of GDP; earnings in 1993 were EC$40m. There were 36,077 visitors including 11,636 cruise ship arrivals in 1994. However, after the volcanic eruptions the tourist industry declined dramatically, although there were still some 6,000 visitors in 1998.

KEY HISTORICAL EVENTS

The first landing and exploration was undertaken by Captain James Cook, who formally took possession in the name of George III on 17 Jan. 1775. British sealers arrived in 1788 and American sealers in 1791. Sealing reached its peak in 1800. A German team was the first to carry out scientific studies there in 1882–83. Whaling began in 1904 and ceased in 1966, and the civil administration was withdrawn. Argentine forces invaded South Georgia on 3 April 1982. A British naval task force recovered the Island on 25 April 1982.

SOVEREIGN BASE AREAS OF AKROTIRI AND DHEKELIA IN CYPRUS

KEY HISTORICAL EVENTS

The Sovereign Base Areas (SBAs) are those parts of the island of Cyprus that stayed under British jurisdiction and remained British sovereign territory when the 1960 Treaty of Establishment created the independent Republic of Cyprus. The Akrotiri facility formed a strategic part of the Westis nuclear capacity during the Cold War. The SBAs were used for the deployment of troops in the Gulf War in 1991. Military intelligence is now the key role of the SBAs. The construction of massive antennae at the RAF communications base at Akrotiri sparked violent riots in 2001 and 2002,

led by a Greek Cypriot MP. In Feb. 2003 the British Government offered to surrender approximately half the area of the SBAs as an incentive for a settlement between the Greek and Turkish administrations in Cyprus.

TERRITORY AND POPULATION

The Sovereign Base Areas (SBAs), with a total land area of 254 sq. km (98 sq. miles), comprise the Western SBA (123 sq. km), including Episkopi Garrison and RAF Akrotiri (opened 1956), and the Eastern SBA (131 sq. km), including Dhekelia Garrison. The SBAs cover 3% of the land area of the island of Cyprus. There are approximately 3,000 military personnel and approximately 5,000 civilians. The British Government has declared that it will not develop the SBAs for other than military purposes. Citizens and residents of the Republic of Cyprus are guaranteed freedom of access and communications to and through the SBAs.

The SBAs are administered as military bases reporting to the Ministry of Defence in London. The Administrator is the Commander, British Forces Cyprus. The joint force headquarters are at Episkopi. Greek and English are spoken.

CURRENT ADMINISTRATION

Administrator: Air Vice-Marshall Bill Rimmer (appointed Sept. 2000).

Only eight are inhabited: Grand Caicos, the largest, is 48 km long by 3 to 5 km broad; Grand Turk, the capital and main political and administrative centre, is 11 km long by 2 km broad. Population, 1990 census, 12,350; Grand Turk, 3,761; Providenciales, 5,586; South Caicos, 1,220; Middle Caicos, 275; North Caicos, 1,305; Salt Cay, 213. The estimated population for 2000 was 19,350. An estimated 56·4% of the population were rural in 1995.

KEY HISTORICAL EVENTS

The earliest inhabitants of the north American continent can be traced back to Palaeolithic times but it was not until the twelfth century that permanent settlements were created, particularly in the east where rich opportunities for cultivation and fishing supported major fortified towns. The first Europeans to make their presence felt were Spaniards who based themselves in Florida before venturing north and west. Santa Fe in New Mexico was founded in 1610. But by the mid-sixteenth century there was competition from the French centred on Quebec who colonized along the St Lawrence River.

Elizabethan adventurers were eager to exploit the New World but it was not until 1607 that a British colony was established. This was at Jamestown in what is now southern Virginia. After a perilous start when disease and malnutrition carried off most of the settlers, Virginia's population grew rapidly to meet the European demand for tobacco. Maryland, originally a refuge for persecuted Catholics, also thrived on the tobacco trade. To make up for the shortage of labour, slaves were imported from Africa.

In 1620 a hundred pilgrims landed at Plymouth Rock to found a Puritan enclave which became the colony of Massachusetts. Other settlements soon followed, accommodating a bewildering variety of Christian radicals who had fled from persecution. Not all were tolerant of beliefs that differed from their own. Pennsylvania, the colony named after the Quaker William Penn, was exceptional in offering freedom of worship to 'all persons who confess and acknowledge the one almighty and eternal God'. In 1664 the British took control of neighbouring Dutch colonies. New Amsterdam became New York. Almost all of the eastern seaboard was now claimed by British settlers who were also venturing inland.

Their main European rivals were the French who claimed a vast area around and to the southwest of the Great Lakes. With Indian tribes allied to both sides, there was heavy fighting in 1744 and 1748. But within a decade British forces had captured most of the French strongholds. After the Treaty of Paris in 1763, Britain commanded the whole of North America east of the Mississippi while Spain, having surrendered Florida, gained Louisiana from France. For a brief period colonization was restricted to the area east of the Appalachians, the rest of the territory being reserved for Indian tribes. This soon became a point of issue between the settlers who were intent on expansion and their masters in London who wanted a settled, self-supporting community benefiting British trade. Having disposed of the French threat, the colonists felt confident enough to defy orders that ignored their interests. In particular, they objected to the Navigation Acts which required goods to be carried in British vessels and to various taxes imposed without consultation. 'No taxation without representation' became a rallying cry for disaffected colonists. The centre of opposition was Boston, scene of the infamous 'tea party' when, in 1763, militants destroyed a cargo of East India tea. In 1775 the arrest of rebel ringleaders served only to provoke the 13 colonies to co-operate in further acts of rebellion, including the setting up of a *de facto* government which appointed George Washington commander of American forces.

The War of Independence was by no means a clear-cut affair. British forces, never more than 50,000 strong, were supported by a powerful body of colonists who remained loyal to the Crown. The war lasted for seven years from 1776 with both sides often getting close to a conclusive victory. The decisive moment came at last with the surrender of General Burgoyne and his 8,000 troops in upper New York state in Oct. 1777, a defeat that persuaded a cautious France to enter the war. Under the peace terms secured in 1783 Britain kept Canada leaving the new United States

with territory stretching from the Atlantic to the Mississippi. A constitution based on democratic principles buttressed by inalienable rights including the ownership of property came into force in 1789. It allowed for a federal government headed by a president and executive, a legislature with a House of Representatives and a Senate, and a judiciary with ultimate authority on constitutional matters exercised by a Supreme Court. The first president was George Washington, who was elected in 1789. In 1800 Washington, D.C. was declared the national capital.

Hostilities with Britain resumed in 1812 amidst accusations that Britain was using the excuse of the Napoleonic wars to harass American shipping and to encourage Indian resistance to expansion into the mid west. Most of the fighting took place on the Canadian border where an attempted invasion was decisively repulsed. But Louisiana, having reverted to French rule and subsequently sold to the US, was secured for the Union. With the exception of Louisiana, other American territories that had once been part of the Spanish empire fell to Mexico. But not for long. In 1836 Texas broke away from Mexico, surviving as an independent republic until 1845 when it was annexed by the US. This provoked war with Mexico which ended in 1848 with the US taking over what are now the states of California, Arizona, Colorado, Utah, Nevada and New Mexico. Any temptation there might have been for European involvement in the struggle was removed by the Monroe Doctrine, a declaration by President Monroe that interference from the Old World in matters concerning the western hemisphere would not be tolerated. It was a measure of the growing military and economic self confidence of the US that such a warning, delivered in 1823, was taken seriously.

The westward expansion began soon after independence but accelerated with the destruction of Indian power and the removal of the native population to designated reservations. In 1846 a long-running dispute with Britain confirming US title to Oregon acted as a spur to migration as did the Californian gold rush of 1848. By the 1850s the railway network was bringing people and economic prosperity to the mid west. Population quadrupled between 1815 to 1860, from 8m. to almost 31m. In 1862 the Homestead Act allocated 160 acres to anyone who was ready to farm it. By 1890 the west was won.

The transition from a rural society to an industrial power of world importance created tensions, not least between the slave-owning southern states and the rest of the Union which favoured the abolition of slavery. Economic as well as humanitarian factors were in play since the North resented the advantage cheap labour gave to the South. The opposing view held that the South, by now the world's largest cotton producer, depended on slavery for its commercial survival. Mutual antagonism came to a head with the secession of the southern states from the Union in 1860–61 and their formation as a Confederacy. Despite sporadic outbreaks of violence, civil war was not in prospect until Confederate troops fired on the US flag at Fort Sumter. Lincoln ordered a blockade of the South. The recruitment of rival armies followed within weeks. The war turned out to be much bloodier than anyone had expected. More American lives were lost in the Civil War than in the two world wars combined. The military balance was maintained until 1863 when the North secured a crushing victory at the Battle of Gettysburg. However, the war continued until April 1865 when Robert E. Lee surrendered to Ulysses S. Grant at Appomattox Courthouse in Virginia. A few days later Lincoln was assassinated, a loss that the southern states had subsequent cause to regret. Contrary to Lincoln's hopes, a generous settlement was now out of the question. Instead of a gradual transition to a new society, the South was rushed into a social revolution. This in turn led to terrorist violence and acts of vengeance against freed slaves. From this carnage emerged the notorious Ku Klux Klan as the standard bearer of lynch law. While the 13th amendment prohibited slavery, political freedom was denied to the black community by state imposed literacy tests and discriminatory property taxes.

That America had interests beyond its own borders was made evident by the Spanish war of 1898 which resulted in the US becoming the dominant power in the Caribbean though the effort to take over in the Philippines came up against Filipino resistance and led to a heavy death toll.

By 1900 the US rivalled Britain and Germany as the world's dominant power. With vast natural resources and a manufacturing capacity that secured 11% of world trade, it was clear that Europe was soon to lose its grip on world affairs. Ironically,

though, it was Europe as the chief supplier of labour that gave the US the impetus it needed to fulfil its promise. Between 1881 and 1920, 23m. immigrants entered the US, the largest population movement ever recorded.

Given the nationalistic mix that constituted early twentieth century America it is scarcely surprising that popular opinion was against involvement in the First World War. But events, including German U-boat harassment of American shipping, soon proved that isolationism was not an option. It was not until 1917 that America joined the hostilities but the resurgence of energy created by the arrival of the American Expeditionary Force was critical to the Allied breakthrough.

Post-war America, relatively unscathed by the European conflict, was unquestionably the most powerful nation and as such was able to dictate terms at the Versailles peace conference. But President Wilson's much vaunted 'fourteen points' which set out a plan for collective security policed by a League of Nations failed to win support in the one country that was critical to its success. The Treaty was rejected by the Senate in 1920 and America retreated once again into isolationism.

A resumption of economic growth was accompanied by a struggle to impose a common set of values, chiefly white, Protestant, on an incredibly diverse population. To outsiders the most extraordinary experiment in social engineering was Prohibition, a federal imposed attempt to outlaw all alcoholic drinks. Whatever gain there was to the health of the nation, the chief beneficiaries were the bosses of organized crime.

Dreams of everlasting prosperity were shattered by the 1929 Stock Market Crash. A succession of bank failures was followed by widespread bankruptcies and mass unemployment which sent the economy into a further downward spin. The beginning of the end to the agony came with the election to the presidency of Franklin D. Roosevelt, who pushed through Congress a series of radical measures known collectively as the New Deal aimed at revitalizing the nation. Cheap loans to restart factories and farms and huge investment in public works proved to be the key to recovery though unemployment remained high until production was boosted by the demands of another world war.

Roosevelt was well aware of the dangers to the US if the fascist dictators were allowed to triumph, but as in 1914, there was formidable opposition to direct involvement. Roosevelt compromised by supplying Britain with much needed armaments on favourable terms. But it was events in Asia rather than in Europe that eventually persuaded America of the need for direct action. Opposition to Japanese expansion into China and South East Asia, including an oil embargo and a freezing of Japanese assets in the US, brought a savage retaliation at Pearl Harbour, when much of the US fleet was destroyed. America declared war on Japan while Germany declared war on America. The US military effort focused initially on the Pacific but after 1942 American forces were also committed to the campaign in north Africa and Europe. With the D-Day landings in June 1944, US troops led the attack on Germany before forcing a Japanese surrender by sacrificing Hiroshima and Nagasaki to the atomic bomb.

This time, in the aftermath of war, the US needed no encouragement to assume the leadership of the free world. The threat of a Soviet takeover in Europe was countered by the formation of NATO and the provision of dollar aid under the Marshall Plan to kick start European economic recovery. The risk of a return to isolationism receded still further when China fell to communism. In 1950 American troops went to the aid of South Korea when it was invaded by the communist North. Though technically under the aegis of the UN, the campaign was an almost entirely American affair led by General Douglas MacArthur. When Chinese forces became involved, MacArthur spoke openly of extending the war to the Chinese mainland, a threat countered strongly by President Truman who forced MacArthur's resignation to establish undisputed political control over the military. A ceasefire was negotiated after Dwight Eisenhower was elected President in 1953 and the US took the lead in setting up the South East Asia Treaty Organization on the same lines as NATO.

At home, civil rights were high on the political agenda. The thuggish tactics of Senator Joe McCarthy and the House Committee on Un-American Activities brought into focus basic democratic freedoms guaranteed by the Constitution while

growing protests against racial discrimination led to legislation to enforce equality of opportunity in education and employment. The civil rights movement peaked in the early sixties when the imposition of federal law in the South led to acts of violence against liberal protesters. Social tensions were exacerbated by the Cold War confrontation. On acceding to the presidency in 1961, one of the first challenges President Kennedy had to face was the placing of Soviet missiles in Cuba. For a time, the prospect of world war was only too real. But an agreement between the two nations allowed for a withdrawal of the missiles on the condition of a US promise not to invade Cuba. Another optimistic sign was the Nuclear Test Ban Treaty of 1963 which, for the first time, put a brake on the spread of nuclear weapons. Less hopeful was the acceleration of the conflict in Vietnam. Following President Kennedy's assassination in 1963, US military involvement in Vietnam was intensified but opposition at home led to withdrawal of forces in 1973.

In 1974 President Nixon was forced to resign amidst charges of corruption known collectively as Watergate. A revival of Republican fortunes came with the election of Ronald Reagan in the 1980 presidential race. In international affairs, Reagan was resolutely anti-Communist, raising fears of confrontation with the Soviet Union over his Strategic Defense Initiative, otherwise known as his 'Star Wars' system of defence. However, relations between the two superpowers improved in the mid-eighties with successful negotiations on nuclear arms limitations. The collapse of the Soviet empire in 1990 extended US economic aid to Eastern Europe. The Democrats regained control of the White House with the election of Bill Clinton, who combined economic recovery at home with an active foreign policy which underlined America's role as the only superpower.

On 11 Sept. 2001 the heart of New York City was devastated after hijackers flew two jet airliners into the World Trade Center. A plane also crashed into the Pentagon, in Washington, D.C., and a fourth hijacked plane crashed near the town of Shanksville, Pennsylvania. The death toll was 2,800, with 67 countries reporting dead or missing citizens. Osama bin Laden, a Saudi dissident believed to be living in Afghanistan at the invitation of the ruling Taliban, immediately became the chief suspect and military action against Afghanistan followed, with air strikes beginning on 7 Oct. 2001.

On 20 March 2003 US forces, supported by the UK, launched attacks on Iraq, and initiated a war aimed at 'liberating Iraq'. On 9 April 2003 American forces took control of central Baghdad, effectively bringing an end to Saddam Hussein's rule.

The following table includes population statistics, the year in which each of the original 13 states (Connecticut, Delaware, Georgia, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Virginia) ratified the constitution, and the year when each of the other states was admitted into the Union. Traditional abbreviations for the names of the states are shown in brackets with postal codes for use in addresses.

The USA is divided into four geographic regions comprised of nine divisions. [1]Arlington CDP (census designated place) is not incorporated as a city.

Washington, D.C.: The capital of the United States, the city is located at the head of the Potomac River, and was carved from Virginia and Maryland in 1790 to form the permanent seat of government for the new nation. The city is home to many of the most important monuments, artifacts and museums in the country. The larger metropolitan city, however, suffers from complex social and economic problems.

New York: Located on the Eastern Atlantic coast of the United States at the mouth of the Hudson River, it became the focus for the first European immigrants in the 17th century. Greater New York was formed in 1898 by the amalgamation of the five boroughs—The Bronx, Brooklyn, Manhattan, Queens and Staten Island. Affectionately known as the 'Big Apple' it covers an area of 301 sq. miles. It was the world's most populous city until overtaken by Tokyo in the late 1960s. New York is one of the world's leading financial centres and is the headquarters of the United Nations.

Los Angeles: Sprawling across some 464 sq. miles (1,202 sq. km), Los Angeles is the second most populous city and metropolitan area in the United States after New York. Developing from an 18th century missionary settlement, the city was opened up by the railroads at the end of the 19th century. The city has become a centre for the US film industry and has the busiest harbour on the West Coast. It is one of the most ethnically diverse and divided cities in the US.

Chicago: Chicago is the third most populous city and metropolitan area in the United States. Owing to its strategic position at the lakeside interior of a rapidly expanding country, Chicago developed in the early 19th century to become a nexus for goods transport via canals and railways. Industry followed and Chicago emerged as the major city of the Midwest. The city is famous for its prohibition-period gangster history and its skyline of skyscrapers including the Sears Tower, the second tallest building in the world.

Immigration and naturalization. The Immigration and Nationality Act, as amended, provides for the numerical limitation of most immigration. The Immigration Act of 1990 established major revisions in the numerical limits and preference system regulating legal immigration. The numerical limits are imposed on visas issued and not admissions. The maximum number of visas allowed to be issued under the preference categories in 1998 was 268,997: 191,480 for family-sponsored immigrants and 77,517 for employment-based immigrants. Within the overall limitations the per-country limit for independent countries is set to 7% of the total family and employment limits, while dependent areas are limited to 2% of the total.

[1]Immigration from the former USSR in 1997 included 16,600 from Russia and 15,700 from Ukraine. Figures from 1996 were: Russia, 19,700; Ukraine, 15,700; Armenia, 2,400; Azerbaijan, 2,000; Belarus, 4,300; Moldova, 1,800; Uzbekistan, 4,700.

The total number of immigrants admitted from 1820 up to 30 Sept. 1998 was 64,599,082; this included 7,136,257 from Germany, and 5,431,454 from Italy.

The number of immigrants admitted for legal permanent residence in the United States in the fiscal year 1998 was 660,477. Included in this total were 357,037 aliens previously living abroad who obtained immigrant visas through the US Department of State and became legal permanent residents upon entry into the United States. The remaining 303,440 legal immigrants, including former undocumented immigrants, refugees, and asylees, had been living in the United States an average of three years and adjusted status through the Immigration and Naturalization Service (INS). Legal immigration in 1998 was 17% lower than in 1997 (798,378). The decrease was due primarily to an increase in the number of adjustment of status applications pending a decision at INS, not to a decline in the demand to immigrate.

A total of 463,060 persons were naturalized in fiscal year 1998. This number would have been much higher were it not for a backlog of more than 1m. applications pending a decision at the end of 1997.

The refugee admissions ceiling for the fiscal year 1998 was fixed at 83,000, including 54,000 from Eastern Europe and the former Soviet Union and 4,000 from Asia East and South-East Asia.

2000	14·7	8·7	8·5	4·2
2001	14·5	8·7[1]	8·4[1]	4·0[1]

[1]Preliminary.

Rate of natural increase per 1,000 population: 7·7 in 1991; 6·0 in 2000. Annual population growth rate, 1990–2000, 1·3%.

Even though the marriage rate shows a gradual decline, it remains much higher than in most other industrial countries. The most popular age range for marrying is 25–29 for males and 20–24 for females. Estimated number of births to unmarried women in 1997 was 1,257,000 (32·4% of all births), compared to 666,000 in 1980. The USA has the highest rate of births to teenage woman in the industrialized world, at 52·1 per 1,000 women in 1998. Between 1970 and 1998 the annual number of births rose by 5·7%. The number of births within marriage declined by 19·2% whereas the number outside of marriage rose by 223·6%. The number of lone-parent families rose by 190·2% over the same period. Whereas in 1970 as many as 83·4% of children lived with both biological parents, by 2000 only 60·4% were living with married biological parents and 2·1% with unmarried biological parents.

Infant mortality rates, per 1,000 live births: 29·2 in 1950; 12·9 in 1980; 7·1 in 1999. Fertility rate, 1999, 2·0 births per woman (3·6 in 1960).

There were 1·31m. abortions in 2000 (1·61m. in 1990), giving a rate of 21·3 for every 1,000 women aged 15–44, compared to a high of 29·3 per 1,000 in 1980 and 1981.

Expectation of life, 1970: males, 67·1 years; females, 74·7 years; 1999: males, 73·9 years; females, 79·7 years.

Numbers of deaths by principal causes, 1998 (and as a percentage of all deaths): heart disease, 724,900 (31·0%); cancer, 541,500 (23·2%); stroke, 158,400 (6·8%); obstructive lung disease, 112,600 (4·8%); accidents, 97,800 (4·2%); pneumonia and

influenza, 91,800 (3·9%); diabetes mellitus, 64,800 (2·8%); suicide, 30,600 (1·3%); kidney diseases, 26,200 (1·1%); liver diseases, 25,200 (1·1%); septicemia, 23,700 (1·0%); AIDS, 18,200 (0·8%).

The number of Americans living in poverty in 2000 was 31·1m. or 11·3% of the total population, down from 15·1% in 1993.

A UNICEF report published in 2000 showed that 22·4% of children in the USA live in poverty (in households with income below 50% of the national median), compared to just 2·6% in Sweden. The report also showed that the poverty rate of children in lone-parent families was 55·4%, compared to 15·8% in two-parent families.

CLIMATE

For temperature and rainfall figures, *see* entries on individual states as indicated by regions, below, of mainland USA.

Pacific Coast. The climate varies with latitude, distance from the sea and the effect of relief, ranging from polar conditions in North Alaska through cool to warm temperate climates further south. The extreme south is temperate desert. Rainfall everywhere is moderate. *See* Alaska, California, Oregon, Washington.

Mountain States. Very varied, with relief exerting the main control; very cold in the north in winter, with considerable snowfall. In the south, much higher temperatures and aridity produce desert conditions. Rainfall everywhere is very variable as a result of rain-shadow influences. *See* Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming.

High Plains. A continental climate with a large annual range of temperature and moderate rainfall, mainly in summer, although unreliable. Dust storms are common in summer and blizzards in winter. *See* Nebraska, North Dakota, South Dakota.

Central Plains. A temperate continental climate, with hot summers and cold winters, except in the extreme south. Rainfall is plentiful and comes at all seasons, but there is a summer maximum in western parts. *See* Mississippi, Missouri, Oklahoma, Texas.

Mid-West. Continental, with hot summers and cold winters. Rainfall is moderate, with a summer maximum in most parts. *See* Indiana, Iowa, Kansas.

Great Lakes. Continental, resembling that of the Central Plains, with hot summers but very cold winters because of the freezing of the lakes. Rainfall is moderate with a slight summer maximum. *See* Illinois, Michigan, Minnesota, Ohio, Wisconsin.

Appalachian Mountains. The north is cool temperate with cold winters, the south warm temperate with milder winters. Precipitation is heavy, increasing to the south but evenly distributed over the year. *See* Kentucky, Pennsylvania, Tennessee, West Virginia.

Gulf Coast. Conditions vary from warm temperate to sub-tropical, with plentiful rainfall, decreasing towards the west but evenly distributed over the year. *See* Alabama, Arkansas, Florida, Louisiana.

Atlantic Coast. Temperate maritime climate but with great differences in temperature according to latitude. Rainfall is ample at all seasons; snowfall in the north can be heavy. *See* Delaware, District of Columbia, Georgia, Maryland, New Jersey, New York State, North Carolina, South Carolina, Virginia.

New England. Cool temperate, with severe winters and warm summers. Precipitation is well distributed with a slight winter maximum. Snowfall is heavy in winter. *See* Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont. *See also* Hawaii and Outlying Territories.

CONSTITUTION AND GOVERNMENT

The form of government of the USA is based on the constitution adopted on 17 Sept. 1787 and effective from 4 March 1789.

By the constitution the government of the nation is composed of three co-ordinate branches, the executive, the legislative and the judicial.

The Federal government has authority in matters of general taxation, treaties and other dealings with foreign countries, foreign and inter-state commerce, bankruptcy, postal service, coinage, weights and measures, patents and copyright, the armed forces (including, to a certain extent, the militia), and crimes against the USA; it has sole legislative authority over the District of Columbia and the possessions of the USA.

The 5th article of the constitution provides that Congress may, on a two-thirds vote of both houses, propose amendments to the constitution, or, on the application of the legislatures of two-thirds of all the states, call a convention for proposing amendments, which in either case shall be valid as part of the constitution when ratified by the legislatures of three-fourths of the several states, or by conventions in three-fourths thereof, whichever mode of ratification may be proposed by Congress. Ten amendments (called collectively 'the Bill of Rights') to the constitution were added 15 Dec. 1791; two in 1795 and 1804; a 13th amendment, 6 Dec. 1865, abolishing slavery; a 14th in 1868, including the important 'due process' clause; a 15th, 3 Feb. 1870, establishing equal voting rights for white and black; a 16th, 3 Feb. 1913, authorizing the income tax; a 17th, 8 April 1913, providing for popular election of senators; an 18th, 16 Jan. 1919, prohibiting alcoholic liquors; a 19th, 18 Aug. 1920, establishing woman suffrage; a 20th, 23 Jan. 1933, advancing the date of the President's and Vice-President's inauguration and abolishing the 'lameduck' sessions of Congress; a 21st, 5 Dec. 1933, repealing the 18th amendment; a 22nd, 26 Feb. 1951, limiting a President's tenure of office to 2 terms, or to 2 terms plus 2 years in the case of a Vice-President who has succeeded to the office of a President; a 23rd, 30 March 1961, granting citizens of the District of Columbia the right to vote in national elections; a 24th, 4 Feb. 1964, banning the use of the poll-tax in federal elections; a 25th, 10 Feb. 1967, dealing with Presidential disability and succession; a 26th, 22 June 1970, establishing the right of citizens who are 18 years of age and older to vote; a 27th, 7 May 1992, providing that no law varying the compensation of Senators or Representatives shall take effect until an election has taken place.

National motto. 'In God we trust'; formally adopted by Congress 30 July 1956.

Presidency. The executive power is vested in a president, who holds office for four years, and is elected, together with a vice-president chosen for the same term, by electors from each state, equal to the whole number of senators and representatives to which the state may be entitled in the Congress. The President must be a natural-born citizen, resident in the country for 14 years, and at least 35 years old.

The presidential election is held every fourth (leap) year on the Tuesday after the first Monday in Nov. Technically, this is an election of presidential electors, not of a president directly; the electors thus chosen meet and give their votes (for the candidate to whom they are pledged, in some states by law, but in most states by custom and prudent politics) at their respective state capitals on the first Monday after the second Wednesday in Dec. next following their election; and the votes of the electors of all the states are opened and counted in the presence of both Houses of Congress on the sixth day of Jan. The total electorate vote is one for each senator and representative. Electors may not be a member of Congress or hold federal office. If no candidate secures the minimum 270 college votes needed for outright victory, the 12th Amendment to the Constitution applies, and the House of Representatives chooses a president from among the first three finishers in the electoral college. (This last happened in 1824).

If the successful candidate for President dies before taking office the Vice-President-elect becomes President; if no candidate has a majority or if the successful candidate fails to qualify, then, by the 20th amendment, the Vice-President acts as President until a president qualifies. The duties of the Presidency, in absence of the President and Vice-President by reason of death, resignation, removal, inability or failure to qualify, devolve upon the Speaker of the House under legislation enacted on 18 July 1947. In case of absence of a Speaker for like reason, the presidential duties devolve upon the President *pro tem.* of the Senate and successively upon those members of the cabinet in order of precedence, who have the constitutional qualifications for President.

The presidential term, by the 20th amendment to the constitution, begins at noon on 20 Jan. of the inaugural year. This amendment also installs the newly elected Congress in office on 3 Jan. instead of—as formerly—in the following Dec. The President's salary is $400,000 per year (taxable), with in addition $50,000 to assist in defraying expenses resulting from official duties. Also he may spend up to $100,000 non-taxable for travel and $19,000 for official entertainment. In 1999 the presidential salary was increased for the president taking office in Jan. 2001, having remained at $200,000 a year since 1969. The office of Vice-President carries a salary

of $192,600 and $10,000 allowance for expenses, all taxable. The Vice-President is *ex officio* President of the Senate, and in the case of 'the removal of the President, or of his death, resignation, or inability to discharge the powers and duties of his office', he becomes the President for the remainder of the term.

[1]Position vacant thereafter until commencement of the next presidential term.

Cabinet. The administrative business of the nation has been traditionally vested in several executive departments, the heads of which, unofficially and *ex officio*, formed the President's cabinet. Beginning with the Interstate Commerce Commission in 1887, however, an increasing amount of executive business has been entrusted to some 60 so-called independent agencies, such as the Housing and Home Finance Agency, Tariff Commission, etc.

All heads of departments and of the 60 or more administrative agencies are appointed by the President, but must be confirmed by the Senate.

Congress. The legislative power is vested by the Constitution in a Congress, consisting of a Senate and House of Representatives.

Electorate. By amendments of the constitution, disqualification of voters on the ground of race, colour or sex is forbidden. The electorate consists of all citizens over 18 years of age. Literacy tests have been banned since 1970. In 1972 durational residency requirements were held to violate the constitution. In 1973 US citizens abroad were enfranchised.

With limitations imposed by the constitution, it is the states which determine voter eligibility. In general states exclude from voting: persons who have not established residency in the jurisdiction in which they wish to vote; persons who have been convicted of felonies whose civil rights have not been restored; persons declared mentally incompetent by a court.

Illiterate voters are entitled to receive assistance in marking their ballots. Minority-language voters in jurisdictions with statutorily prescribed minority concentrations are entitled to have elections conducted in the minority language as well as English. Disabled voters are entitled to accessible polling places. Voters absent on election days or unable to go to the polls are generally entitled under state law to vote by absentee ballot.

The Constitution guarantees citizens that their votes will be of equal value under the 'one person, one vote' rule.

Senate. The Senate consists of two members from each state (but not from the District of Columbia), chosen by popular vote for six years, approximately one-third retiring or seeking re-election every two years. Senators must be no less than 30 years of age; must have been citizens of the USA for nine years, and be residents

in the states for which they are chosen. The Senate has complete freedom to initiate legislation, except revenue bills (which must originate in the House of Representatives); it may, however, amend or reject any legislation originating in the lower house. The Senate is also entrusted with the power of giving or withholding its 'advice and consent' to the ratification of all treaties initiated by the President with foreign powers, a two-thirds majority of senators present being required for approval. (However, it has no control over 'international executive agreements' made by the President with foreign governments: such 'agreements' cover a wide range and are more numerous than formal treaties.).

The Senate has 21 Standing Committees to which all bills are referred for study, revision or rejection. The House of Representatives has 20 such committees. In both Houses each Standing Committee has a chairman and a majority representing the majority party of the whole House; each has numerous sub-committees. The jurisdictions of these Committees correspond largely to those of the appropriate executive departments and agencies. Both Houses also have a few select or special Committees with limited duration.

House of Representatives. The House of Representatives consists of 435 members elected every second year. The number of each state's representatives is determined by the decennial census, in the absence of specific Congressional legislation affecting the basis. The number of representatives for each state in the 108th congress, which began in Jan. 2003 (based on the 2000 census), is given below:

Alabama	7	Indiana	9	Nebraska	3
Alaska	1	Iowa	5	Nevada	3
Arizona	8	Kansas	4	New Hampshire	2
Arkansas	4	Kentucky	6	New Jersey	13
California	53	Louisiana	7	New Mexico	3
Colorado	7	Maine	2	New York	29
Connecticut	5	Maryland	8	North Carolina	13
Delaware	1	Massachusetts	10	North Dakota	1
Florida	25	Michigan	15	Ohio	18
Georgia	13	Minnesota	8	Oklahoma	5
Hawaii	2	Mississippi	4	Oregon	5
Idaho	2	Missouri	9	Pennsylvania	19
Illinois	19	Montana	1	Rhode Island	2
				South Carolina	6
				South Dakota	1
				Tennessee	9
				Texas	32
				Utah	3
				Vermont	1
				Virginia	11
				Washington	9
				West Virginia	3
				Wisconsin	8
				Wyoming	1

The constitution requires congressional districts within each state to be substantially equal in population. Final decisions on congressional district boundaries are taken by the state legislatures and governors. By custom the representative lives in the district from which he is elected. Representatives must be not less than 25 years of age, citizens of the USA for seven years and residents in the state from which they are chosen.

In addition, five delegates (one each from the District of Columbia, American Samoa, Guam, the US Virgin Islands and Puerto Rico) are also members of Congress. They have a voice but no vote, except in committees. The delegate from Puerto Rico is the resident commissioner. Puerto Ricans vote at primaries, but not at national elections. Each of the two Houses of Congress is sole 'judge of the elections, returns and qualifications of its own members'; and each of the Houses may, with the concurrence of two-thirds, expel a member. The period usually termed 'a Congress' in legislative language continues for two years, terminating at noon on 3 Jan.

The salary of a senator is $150,000 per annum, with tax-free expense allowance and allowances for travelling expenses and for clerical hire. The salary of the Speaker of the House of Representatives is $192,600 per annum, with a taxable allowance. The salary of a Member of the House is $150,000 ($166,700 for the Majority Leader and Minority Leader).

No senator or representative can, during the time for which he is elected, be appointed to any *civil* office under authority of the USA which shall have been created or the emoluments of which shall have been increased during such time; and no person holding *any* office under the USA can be a member of either House during his continuance in office. No religious test may be required as a qualification to any office or public trust under the USA or in any state.

Indians. By an Act passed on 2 June 1924 full citizenship was granted to all Indians born in the USA, though those remaining in tribal units were still under special

federal jurisdiction. The Indian Reorganization Act of 1934 gave the tribal Indians, at their own option, substantial opportunities of self-government and the establishment of self-controlled corporate enterprises empowered to borrow money and buy land, machinery and equipment; these corporations are controlled by democratically elected tribal councils. Recently a trend towards releasing Indians from federal supervision has resulted in legislation terminating supervision over specific tribes. In 1988 the federal government recognized that it had a special relationship with, and a trust responsibility for, federally recognized Indian entities in continental USA and tribal entities in Alaska. In 1993 the Bureau of Indian Affairs listed 552 'Indian Entities Recognized and Eligible to Receive Services'. Indian lands (1991) amounted to 52,092,247 acres, of which 41,868,582 was tribally owned and 10,233,665 in trust allotments. Indian lands are held free of taxes. Total Indian population at the 1990 census was 1,959,000, of which Oklahoma, Arizona, California and New Mexico accounted for 832,466.

The District of Columbia, ceded by the State of Maryland for the purposes of government in 1791, is the seat of the US government. It includes the city of Washington, and embraces a land area of 61 sq. miles. The Reorganization Plan No. 3 of 1967 instituted a Mayor Council form of government with appointed officers. In 1973 an elected Mayor and elected councillors were introduced; in 1974 they received power to legislate in local matters. Congress retains power to enact legislation and to veto or supersede the Council's acts. Since 1961 citizens have had the right to vote in national elections. On 23 Aug. 1978 the Senate approved a constitutional amendment giving the District full voting representation in Congress. This has still to be ratified.

The Commonwealth of Puerto Rico, American Samoa, Guam and the Virgin Islands each have a local legislature, whose acts may be modified or annulled by Congress, though in practice this has seldom been done. Puerto Rico, since its attainment of commonwealth status on 25 July 1952, enjoys practically complete self-government, including the election of its governor and other officials. The conduct of foreign relations, however, is still a federal function and federal bureaux and agencies still operate in the island.

General supervision of territorial administration is exercised by the Office of Territories in the Department of Interior.

Local Government. The Union comprises 13 original states, 7 states which were admitted without having been previously organized as territories, and 30 states which had been territories—50 states in all. Each state has its own constitution (which the USA guarantees shall be republican in form), deriving its authority, not from Congress, but from the people of the state. Admission of states into the Union has been granted by special Acts of Congress, either (1) in the form of 'enabling Acts' providing for the drafting and ratification of a state constitution by the people, in which case the territory becomes a state as soon as the conditions are fulfilled, or (2) accepting a constitution already framed, and at once granting admission.

Each state is provided with a legislature of two Houses (except Nebraska, which since 1937 has had a single-chamber legislature), a governor and other executive officials, and a judicial system. Both Houses of the legislature are elective, but the senators (having larger electoral districts usually covering two or three counties compared with the single county or, in some states, the town, which sends one representative to the Lower House) are less numerous than the representatives, while in 38 states their terms are four years; in 12 states the term is two years. Of the four-year senates, Illinois, Montana and New Jersey provide for two four-year terms and one two-year term in each decade. Terms of the lower houses are usually shorter; in 45 states, two years. The trend is towards annual sessions of state legislatures; most meet annually now whereas in 1939 only four did.

The Governor is elected by direct vote of the people over the whole state for a term of office ranging in the various states from two to four years, and with a salary ranging from $70,000 (Maine) to $179,000 (New York). His duty is to see to the faithful administration of the law, and he has command of the military forces of the state. He may recommend measures but does not present bills to the legislature. In some states he presents estimates. In all but one of the states (North Carolina) the Governor has a veto upon legislation, which may, however, be overridden by the

two Houses, in some states by a simple majority, in others by a three-fifths or two-thirds majority. In some states the Governor, on his death or resignation, is succeeded by a Lieut.-Governor who was elected at the same time and has been presiding over the state Senate. In several states the Speaker of the Lower House succeeds the Governor.

National Anthem. The Star-spangled Banner, 'Oh say, can you see by the dawn's early light'; words by F. S. Key, 1814, tune by J. S. Smith; formally adopted by Congress 3 March 1931.

RECENT ELECTIONS

At the presidential election on 7 Nov. 2000 turn-out was 51·2% (49% in 1996). George W. Bush (R.) received 50,461,080 votes (48·1%), Albert Arnold ('Al') Gore Jr (D.) 50,994,082 (48·3%), Ralph Nader (Green Party) 2,858,843 (2·6%), Pat Buchanan (Reform Party) 438,760 (0·4%), Harry Browne (Libertarian Party) (0·4%). Electoral college votes: Bush, 271; Gore, 267; other candidates, nil. Bush's victory was only confirmed on 13 Dec. 2000 after a recount in Florida gave him a total of 271 electoral colleges, one more than he needed to win the presidency. In becoming president as George Bush had 12 years earlier, George W. Bush became only the second son of a former US president to follow his father into office. John Quincy Adams became president in 1825, 24 years after his father John Adams had left office.

For the first time since the Second World War the party of the president increased its number of seats at the first mid-term elections in both the House of Representatives and the Senate. Never before had the party that controls the White House won back the Senate.

The next presidential elections are scheduled to take place on 2 Nov. 2004.

The Speaker of the House of Representatives is Dennis Hastert (R.). The Majority Leader of the Senate is Bill Frist (R.).

DEFENCE

The President is C.-in-C. of the Army, Navy and Air Force.

The National Security Act of 1947 provides for the unification of the Army, Navy and Air Forces under a single Secretary of Defense with cabinet rank. The President is also advised by a National Security Council and the Office of Civil and Defense Mobilization.

Defence expenditure in 2001 totalled US$322,365m. (US$1,128 per capita), representing 3·2% of GDP (down from 6·5% of GDP in 1985). The USA spent more on defence in 2001 than the next ten biggest spenders combined. US expenditure

was 38% of the world total. In 1997 the Quadrennial Defense Review (QDR) was implemented—a plan to transform US defence strategy and military forces. In Oct. 2002 the US Senate approved the biggest increase in military spending in two decades by agreeing to a defence budget of US$355·1bn. for the fiscal year 2003, an increase of US$37·5bn. on 2002.

The estimated number of active military personnel in 2001 was 1,367,700.

The USA is the world's largest exporter of arms, with sales in 2001 worth $9·7bn., or 45·5% of the world total. In 2000 Lockheed Martin and Boeing were the two largest arms producing companies in the USA and in the world, accounting for $18·61bn. and $16·90bn. worth of sales respectively.

The USA's last nuclear test was in 1993. In accordance with START I—the treaty signed by the US and USSR in 1991 to reduce strategic offensive nuclear capability—the number of nuclear warheads (intercontinental ballistic missiles, submarine-launched ballistic missiles and bombers) in Jan. 2002 was approximately 6,480. In 1990 the number of warheads had been 12,718. Strategic nuclear delivery vehicles were made up as follows:

Intercontinental ballistic missiles: 500 Minuteman III; 50 Peacekeeper (MX).

Submarine-launched ballistic missiles: 168 Trident I (C-4); 264 Trident II (D-5).

Bombers: 93 B-52H; 21 B-2.

The USA had what was believed to be the world's second largest stockpile of chemical weapons, but by federal law is committed to unilateral destruction of the weapons by 2004.

In May 2001 President Bush called for the development of an anti-missile shield to move beyond the constraints of the Anti-Ballistic Missile Treaty. In Dec. 2001 he announced that the USA was unilaterally abandoning the Treaty. As the relationship with Russian president Vladimir Putin strengthened following the events of 11 Sept. 2001 he proposed a reduction of operational nuclear warheads to between 1,700 and 2,200 by 2010. On 24 May 2002 the USA and Russia signed an arms control treaty to reduce the number of US and Russian warheads, from between 6,000 and 7,000 each to between 1,700 and 2,200 each, over the next ten years.

Army. *Secretary of the Army.* Vacant.

The Secretary of the Army is the head of the Department of the Army. Subject to the authority of the President as C.-in-C. and of the Secretary of Defense, he is responsible for all affairs of the Department.

The Army consists of the Active Army, the Army National Guard of the US, the Army Reserve and civilian workforce; and all persons appointed to or enlisted into the Army without component; and all persons serving under call or conscription, including members of the National Guard of the States, etc., when in the service of the US. The strength of the Active Army was (2002) 485,500 (including 71,400 women).

The Army budget for fiscal years 2002–04 is as follows: 2002, $86,099m.; 2003, $90,933m.; 2004, $93,903m.

The US Army Forces Command, with headquarters at Fort McPherson, Georgia, commands the Third US Army; four continental US Armies, and all assigned Active Army and US Army Reserve troop units in the continental US, the Commonwealth of Puerto Rico, and the Virgin Islands of the USA. The headquarters of the continental US Armies are: First US Army, Fort George G. Meade, Maryland; Second US Army, Fort Gillem, Georgia; Fifth US Army, Fort Sam Houston, Texas; Sixth US Army, Presidio of San Francisco, California. The US Army Space Command, with headquarters in Colorado Springs (CO), is the Army component to the US Space Command.

Approximately 32% of the Active Army is deployed outside the continental USA. Several divisions, which are located in the USA, keep equipment in Germany and can be flown there in 48–72 hours. Headquarters of US Seventh and Eighth Armies are in Europe and Korea respectively.

Combat vehicles of the US Army are the tank, armoured personnel carrier, infantry fighting vehicle, and the armoured command vehicle. The first-line tanks are the M1A1 Abrams tank, and the M1 Abrams. The standard armoured infantry personnel carrier is the M2 Bradley Fighting Vehicle (BFV), which is replacing the older M113.

The Army has over 5,000 aircraft, all but about 280 of them helicopters, including AH-1 Cobra and AH-64 Apache attack helicopters.

Over 95% of recruits enlisting in the Army have a high-school education and over 50% of the Army is married. Women serve in both combat support and combat service support units.

The National Guard is a reserve military component with both a state and a federal role. Enlistment is voluntary. The members are recruited by each state, but are equipped and paid by the federal government (except when performing state missions). As the organized militia of the several states, the District of Columbia, Puerto Rico and the Territories of the Virgin Islands and Guam, the Guard may be called into service for local emergencies by the chief executives in those jurisdictions; and may be called into federal service by the President to thwart invasion or rebellion or to enforce federal law. In its role as a reserve component of the Army, the Guard is subject to the order of the President in the event of national emergency. In 2002 it numbered 464,300 (Army, 355,900; Air Force, 108,400).

The Army Reserve is designed to supply qualified and experienced units and individuals in an emergency. Members of units are assigned to the Ready Reserve, which is subject to call by the President in case of national emergency without declaration of war by Congress. The Standby Reserve and the Retired Reserve may be called only after declaration of war or national emergency by Congress. In 2002 the Army Reserve numbered 358,100.

Navy. *Secretary of the Navy (acting).* Hansford T. Johnson.

The Navy's Operating Forces include the Atlantic Fleet, divided between the 2nd fleet (home waters) and 6th fleet (Mediterranean) and the Pacific Fleet, similarly divided between the 3rd fleet (home waters), the 7th fleet (West Pacific) and the 5th fleet (Indian Ocean), which was formally activated in 1995 and maintained by units from both Pacific and Atlantic.

The authorized budget for the Department of the Navy (which includes funding both for the Navy and Marine Corps) for fiscal years 2002–04 is as follows: 2002, $104,836m.; 2003, $111,184m.; 2004, $114,720m.

Personnel and fleet strength declined during the mid-1990s but are now stabilizing. The '600-ship battle force' planned in the late 1980s has reduced to a current figure of 317. The Navy personnel total in 2002 was 385,400.

The operational strength of the Navy in the year indicated:

Category	*1992*	*1997*	*2002*
Strategic Submarines	23	18	18
Nuclear Attack Submarines	87	67	54
Aircraft Carriers	12	11[1]	12[1]
Amphibious Carriers	13	11	11
Cruisers	46	30	27
Destroyers	51	56	55
Frigates	90	31	28

[1]Includes the USS *John F. Kennedy* as 'operational and training reserve carrier' in the Naval Reserve Force.

Ships in the inactive reserve are not included in the table, but those serving as Naval Reserve Force training ships are.

Submarine Forces. A principal part of the US naval task is to deploy the seaborne strategic deterrent from nuclear-powered ballistic missile-carrying submarines (SSBN), of which there were 18 in 2002, all of the Ohio class. The listed total of 54 nuclear-powered attack submarines (SSN) includes two of three new Seawolf class and 51 of the Los Angeles class. There is also one of the Sturgeon class.

Surface Combatant Forces. The surface combatant forces are comprised of modern cruisers, destroyers and frigates. These ships provide multi-mission capabilities to achieve maritime dominance in the crowded and complex littoral warfare environment.

The cruiser force consists of 27 Ticonderoga class ships. There are 33 guided-missile Arleigh Burke Aegis class destroyers, 20 Spruance class destroyers and 35 (28 active and 7 in the reserve force) Oliver Hazard Perry class guided missile frigates.

Aircraft carriers. There are eight nuclear-powered Nimitz class carriers. The USS *Enterprise,* completed in 1961, was the prototype nuclear-powered carrier. The two

ships of the Kitty Hawk and one of the John F. Kennedy classes were completed between 1961 and 1968, and represent the last oil-fuelled carriers built by the US Navy. All carriers deploy an air group which comprises on average two squadrons each of F-14 Tomcat fighters and three squadrons each of F/A-18 Hornet fighter/ground attack aircraft.

Naval Aviation. The principal function of the naval aviation organization (currently 12,110 pilots and Naval flight officers) is to train and provide combat ready aviation forces. The main carrier-borne combat aircraft in the current inventory are 232 F-14 fighters and 821 F/A-18 Hornet dual-purpose fighter/attack aircraft.

The Marine Corps. While administratively part of the Department of the Navy, the Corps ranks as a separate armed service, with the Commandant serving in his own right as a member of the Joint Chiefs of Staff, and responsible directly to the Secretary of the Navy. Its strength had stabilized at 173,400 by 2002.

The role of the Marine Corps is to provide specially trained and equipped amphibious expeditionary forces. The Corps includes an autonomous aviation element numbering 35,650 in 2002 with some 442 combat aircraft and 515 helicopters. They include F/A 18 Hornets and AV-8B Harriers.

The US Coast Guard. The Coast Guard operates under the Department of Transportation in time of peace and as part of the Navy in time of war or when directed by the President. The act of establishment stated the Coast Guard 'shall be a military service and branch of the armed forces of the United States at all times'.

The Coast Guard is the country's oldest continuous sea-going service and its missions include maintenance of aids to navigation, icebreaking, environmental response (oil spills), maritime law enforcement, marine licensing, port security, search and rescue and waterways management.

The workforce in 2002 was made up of approximately 34,480 military personnel augmented by 5,840 civilians. On an average Coast Guard day, the service saves 14 lives, conducts 120 law enforcement boardings, seizes 209 pounds of marijuana and 170 pounds of cocaine, boards 90 large vessels for port safety checks, processes 120 seaman's documents, investigates 17 marine accidents, inspects 64 commercial vessels, assists 328 people in distress, saves $2,490,000 in property, services 150 aids to navigation and interdicts 176 illegal immigrants.

Air Force. *Secretary of the Air Force.* James G. Roche.

The Department of the Air Force was activated within the Department of Defense on 18 Sept. 1947, under the terms of the National Security Act of 1947.

The USAF has the mission to defend the USA through control and exploitation of air and space. For operational purposes the service is divided into 8 major commands, 37 field operating agencies and 3 direct-reporting units.

The bulk of the combat forces are grouped under the Air Combat Command, which controls strategic bombing, tactical strike, air defence and reconnaissance assets in the USA.

Air Force bombers include the B-1B Lancer, the B-2A and the B-52G/H Stratofortress, which has been the primary manned strategic bomber for over 35 years. In the fighter category are the F-15 Eagle, the F-16 Fighting Falcon and the F-117A, the world's first operational aircraft to exploit low-observable stealth technology.

The Air Force budget for fiscal years 2002–04 is as follows: 2002, $100,266m.; 2003, $108,451m.; 2004, $113,805m.

In 2002 the Air Force had approximately 369,700 military personnel. 56,400 Air Force members are women. Since 1991 women have been authorized to fly combat aircraft, but not until 1993 were they allowed to fly fighters.

INTERNATIONAL RELATIONS

The USA is a member of the UN, WTO, NATO, BIS, OECD, OSCE, OAS, Inter-American Development Bank, Asian Development Bank, Pacific Community, Colombo Plan, IOM and the Antarctic Treaty.

In 2001 the USA gave US$10·9bn. in international aid, the highest figure of any country. In terms of a percentage of GNI, however, the USA was the least generous major industrialized country, giving just 0·1% (compared to more than 0·6% in the early 1960s).

ECONOMY

Services accounted for approximately 80% of GDP in 1999, industry 18% and agriculture 2%.

According to the anti-corruption organization *Transparency International*, in 2002 the USA ranked 16th in the world in a survey of the countries with the least corruption in business and government. It received 7·7 out of 10 in the annual index.

Per capita income in 2001 was $30,472, up from $19,572 in 1990.

Overview. In March 2001 the US economy entered its first recession in a decade after the longest period of expansion in US history. The economy declined further following the 11 Sept. 2001 attacks. Economic policies have moved from short-term stabilization to strengthening the base for durable growth. In Dec. 2000 monetary policy was eased and in Jan. 2001 interest rates were cut by 50 basis points, the first cut since 1992. The 11 Dec. 2001 rate cut was the eleventh interest fall of 2001. In June 2002 short-term interest rates were at a 40-year low. Worsened economic conditions have led to a smaller federal budget surplus than forecast. In March 2002 there was a budget deficit over 1% of GDP. Spending plans for 2003 include a 14% increase in the defence budget and a 50% increase on homeland security.

Currency. The unit of currency is the *dollar* (USD) of 100 *cents*. Notes are issued by the 12 Federal Reserve Banks, which are denoted by a branch letter (A = Boston, MA; B = New York, NY; C = Philadelphia, PA; D = Cleveland, OH; E = Richmond, VA; F = Atlanta, GA; G = Chicago, IL; H = St Louis, MO; I = Minneapolis, MN; J = Kansas City, MO; K = Dallas, TX; L = San Francisco, CA).

Inflation was 2·2% in 1999, 3·4% in 2000 and 2·8% in 2001. Foreign exchange reserves in June 2002 were US$32,166m. Gold reserves in June 2002 were 262·0m. troy oz. The USA has the most gold reserves of any country, and more than the combined reserves of the next two (Germany and France). Total money supply in March 2002 was $1,552bn.

Budget. The budget covers virtually all the programmes of federal government, including those financed through trust funds, such as for social security, Medicare and highway construction. Receipts of the government include all income from its sovereign or compulsory powers: income from business-type or market-orientated activities of the government is offset against outlays. The fiscal year ends on 30 Sept. (before 1977 on 30 June). Budget receipts and outlays, including off-budget receipts and outlays (in $1m.):

National Income. The Bureau of Economic Analysis of the Department of Commerce prepares detailed estimates on the national income and product. In Oct. 1999 the Bureau revised these accounts back to 1959, and in April 2000 back to 1929. The principal tables are published monthly in *Survey of Current Business*; the complete set of national income and product tables are published in the *Survey* normally each Aug., showing data for recent years. *The National Income and Product Accounts of the United States* (1929–97, 2 vols.) were published in Sept. 2001. The conceptual framework and statistical methods underlying the accounts are described in National Income and Product Account (NIPA) Methodology Papers 1–6. Subsequent limited changes are described in the Aug. 1999, Sept. 1999, Oct. 1999, Dec. 1999, April 2000, Aug. 2000, Aug. 2001 and Aug. 2002 *Surveys*.

[1]In 1996 the chain-weighted method of estimating GDP replaced that of constant base-year prices. In chain-weighting the weights used to value different sectors of the economy are continually updated to reflect changes in relative prices.

Performance. Total GDP in 2001 was US$10,082·2bn., representing approximately 32% of the world's total GDP. Real GDP growth was 4·3% in 1998, 4·1% in 1999 and 3·8% in 2000. In the first quarter of 2001 the economy contracted for the first time since 1993, shrinking by 0·6%. The recession came to an end in the final quarter of 2001, with growth of 2·7%, giving a growth rate for 2001 as a whole of 0·3%. In the 2002 *World Competitiveness Yearbook*, compiled by the International Institute for Management Development, the USA came top in the world ranking. The USA was top in both the Growth Competitiveness Ranking and the Microeconomic Competitiveness Ranking in the World Economic Forum's *Global Competitiveness Report 2002–03*, up from second in both in 2001–02.

Banking and Finance. The Federal Reserve System, established under The Federal Reserve Act of 1913, comprises the Board of seven Governors, the 12 regional Federal Reserve Banks with their 25 branches, and the Federal Open Market Committee. The seven members of the Board of Governors are appointed by the President with the consent of the Senate. Each Governor is appointed to a full term of 14 years or an unexpired portion of a term, one term expiring every two years.

The Board exercises broad supervisory authority over the operations of the 12 Federal Reserve Banks, including approval of their budgets and of the appointments of their presidents and first vice presidents; it designates three of the nine directors of each Reserve Bank including the Chairman and Deputy Chairman. The Chairman of the Federal Reserve Board is appointed by the President for four-year terms. The *Chairman* for 2000–04 is Alan Greenspan. The Board has supervisory and regulatory responsibilities over banks that are members of the Federal Reserve System, bank holding companies, bank mergers, Edge Act and agreement corporations, foreign activities of member banks, international banking facilities in the USA, and activities of the US branches and agencies of foreign banks. Legislation of 1991 requires foreign banks to prove that they are subject to comprehensive consolidated supervision by a regulator at home, and have the Board's approval to establish branches, agencies and representative offices. The Board also assures the smooth functioning and continued development of the nation's vast payments system. Another area of the Board's responsibilities involves the implementation by regulation of major federal laws governing consumer credit.

In 2001, four of the five largest banks in the world in terms of market capitalization were US banks. Citigroup was the largest ($255·2bn.). The third, fourth and fifth largest were Bank of America ($95·7bn.), JP Morgan Chase ($88·4bn.) and Wells Fargo ($74·7bn.).

The key stock exchanges are the New York Stock Exchange (NYSE), the Nasdaq Stock Exchange (NASDAQ) and the American Stock Exchange (ASE). There are several other stock exchanges, in Philadelphia, Boston, San Francisco (Pacific Stock Exchange) and Chicago, although trading is very limited in them.

In 1999 the USA received $276bn. worth of foreign direct investment—three times as much as any other country.

By Oct. 2000 approximately 18% of the population were using e-banking.

Weights and Measures. The US Customary System derives from the British Imperial System. It differs in respect of the *gallon* (= 0·83268 Imperial gallon); *bushel* (= 0·969 Imperial bushel); *hundredweight* (= 100 lb); and the *short* or *net ton* (= 2,000 lb).

ENERGY AND NATURAL RESOURCES

Environment. The USA's carbon dioxide emissions in 1998 accounted for 24·3% of the world total, higher than any other country, and according to the *World Bank Atlas* were equivalent to 19·8 tonnes per capita. The population of the USA is only 4·6% of the world total. An *Environmental Sustainability Index* compiled for the World Economic Forum meeting in Feb. 2002 ranked the USA 45th in the world, with 53·2%. The index measured the ability of countries to maintain favourable environmental conditions and examined various factors including pollution levels and the use or abuse of natural resources.

In March 2001 President Bush rejected the 1997 Kyoto Protocol, which aims to combat the rise in the earth's temperature through the reduction of industrialized nations' carbon dioxide emissions by an average 5·2% below 1990 levels by 2012. In Feb. 2002 he unveiled an alternative climate-change plan to the Kyoto Protocol, calling for voluntary measures to reduce the rate of increase of US carbon dioxide emissions.

The USA recycled 31·5% of its household waste in 1998, ranking it seventh in the world.

Electricity. Net capacity in 1999 was 639·3m. kW. Fossil fuel accounts for approximately 70% of electricity generation. In 2001, 20% of electricity was produced by 104 nuclear reactors. (The last one to begin commercial operation was in 1996.) The US has more nuclear reactors in use than any other country in the world. In 1999 the USA had a nuclear generating capacity of 97,200 MW. Electricity production in 1999 was the highest in the world, at 3,173,674m. kWh.[1] Consumption per capita in 1998 was 11,832 kWh.

[1]Does not include non-utility production.

Oil and Gas. Crude oil production (2001), 1,830m. bbls. Production has been gradually declining since the mid-1980s, when annual production was 3,274m. bbls.

Only Saudi Arabia produces more oil. Proven reserves were 22·0bn. bbls. in 2001, but they are expected to be exhausted by 2011. Output (1999) was valued at $33·40bn. Imported supplies account for approximately half of US oil consumption, with Saudi Arabia supplying a sixth of US oil imports. In Oct. 2002 the USA took its first delivery of Russian oil for its Strategic Petroleum Reserve as a consequence of an energy dialogue declared by Presidents George W. Bush and Vladimir Putin at their summit in May 2002.

The USA is by far the largest single consumer of natural gas, and the second largest producer after Russia. Natural gas production, 2001, was 19·21trn. cu. ft. Proven gas reserves in 2001 totalled 177trn. cu. ft.

Wind. The USA is one of the largest producers of wind-power. By the end of 2002 total installed capacity amounted to 4,685 MW.

Water. The total area covered by water is 256,645 sq. miles. Americans' average annual water usage is nearly 67,000 cu. ft per person—more than twice the average for an industrialized nation.

Non-Fuel Minerals. The USA is wholly dependent upon imports for columbium, bauxite, mica sheet, manganese, strontium and graphite, and imports over 80% of its requirements of industrial diamonds, fluorspar, platinum, tantalum, tungsten, chromium and tin.

Total value of non-fuel minerals produced in 1999 was $40,100m. ($33,445m. in 1990). Details of some of the main minerals produced are given in the following tables.

Coal. Demonstrated coal reserves were 507,740m. short tons at 1 Jan. 1997. Output in 1999 (in 1m. short tons): 1,099·1 including bituminous coal, 621·3; sub-bituminous coal, 388·3; lignite, 84·4; anthracite, 5·2. 1998 output from opencast workings, 699,807; underground mines, 417,728. Value of total output, 1998, $19·756bn.

Agriculture. Agriculture in the USA is characterized by its ability to adapt to widely varying conditions, and still produce an abundance and variety of agricultural products. From colonial times to about 1920 the major increases in farm production were brought about by adding to the number of farms and the amount of land under cultivation. During this period nearly 320m. acres of virgin forest were converted to crop land or pasture, and extensive areas of grasslands were ploughed. Improvident use of soil and water resources was evident in many areas.

During the next 20 years the number of farms reached a plateau of about 6·5m., and the acreage planted to crops held relatively stable around 330m. acres. The major source of increase in farm output arose from the substitution of power-driven machines for horses and mules. Greater emphasis was placed on development and improvement of land, and the need for conservation of basic agricultural resources was recognized.

Since the Second World War the uptrend in farm output has been greatly accelerated by increased production per acre and per farm animal. These increases are associated with a higher degree of mechanization; greater use of lime and fertilizer; improved varieties, including hybrid maize and grain sorghums; more effective control of insects and disease; improved strains of livestock and poultry; and wider use of good husbandry practices, such as nutritionally balanced feeds, use of superior sites and better housing.

All land in farms totalled less than 500m. acres in 1870, rose to a peak of over 1,200m. acres in the 1950s and declined to 941m. acres in 2001, even with the addition of the new States of Alaska and Hawaii in 1960. The number of farms declined from 6·35m. in 1940 to 2·16m. in 2001, as the average size of farms doubled. The average size of farms in 2001 was 436 acres, but ranged from a few acres to many thousand acres. In 1997 the total value of land and buildings was $912,344m. The average value of land and buildings per acre in 1998 was $1,000.

At the 1990 census 66,964,000 persons (22·5% of the population) were rural, of whom 4,591,000 (under 2%) lived on farms. In 1997 there were an estimated 1,317,000 farm operators and managers and 2,030,000 persons in other agricultural and related occupations, of which 796,000 were farm workers. There were in 1998 4·8m. tractors and 662,000 harvester-threshers.

Forestry. Forests covered a total area of 525m. acres (212m. ha) in 1995, or 23% of the land area. Between 1990 and 1995 new planting resulted in the total area under forests growing by 7·2m. acres (2·9m. ha), the largest increase in any country in the world over the same period. The national forests had an area of 191,854,000 acres in 1999. In 1996 there were 518m. acres of timberland (124m. acres federally owned or managed, 35m. acres state, county or municipality owned, 357m. acres private). Timber production was 500·75m. cu. metres in 1999. The USA is the world's second largest producer of roundwood after China (15% of the world total in 1999). It is also the second highest consumer of roundwood; timber consumption in 1999 totalled 17·49bn. cu. ft.

There are 624 designated wilderness areas throughout the USA, covering a total of 104m. acres (42m. ha). More than half of the areas are in Alaska (56%), followed by California (13%), Arizona, Washington and Idaho.

The USA's imports of fishery commodities in 1999 ($9·41bn.) were exceeded only by those of Japan.

In the period 1995–97 the average American citizen consumed 46·1 lb (20·9 kg) of fish and fishery products a year, compared to an average 34·6 lb (15·7 kg) for the world as a whole.

Tennessee Valley Authority. Established by Act of Congress, 1933, the TVA is a multiple-purpose federal agency which carries out its duties in an area embracing some 41,000 sq. miles in the seven Tennessee River Valley states: Tennessee, Kentucky, Mississippi, Alabama, North Carolina, Georgia and Virginia. In addition, 76 counties outside the Valley are served by TVA power distributors. Its three directors are appointed by the President, with the consent of the Senate; headquarters are in Knoxville (TN). Under a policy announced in Dec. 1994 the TVA is subject to a debt ceiling of $30,000m. Total debt in 1994 was $26,000m.

The primary task of the TVA was the multipurpose development of the Tennessee River for flood control, navigation, and electric power production. In 1994 three nuclear reactors were in operation.

The TVA has also contributed to controlling erosion on the land, introducing better fertilizers and new farming practices, eradicating malaria, demonstrating ways electricity could lighten the burdens in the home and increase production on the farm, and the creation of potential job-producing enterprises.

INDUSTRY

The largest companies in the USA—and the world—by market capitalization in Jan. 2002 were: The General Electric Company (US$372bn.); The Microsoft Corporation (US$327bn.), the world's leading software company; and The Exxon Mobil Corporation (US$300bn.), the world's largest integrated oil company. According to a survey published by the New York-based Interbrand in July 2000, Coca-Cola is the most valuable brand, worth US$72·5bn.

The following table presents industry statistics of manufactures as reported at various censuses from 1909 to 1980 and from the Annual Survey of Manufactures for years in which no census was taken.

The annual Surveys of Manufactures carry forward the key measures of manufacturing activity which are covered in detail by the Census of Manufactures. The large plants in the surveys account for approximately two-thirds of the total employment in operating manufacturing establishments in the USA.

The total number of employees in the manufacturing industry in 2000 was approximately 16,681,000. In 2000 manufacturing contributed 17% of GDP and provided 14% of jobs, down from 27% of GDP and 31% of jobs in 1960. Industrial production grew far faster during the 1990s than in any other major economy, output expanding by 34% during the period 1990–98. Employees worked an average of 41·5 hours per week in 2000 for an average weekly income of $597.

The leading industries in 1999 in terms of value added by manufacture (in $1m.) were: transportation equipment, 268,511; computer and electronic products, 265,442; chemicals and allied products, 229,284; food, 177,659; fabricated metal products, 142,451. In 1999 a total of 13,022,000 motor vehicles were made in the USA, making it the world's leading vehicle producer.

In 1999 principal commodities produced (by value of shipments, in $1m.) were: transportation equipment, 675,122; computer and electronic products, 458,485; food, 429,053; chemicals and allied products, 419,674; machinery, 277,117.

The USA is the world's largest beer producer, with 6,248m. gallons in 1999.

Net profits (1999) for manufacturing corporations reached a record $356bn. before tax ($261bn. after tax).

Iron and Steel. Output of the iron and steel industries (in 1m. net tons of 2,000 lb), according to figures supplied by the American Iron and Steel Institute, was:

	Pig iron (including ferro-alloys)	*Raw steel*	*Steel by method of production*[1] *Electric*	*Basic Oxygen*
1994	54·4	100·6	39·6	61·0

1997	54·7	108·6	47·5	61·1
1998	53·2	108·8	49·1	59·7
1999	51·0	107·4	49·7	57·7

[1]The sum of these two items should equal the total in the preceding column; any difference is due to rounding.

In 1997 companies comprising 65% of raw steel production employed 83,466 wage-earners who worked an average of 42·7 hours per week and earned an average of $23·90 per hour: total employment costs were $6,465m. and total employment costs for 28,359 salaried employees were $2,378m.

Labour The Bureau of Labor Statistics estimated that in 2002 the civilian labour force was 144,863,000 (66·6% of those 16 years and over), of whom 136,485,000 were employed and 8,378,000 (5·8%) were unemployed. By April 2000 the unemployment rate was down to 3·8%—the lowest rate since 1970. However, it has risen in the meantime, and was 5·7% in Jan. 2003. Total non-farm payroll employment fell by 230,000 in the 12 months ending Dec. 2002. Employment by industry in 2002:

A total of 29 strikes and lockouts of 1,000 workers or more occurred in 2001, involving 99,000 workers and 1·2m. idle days; the number of idle days was less than one out of every 10,000 available workdays. Between 1989 and 1998 strikes cost the USA an average of 54 days per 1,000 employees a year.

On 1 Sept. 1997 the federal hourly minimum wage was raised from $4·75 to $5·15 an hour. On 1 Oct. 1996 it had been raised from $4·25 to $4·75 an hour, the first time it had been raised since 1991. Americans work among the longest hours in the world, averaging 1,996 hours in 1997.

Labour relations are legally regulated by the National Labor Relations Act, amended by the Labor–Management Relations (Taft–Hartley) Act, 1947 as amended by the Labor–Management Reporting and Disclosure Act, 1959, again amended in 1974, and the Railway Labor Act of 1926, as amended in 1934 and 1936.

A survey for the World Economic Forum's *1999 Global Competitiveness Report* showed that the USA was the easiest country in the world in which to set up a business.

Trade Unions. The labour movement comprises 78 national and international labour organizations plus a large number of small independent local or single-firm labour organizations. The American Federation of Labor and the Congress of Industrial Organizations merged into one organization, the AFL–CIO, in 1955, with 13m. members in 2000. Its president is John Sweeney, elected 1995. There were 16,258,200 union members in total in 2000.

Unaffiliated or independent labour organizations, inter-state in scope, had an estimated total membership excluding all foreign members (1993) of about 3m.

Labour organizations represented 14·6% (17·8m.) of wage and salary workers in 2002; a newly developing 'associative unionism' is not based on the workplace, but provides representation for employees which is portable throughout their work history; 13·2% (16·1m.) were actual members of unions. 37·5% of employees in the public sector, and 8·5% in the private sector, were members of unions in 2002. Strongholds of organized labour are, industry-wise, iron and steel, railways, coal mining and car building; region-wise, East coast cities and the mid-West industrial belt.

INTERNATIONAL TRADE

The North American Free Trade Agreement (NAFTA) between the USA, Canada and Mexico was signed on 7 Oct. 1992 and came into effect on 1 Jan. 1994. The UK has had 'most-favoured-nation' status since 1815. In 1998 foreign direct investment totalled $811,756m., the leading investor still being the United Kingdom.

COMMUNICATIONS

Roads. On 31 Dec. 1999 the total public road mileage was 3,917,240 miles (urban, 846,059; rural, 3,071,181). Of the urban roads, 111,000 were state controlled and 740,000 under local control. 663,000 miles of rural roads were controlled by the states, about 2,299,000 miles of rural roads were under local control, and, in 1996, there were about 169,000 miles of federal park and forest roads. State highway funds were $83,675m. in 1999.

Motor vehicles registered in 1999: 216,309,000, of which 132,432,000 automobiles, 83,148,000 trucks and 729,000 buses. There were 187,170,000 licensed drivers in 1999 and 4,111,000 motorcycle registrations. The average distance travelled by a passenger car in the year 1999 was 11,900 miles. There were 41,717 deaths in road accidents in 1999.

Rail. Freight service is provided by 12 major independent railroad companies and several hundred smaller operators. Long-distance passenger trains are run by the National Railroad Passenger Corporation (Amtrak), which is federally assisted. Amtrak was set up in 1971 to maintain a basic network of long-distance passenger trains, and is responsible for almost all non-commuter services over some 38,000 route-km, of which it owns only 1,256 km (555 km electrified). Outside the major conurbations, there are almost no regular passenger services other than those of Amtrak, which carried 21,544,000 passengers in 1999. Passenger revenue for Amtrak (1999) was $1,067·8m.; revenue passenger miles, 5,289m.

Civil Aviation. The busiest airport in 2001 was Atlanta (Hartsfield International), which handled 37,181,068 passenger enplanements (34,382,731 on domestic flights). The second busiest was Chicago (O'Hare) with 31,529,561 passenger enplanements (27,519,219 on domestic flights), followed by Los Angeles International, with 29,365,436 passenger enplanements (22,134,944 on domestic flights). As well as being the three busiest airports in the USA for passenger traffic in 2001, they are also the three busiest in the world. New York (John F. Kennedy) was the busiest airport in the USA for international passenger enplanements in 2001, with 7,610,411, ahead of Los Angeles International, with 7,230,492. The leading domestic routes for 2000 were Los Angeles to/from New York (3,585,680 passengers), New York to/from Orlando (3,063,930) and Chicago to/from New York (3,057,540).

The leading airports in 2001 on the basis of aircraft departures completed were Chicago, O'Hare (463,948); Atlanta, Hartsfield International (449,450); Dallas/Fort Worth (417,874).

There were 35 airports with more than 100,000 international enplanements in 2001. These were, in descending order: New York (John F. Kennedy); Los Angeles; Miami; Chicago (O'Hare); New York (Newark); San Francisco; Atlanta (Hartsfield); Houston (George Bush); Honolulu; Dallas/Fort Worth; Washington, D.C. (Dulles International); Boston; Guam; Detroit (Metropolitan-Wayne County); Philadelphia; San Juan (Luis Muñoz Marín International); Orlando International; Seattle; Minneapolis/St Paul; Orlando (Sanford); New York (La Guardia); Fort Lauderdale (Hollywood International); Saipan; Phoenix; Denver; Las Vegas (McCarran); Charlotte; Baltimore; Cincinnati (Northern Kentucky International); Pittsburgh; San Jose; St Louis (Lambert); San Diego (Lindbergh Field); Tampa; Memphis.

In 2001 Delta Air Lines carried the most passengers of any airline in the world with 90,520,588 (around 4% on international flights), ahead of Southwest Airlines, with 73,742,202 (all on domestic flights) and American Airlines, with 69,881,469 (around 10% on international flights). American Airlines carried the most international passengers of any US carrier, ahead of United Airlines. American Airlines also flew the furthest of any carrier in the world in 1999, covering 1,550·1m. km (963·2m. miles), ahead of United Airlines, with 1,477·9m. km (918·5m. miles). In Dec. 2002 United Airlines filed for bankruptcy following a record loss of $2·1bn. in 2001 and reported losses of approximately $1·7bn. for the first nine months of 2002.

In 2001 US flag carriers in scheduled service enplaned 621m. revenue passengers (665m. in 2000).

Shipping. In Oct. 2001 the cargo-carrying US flag fleet consisted of 31,387 vessels, of which 3,835 were of 1,000 GRT and over (2,148 liquid carriers, 760 dry bulk carriers, 126 containerships and 801 other freighters). Of 27,552 vessels of less than 1,000 GRT, 1,767 were liquid carriers, 21,705 dry bulk carriers, 4 containerships and 4,076 other freighters. Shipping capacity in Oct. 2001 was 72,816,000 GRT, of which the vessels of 1,000 GRT and over totalled 31,877,000 GRT while those of less than 1,000 GRT totalled 40,939,000 GRT. On 1 Jan. 2002 the US merchant marine included 443 ocean-going self-propelled merchant vessels of 1,000 gross tons or over, with an aggregate 15·0m. DWT. This included 130 tankers of 7·5m. DWT.

In 1999 vessels totalling 440,341,000 NRT entered, and 302,344,000 NRT cleared, all US ports.

Telecommunications. Regional private companies formed from the American Telephone and Telegraph Co. after its dissolution in 1995 ('Baby Bells') operate the telephone, telegraph, telex and electronic transmission services system at the national and local levels. In 2000 main telephone lines numbered 192,518,800 (or 699·7 per 1,000 persons). There were 100·7m. mobile phone subscribers by the end of 2000, with the largest operators being Verizon and Cingular (ranked 3rd and 5th in the world, with 27·5m. and 19·7m. subscribers respectively). There were 161m. PCs in 2000 (585·2 for every 1,000 persons—the highest rate in the world) and in 1997 there were 21m. fax machines. The number of Internet users in April 2002 was estimated to be 165·75m., or 59·1% of the population (among the highest percentages in the world).

Legislation on the media and telecommunications of 1996 coming into force on 31 March 1999 aimed at deregulating the market while preserving safeguards

against over-concentration of individual ownership: a single company may not control a network reaching more than 35% of TV viewers, or produce a newspaper and a television service in the same market. Local companies are now permitted to operate long-distance telephone services and also cable TV services.

Postal Services. The US Postal Service superseded the Post Office Department on 1 July 1971.

Postal business for the years ended in Sept. included the following items:

	1997	*1998*	*1999*	*2000*
Number of post offices, stations and branches	38,019	38,159	38,169	38,060

Operating expenditures ($1m.)	54,873	57,786	60.642	62,992

SOCIAL INSTITUTIONS

Justice. Legal controversies may be decided in two systems of courts: the federal courts, with jurisdiction confined to certain matters enumerated in Article III of the Constitution, and the state courts, with jurisdiction in all other proceedings. The federal courts have jurisdiction exclusive of the state courts in criminal prosecutions for the violation of federal statutes, in civil cases involving the government, in bankruptcy cases and in admiralty proceedings, and have jurisdiction concurrent with the state courts over suits between parties from different states, and certain suits involving questions of federal law.

The highest court is the Supreme Court of the US, which reviews cases from the lower federal courts and certain cases originating in state courts involving questions of federal law. It is the final arbiter of all questions involving federal statutes and the Constitution; and it has the power to invalidate any federal or state law or executive action which it finds repugnant to the Constitution. This court, consisting of nine justices appointed by the President who receive salaries of $184,400 a year (the Chief Justice, $192,600), meets from Oct. until June every year. For the term ended June 2000 it disposed of 8,445 cases, deciding 81 on their merits. In the remainder of cases it either summarily affirms lower court decisions or declines to review. A few suits, usually brought by state governments, originate in the Supreme Court, but issues of fact are mostly referred to a master.

The US courts of appeals number 13 (in 11 circuits composed of three or more states and one circuit for the District of Columbia and one Court of Appeals for the Federal Circuit); the 179 circuit judges receive salaries of $159,100 a year. Any party to a suit in a lower federal court usually has a right of appeal to one of these courts. In addition, there are direct appeals to these courts from many federal administrative agencies. In the year ending 30 June 1997, 53,742 appeals were filed in the courts of appeals, including 1,417 in the Federal Circuit.

The trial courts in the federal system are the US district courts, of which there are 89 in the 50 states, one in the District of Columbia and one each in the Commonwealth of Puerto Rico and the Territories of the Virgin Islands, Guam and the Northern Marianas. Each state has at least one US district court, and three states have four apiece. Each district court has from one to 28 judgeships. There are 649 US district judges ($150,000 a year), who received 261,162 civil cases from 1 July 1997 to 30 June 1998.

In addition to these courts of general jurisdiction, there are special federal courts of limited jurisdiction. The US Court of Federal Claims (16 judges at $150,000 a year) decides claims for money damages against the federal government in a wide variety of matters; the Court of International Trade (9 judges at $150,000) determines controversies concerning the classification and valuation of imported merchandise.

The judges of all these courts are appointed by the President with the approval of the Senate; to assure their independence, they hold office during good behaviour and cannot have their salaries reduced. This does not apply to judges in the Territories, who hold their offices for a term of ten years or to judges of the US Court of Federal Claims. The judges may retire with full pay at the age of 70 years if they have served a period of ten years, or at 65 if they have 15 years of service, but they are subject to call for such judicial duties as they are willing to undertake.

In 1998–99, of the 251,511 civil cases filed in the district courts, 159,205 arose under various federal statutes (such as labour, social security, tax, patent, securities, antitrust and civil rights laws); 39,785 involved personal injury or property damage claims; 46,721 dealt with contracts; and 5,787 were actions concerning real property.

In 2000 the number of lawyers in the USA passed the 1m. mark, equivalent to 363 per 100,000 people.

Among the 66,055 offenders convicted in 1999 in the district courts, 24,275 persons were charged with alleged infractions of drug laws, 17,097 with public order offences, 12,712 with property offences and 2,781 with violent offences. All other people convicted were charged with miscellaneous general offences.

Persons convicted of federal crimes may be fined, released on probation under the supervision of the probation officers of the federal courts, confined in prison, or confined in prison with a period of supervised release to follow, also under the supervision of probation officers of the federal courts. Federal prisoners are confined in 87 institutions incorporating various security levels that are operated by the Bureau of Prisons. On 31 Dec. 2001 the total number of prisoners under the jurisdiction of Federal or State adult correctional authorities was 1,406,031. A record 1,962,220 inmates were held in Federal or State prisons or local jails at the end of 2001, giving a rate of 686 per 100,000 population.

The state courts have jurisdiction over all civil and criminal cases arising under state laws, but decisions of the state courts of last resort as to the validity of treaties or of laws of the USA, or on other questions arising under the Constitution, are subject to review by the Supreme Court of the US. The state court systems are generally similar to the federal system, to the extent that they generally have a number of trial courts and intermediate appellate courts, and a single court of last resort. The highest court in each state is usually called the Supreme Court or Court of Appeals with a Chief Justice and Associate Justices, usually elected but sometimes appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. The lowest tribunals are usually those of Justices of the Peace; many towns and cities have municipal and police courts, with power to commit for trial in criminal matters and to determine misdemeanours for violation of the municipal ordinances.

There were no executions from 1968 to 1976. The US Supreme Court had held the death penalty, as applied in general criminal statutes, to contravene the eighth and fourteenth amendments of the US constitution, as a cruel and unusual punishment when used so irregularly and rarely as to destroy its deterrent value. The death penalty was reinstated by the Supreme Court in 1976, but has not been authorized in Alaska, the District of Columbia, Hawaii, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, North Dakota, Rhode Island, Vermont, West Virginia and Wisconsin. There were, in Oct. 2002, 3,697 (including 53 women) prisoners under sentence of death. In 2002 there were 71 executions (66 in 2001 but only 14 in 1991). From 1976–2002 there were 820 executions of which 289 were in Texas and 87 in Virginia. The execution of young offenders under the age of 18 is still permitted and carried out in some states. For the first time since 1963, there were two executions under federal jurisdiction in 2001.

There were 15,517 murders in 2000, the lowest total since 1969. The murder rate in 2000 was 5·5 per 100,000 persons, down from 10·2 per 100,000 in 1980. 67·8% of all murders in 1997 were carried out with guns (53·3% of which were handguns).

Education. The adult literacy rate is at least 99%.

Elementary and secondary education is mainly a state responsibility. Each state and the District of Columbia has a system of free public schools, established by law, with courses covering 12 years plus kindergarten. There are three structural patterns in common use; the K8-4 plan, meaning kindergarten plus eight elemeatary grades followed by four high school grades; the K6-3-3 plan, or kindergarten plus six elementary grades followed by a three-year junior high school and a three-year

senior high school; and the K5-3-4 plan, kindergarten plus five elementary grades followed by a three-year middle school and a four-year high school. All plans lead to high-school graduation, usually at age 17 or 18. Vocational education is an integral part of secondary education. Many states also have two-year colleges in which education is provided at a nominal cost. Each state has delegated a large degree of control of the educational programme to local school districts (numbering 14,891 in school year 1998–99), each with a board of education (usually three to nine members) selected locally and serving mostly without pay. The school policies of the local school districts must be in accord with the laws and the regulations of their state Departments of Education. While regulations differ from one jurisdiction to another, in general it may be said that school attendance is compulsory from age 7 to 16.

'Charter schools' are legal entities outside the school boards administration. They retain the basics of public school education, but may offer unconventional curricula and hours of attendance. Founders may be parents, teachers, public bodies or commercial firms. Organization and conditions depend upon individual states' legislation. The first charter schools were set up in Minnesota in 1991. By Sept. 1999, 1,484 charter schools were operating in 31 states and Washington, D.C.

In 1940 a new category was established—the 'functionally illiterate', meaning those who had completed fewer than five years of elementary schooling; for persons 25 years of age or over this percentage was 1·6 in March 1999 (for the Black population it was 1·9%); it was 0·6% for white and 0·4% for Blacks in the 25–29-year-old group. It was reported in March 1999 that 83·4% of all persons 25 years old and over had completed four years of high school or more, and that 25·2% had completed a bachelor's degree or more. In the age group 25 to 29, 87·8% had completed four years of high school or more, and 28·2% had completed a bachelor's degree or more. However, according to a report published in 2001 nearly a third of American fourth graders (aged 9–10) are unable to read.

In the autumn of 1998, 14,549,000 students (8,582,000 full-time and 8,163,000 women) were enrolled in 3,913 colleges and universities; 2,218,000 were first-time students. 36·6% of the population between the ages of 18 and 24 were enrolled in colleges and universities. It is projected that in 2010 the student population will number 17,490,000.

Public elementary and secondary school revenue is supplied from the county and other local sources (44·8% in 1997–98), state sources (48·4%) and federal sources (6·8%). In 1998–99 expenditure for public elementary and secondary education totalled about $349,200m., including $303,500m. for current operating expenses, $37,700m. for capital outlay and $8,000m. for interest on school debt. The current expenditure per pupil in average daily attendance was about $6,900. The total cost per pupil, also including capital outlay and interest, amounted to about $7,960.

In 1998–99 total expenditure on education came to about 7·1% of GDP. Estimated total expenditures for private elementary and secondary schools in 1998–99 were about $27,700m. In 1998–99 college and university spending totalled about $246,300m., of which about $152,400m. was spent by institutions under public control. The federal government contributed about 12% of total current-fund revenue; state governments, 23%; student tuition and fees, 28%; and all other sources, 37%.

Vocational education below college grade, including the training of teachers to conduct such education, has been federally aided since 1918. Federal support for vocational education in 1998–99 amounted to about $1,128m. Many public high schools offer vocational courses in addition to their usual academic programmes.

[3]Estimated.

In the autumn of 1998 there were 18·0 pupils per teacher in public elementary schools in the USA and 14·2 pupils per teacher in public secondary schools.

Most of the private elementary and secondary schools are affiliated with religious denominations. In 1998–99 there were 6,990 Roman Catholic elementary schools with 1,876,000 pupils and 105,900 teachers, and 1,227 secondary schools with 620,000 pupils and 47,100 teachers.

During the school year 1998–99 high-school graduates numbered about 2,740,000 (of whom about 2,456,000 were from public schools). Institutions of higher education conferred about 1,184,000 bachelor's degrees during the year 1998–99, 559,000 associate's degrees; 430,000 master's degrees; 46,000 doctorates; and 78,600 first professional degrees. In 1998–99 the US Department of Education provided $11,685m. in grants, loans, work-study programmes and other financial assistance to post-secondary students. Other agencies of the Federal Government provided about $2,945m. in additional assistance.

During the academic year 1999–2000, 515,000 foreign students were enrolled in American colleges and universities. The countries with the largest numbers of students in American colleges were: China, 54,500; Japan, 46,900; India, 42,300; South Korea, 41,200; Taiwan, 29,200; Canada, 23,500.

In 1998–99, 130,000 US students were enrolled at colleges and universities abroad. The country attracting the most students from the USA was the United Kingdom, with 27,700.

School enrolment, Oct. 1999, embraced 96·0% of the children who were 5 and 6 years old; 98·7% of the children aged 7–13 years; 98·2% of those aged 14–15, 93·6% of those aged 16–17 and 60·6% of those aged 18–19.

The US National Center for Education Statistics estimates the total enrolment in the autumn of 2000 at all of the country's elementary, secondary and higher educational institutions (public and private) at 68·1m. (67·6m. in the autumn of 1999).

The number of teachers in regular public and private elementary and secondary schools in the autumn of 2000 was expected to increase slightly to about 3,250,000. The average annual salary of public school teachers was $40,600 in 1998–99.

A survey for the 1999 *World Competitiveness Yearbook* showed that well-educated people in the USA are the least likely of any country in the world to emigrate.

Health. Admission to the practice of medicine (for both doctors of medicine and doctors of osteopathic medicine) is controlled in each state by examining boards directly representing the profession and acting with authority conferred by state law. Although there are a number of variations, the usual time now required to complete training is eight years beyond the secondary school with up to three or more years of additional graduate training. Certification as a specialist may require between three and five more years of graduate training plus experience in practice. In Jan. 1999 the estimated number of active physicians (MD and DO—in all forms of practice) in the USA, Puerto Rico and outlying US areas was 756,700 (684,400 in 1994 and 552,700 in 1985).

Dental employment in 1998 numbered 202,000.

Number of hospitals listed by the American Hospital Association in 1999 was 5,890, with 994,000 beds (equivalent to 3·6 beds per 1,000 population). Of the total, 264 hospitals with 55,000 beds were operated by the federal government; 1,197 with 136,000 beds by state and local government; 3,012 with 587,000 beds by non-profit organizations (including church groups); 747 with 107,000 beds were

investor-owned. The categories of non-federal hospitals were (1999): 4,956 short-term general and special hospitals with 830,000 beds; 129 non-federal long-term general and special hospitals with 20,000 beds; 516 psychiatric hospitals with 87,000 beds; 4 tuberculosis hospitals with fewer than 500 beds.

Patient admissions to community hospitals (1999) was 32,359,000; average daily census was 525,500. There were 495·3m. outpatient visits.

Personal health-care costs projected for 1999 totalled $998,200m., distributed as follows: hospital care, $383,200m.; doctors, $221,400m.; nursing-home care, $87,300m.; drugs, $106,100m.; dentists, $53,700m.; medical durables, $14,300m.; home health care, $33,200m.; other personal health care, $32,400m. Total national health expenditure in 1998 (projected) amounted to $1,146·8bn. In 2000 the USA spent 13·0% of its GDP on health—over 2% more than any other leading industrialized nation. Public spending on health amounted to 44·3% of total health spending in 2000 (the lowest percentage of any major industrialized nation). A survey published by the World Health Organization in June 2000 to measure health systems in all of the sovereign countries and find which country has the best overall health care ranked the USA in 37th place.

In 1999, 22·7% of Americans (24·2% of males and 20·9% of females) were smokers, down from a peak of over 40% in 1964. By 1999, 26% of the population were considered obese (having a body mass index over 30), compared to 14·5% in the late 1970s.

Welfare. Social welfare legislation was chiefly the province of the various states until the adoption of the Social Security Act of 14 Aug. 1935. This as amended provides for a federal system of old-age, survivors and disability insurance; health insurance for the aged and disabled; supplemental security income for the aged, blind and disabled; federal state unemployment insurance; and federal grants to states for public assistance (medical assistance for the aged and aid to families with dependent children generally and for maternal and child health and child welfare services).

Legislation of Aug. 1996 began the transfer of aid administration back to the states, restricted the provision of aid to a maximum period of five years, and abolished benefits to immigrants (both legal and illegal) for the first five years of their residence in the USA. The Social Security Administration (formerly part of the Department of Health and Human Services but an independent agency since March 1995) has responsibility for a number of programmes covering retirement, disability, Medicare, Supplemental Security Income and survivors. The Administration for Children and Families (ACF), an agency of the Department of Health and Human Services, is responsible for federal programmes which promote the economic and social wellbeing of families, children, individuals and communities. ACF has federal responsibility for the following programmes: Temporary Assistance for Needy Families; low income energy assistance; Head Start; child care; child protective services; and a community services block grant. The ACF also has federal responsibility for social service programmes for children, youth, native Americans and persons with developmental disabilities.

The Administration on Aging (AoA), an agency in the US Department of Health and Human Services, is one of the nation's largest providers of home- and community-based care for older persons and their caregivers. Created in 1965 with the passage of the Older Americans Act (OAA), AoA is part of a federal, state, tribal and local partnership called the National Network on Aging. It serves about 7m. older persons and their caregivers, and consists of 56 State Units on Aging, 655 Area Agencies on Aging, 236 Tribal and Native organizations, 2 organizations that serve Native Hawaiians, 29,000 service providers and thousands of volunteers. These organizations provide assistance and services to older individuals and their families in urban, suburban, and rural areas throughout the USA.

The Health Care Financing Administration, an agency of the Health and Human Services Department, has federal responsibility for health insurance for the aged and disabled. Unemployment insurance is the responsibility of the Department of Labor.

In 1999 an average of 2,512,000 families (6,722 recipients) were receiving payments under Temporary Assistance for Needy Families. Total payments under

Temporary Assistance for Needy Families were $22,585m. in 1999. The role of Child Support Enforcement is to ensure that children are supported by their parents. Money collected is for children who live with only one parent because of divorce, separation or out-of-wedlock birth. In 1999 approximately $15,843m. was collected on behalf of these children.

The Social Security Act provides for protection against the cost of medical care through Medicare, a two-part programme of health insurance for people age 65 and over, people of any age with permanent kidney failure, and for certain disabled people under age 65 who receive Social Security disability benefits. In 2000 payments totalling $130,284m. were made under the hospital portion of Medicare. During the same period, $88,991m. was paid under the voluntary medical insurance portion of Medicare. A total of 29·6m. people received Medicare payments in 1998.

In 2000 about 44·3m. beneficiaries were on the rolls; the average paid to a retired worker (not counting any benefits paid to his/her dependants) in 2000 was $845 per month. Full retirement benefits are now payable at age 65, with reduced benefits available as early as age 62. Beginning in 2000, the age for full retirement benefits will gradually increase until it reaches 67 in 2027. In 1995 the average actual retirement age for males was 63.

Medicaid is a jointly-funded, Federal-State health insurance programme for certain low-income and needy people. It covers 36m. individuals including children, the aged, blind, and/or disabled, and people who are eligible to receive federally-assisted income maintenance payments.

In Dec. 1999, 6·56m. persons were receiving Supplementary Security Income payments. 1,308,000 old-age persons received $4,725m. in benefits; 79,000 blind people received $391m.; and 5,169,000 disabled people received $25,772m. Payments, including supplemental amounts from various states, totalled $30,959m. in 1999.

In 1998 a total of $391,733m. was spent on cash and non-cash benefits (such as food stamps) for persons with limited incomes. In 2000 the food stamp programme helped 17,163,000 persons at a cost of $14,985m.; and 27,200,000 persons received help from the national school lunch programme at a cost of $5,489m.

CULTURE

Broadcasting. The licensing agency for broadcasting stations is the Federal Communications Commission, an independent federal body composed of five Commissioners appointed by the President. Its regulatory activities comprise: allocation of spectrum space; consideration of applications to operate individual stations; and regulation of their operations. In 1996 there were 12,313 commercial radio stations, 1,174 commercial TV stations, 352 non-commercial TV stations and 11,119 cable TV systems. Programming is targeted to appeal to a given segment of the population or audience taste. There are five national TV networks (three commercial; colour by NTSC) with 46 national cable networks. All major cities have network affiliates and additional commercial stations.

Legislation on the media and telecommunications of 1996 came into force on 31 March 1999 deregulating the market while preserving safeguards against over-concentration of individual ownership: a single company may not control a network reaching more than 35% of TV viewers, or produce a newspaper and a television service in the same market. Local companies are now permitted to operate long-distance telephone services and also cable TV services.

Broadcasting to countries abroad is conducted by The Voice of America, which functions under a seven-member council nominated by the President and reviewed by Congress. Voice of America has an annual audience of 94m. and broadcasts in over 50 languages.

In 1997 there were 575m. radio receivers in use, equivalent to 2,116 per 1,000 inhabitants. No other country averaged more than 1,500 radios per 1,000. There were 219m. TV receivers in use in 1997, equivalent to 806 per 1,000 inhabitants (a rate exceeded only in Bermuda). In 1999 there were 66·7m. cable TV subscribers.

Cinema. In Jan. 1994 there were 25,737 screens, including 850 drive-ins; gross box office receipts came to US$5·25bn. 628 full-length films were made in 1999. An estimated 66% of adults went to the cinema in 1997.

Press. In 2000 there were 1,480 daily newspapers with a combined daily circulation of 55·8m., the second highest in the world behind Japan. There were 766 morning papers and 727 evening papers, plus 917 Sunday papers (circulation, 59·4m.). Unlike Japan, where circulation is rising, in the USA it has fallen since 1985, when daily circulation was 62·8m. The most widely read newspapers are *USA Today* (average daily circulation in March 2001 of 1·85m.), followed by the *Wall Street Journal* (1·82m.) and the *New York Times* (1·16m.).

Books published in 1998 totalled 120,244, of which 14,645 were sociology and economics, 11,016 fiction, 9,195 juvenile and 9,103 technology.

Tourism. In 1999 the USA received 48,491,000 visitors, of whom 14,110,000 were from Canada and 9,915,000 from Mexico. 23% of all tourists were from Europe. Only France and Spain received more tourists than the USA in 1999.

In 1999 visitors to the USA spent approximately $74,448m. (excluding transportation paid to US international carriers). The USA has the highest annual revenue from tourists of any country (more than twice as much as Spain, which received the second most in 1999). Expenditure by US travellers in foreign countries for 1999 was an estimated $59,331m. (excluding transportation paid to foreign flag international carriers).

Festivals. There are major opera festivals at Glimmerglass, New York (July–Aug.), Santa Fe, New Mexico (June–Aug.) and Seattle, Washington (Aug.). Among the many famous film festivals are the Sundance Film Festival in Jan. and the New York Film Festival in late Sept./early Oct.

Museums and Galleries. Among the most famous museums are the National Gallery in Washington, D.C., the Museum of Fine Arts in Boston, the Metropolitan Museum, the Guggenheim Museum, and the Museum of Modern Art, all in New York, and the Museum of Art in Philadelphia. In 1997, 35% of US adults visited an art museum at least once.

STATES AND TERRITORIES

GENERAL DETAILS

Against the names of the Governors, Lieut.-Governors and the Secretaries of State, (D.) stands for Democrat and (R.) for Republican.

Figures for the revenues, expenditures and debt outstanding of the various states are those of the Federal Bureau of the Census, which takes the original state figures and arranges them on a common pattern so that those of one state can be compared with those of any other.

ALABAMA

KEY HISTORICAL EVENTS

The early European explorers were Spanish, but the first permanent European settlement was French, as part of French Louisiana after 1699. During the 17th and 18th centuries the British, Spanish and French all fought for control of the territory; it passed to Britain in 1763 and thence to the USA in 1783, except for a Spanish enclave on Mobile Bay, which lasted until 1813. Alabama was organized as a Territory in 1817 and was admitted to the Union as a state on 14 Dec. 1819.

The economy was then based on cotton, grown in white-owned plantations by black slave labour imported since 1719. Alabama seceded from the Union at the beginning of the Civil War (1861) and joined the Confederate States of America; its capital Montgomery became the Confederate capital. After the defeat of the Confederacy the state was re-admitted to the Union in 1878. Attempts made during the reconstruction period to find a role for the newly freed black slaves—who made up about 50% of the population—largely failed, and when whites regained political control in the 1870s a strict policy of segregation came into force. At the same time Birmingham began to develop as an important centre of iron- and steel-making. Most of the state was still rural. In 1915 a boll-weevil epidemic attacked the cotton and forced diversification into other farm produce. More industries developed from the power schemes of the Tennessee Valley Authority in the 1930s. The black population remained mainly rural, poor and without political power, until the 1960s when confrontations on the issue of civil rights produced reforms.

TERRITORY AND POPULATION

Alabama is bounded in the north by Tennessee, east by Georgia, south by Florida and the Gulf of Mexico and west by Mississippi. Land area, 50,744 sq. miles (131,426 sq. km). Census population, 1 April 2000, 4,447,100 (55·4% urban), an increase of 10·1% since 1990; July 2002 estimate, 4,486,508.

Population in five census years was:

	White	*Black*	*Indian*	*Asiatic*	*Total*	*Per sq. mile*
1930	1,700,844	944,834	465	105	2,646,248	51·3
			All others			
1970	2,533,831	903,467	6,867		3,444,165	66·7
1980	2,872,621	996,335	24,932		3,893,888	74·9
1990	2,975,797	1,020,705	44,085		4,040,587	79·6
2000	3,162,808	1,155,930	128,362		4,447,100	87·6

Of the total population in 2000, 2,300,596 were female, 3,323,678 were 18 years old or older and 2,462,673 were urban. In 2000 the Hispanic population was 75,830, up from 24,629 in 1990 (an increase of 207·9%).

The large cities (2000 census) were: Birmingham, 242,820 (metropolitan area, 921,106); Montgomery (the capital), 201,568 (333,055); Mobile, 198,905 (540,258); Huntsville, 158,216 (342,376); Tuscaloosa, 77,906 (164,875).

SOCIAL STATISTICS

Births, 2000, 63,166 (14·2 per 1,000 population); deaths, 44,967 (10·1); infant deaths (under 1 year), 594 (9·4 per 1,000 live births); marriages, 47,087 (10·6); divorces, 24,630 (5·5).

ALASKA

KEY HISTORICAL EVENTS

Discovered in 1741 by Vitus Bering, Alaska's first settlement, on Kodiak Island, was in 1784. The area known as Russian America with its capital (1806) at Sitka was ruled by a Russo-American fur company and vaguely claimed as a Russian colony. Alaska was purchased by the United States from Russia under the treaty of 30 March 1867 for $7·2m. Settlement was boosted by gold workers in the 1880s. In 1884 Alaska became a 'district' governed by the code of the state of Oregon. By Act of Congress approved 24 Aug. 1912 Alaska became an incorporated Territory; its first legislature in 1913 granted votes to women, seven years in advance of the Constitutional Amendment.

During the Second World War the Federal government acquired large areas for defence purposes and for the construction of the strategic Alaska Highway. In the 1950s oil was found. Alaska became the 49th state of the Union on 3 Jan. 1959. In the 1970s new oilfields were discovered and the Trans-Alaska pipeline was opened in 1977. The state obtained most of its income from petroleum by 1985.

Questions of land-use predominate; there are large areas with valuable mineral resources, other large areas held for the native peoples and some still held by the Federal government. The population increased by over 400% between 1940 and 1980.

TERRITORY AND POPULATION

Alaska is bounded north by the Beaufort Sea, west and south by the Pacific and east by Canada. The total area is 663,267 sq. miles (1,717,854 sq. km), making it the largest state of the USA; 571,951 sq. miles (1,481,346 sq. km) are land and 91,316 sq. miles (236,507 sq. km) are water. It is also the least densely populated state. Census population, 1 April 2000, was 626,932, an increase of 14·0% over 1990; July 2002 estimate, 643,786.

Population in five census years was:

	White	*Black*	*All Others*	*Total*	*Per sq. mile*

Of the total population in 2000, 324,1212 were male, 436,215 were 18 years old or older and 411,257 were urban. Alaska's Hispanic population was 24,795 in 2000, up from 17,803 in 1990.

The largest county equivalent and city is in the borough of Anchorage, which had a 2000 census population of 260,283. Census populations of the other 14 county equivalents, 2000: Fairbanks North Star, 82,840; Matanuska-Susitna 59,322; Kenai Peninsula, 49,691; Juneau, 30,711; Bethel, 16,006; Ketchikan Gateway, 14,070; Kodiak Island, 13,913; Valdez-Cordova, 10,195; Nome, 9,196; Sitka, 8,835; North Slope, 7,385; Northwest Arctic, 7,208; Wade Hampton, 7,028; Wrangell-Petersburg, 6,684. CONSTITUTION AND GOVERNMENT

The state has the right to select 103·55m. acres of vacant and unappropriated public lands in order to establish "a tax basis"; it can open these lands to prospectors for minerals, and the state is to derive the principal advantage in all gains resulting from the discovery of minerals. In addition, certain federally administered lands reserved for conservation of fisheries and wild life have been transferred to the state. Special provision is made for federal control of land for defence in areas of high strategic importance.

The constitution of Alaska was adopted by public vote, 24 April 1956. The state legislature consists of a Senate of 20 members (elected for four years) and a House of Representatives of 40 members (elected for two years).

For the 108th Congress, which convened in Jan. 2003, Alaska sends one member to the House of Representatives. It is represented in the Senate by Ted Stevens (R. 1968–2009) and Lisa Murkowski (R. 2002–05). The franchise may be exercised by all citizens over 18.

The capital is Juneau.

Agriculture. In some parts of the state the climate during the brief spring and summer (about 100 days in major areas and 152 days in the southeastern coastal area) is suitable for agricultural operations, thanks to the long hours of sunlight, but Alaska is a food-importing area. In 2000 there were 580 farms covering a total of 920,000 acres. The average farm had 1,586 acres in 2000.

Total value of agricultural products in 1994: $27,766,000 of which $2,828,000 was from feed crops, $2,738,000 from vegetables (including potatoes), $6·1m. from livestock and poultry, $2,465,000 from dairy products and $15,833,000 from greenhouse and nursery industries. Net income from farms in 1996 was $10m.

At 1 Jan. 1995 there were 9,900 cattle and calves and 1,700 sheep and lambs; at 1 Dec. 1994, 2,000 hogs and pigs and 2,000 poultry. There were about 33,000 reindeer in western Alaska in 1994. Sales of reindeer meat and by-products in 1994 were valued at $1,366,000.

The interior forest covers 115m. acres; more than 13m. acres are considered commercial forest, of which 3·4m. acres are in designated parks or wilderness and unavailable for harvest. The coastal rain forests provide the bulk of commercial timber volume; of their 13·6m. acres, 7·6m. acres support commercial stands, of which 1·9m. acres are in parks or wilderness and unavailable for harvest. In 1992, 590m. bd ft of timber were harvested from private land for a total value of $548·9m., and in 1993, 9·38m. bd ft from state land for $342·6m.

There are 624 designated wilderness areas throughout the USA, covering a total of 104m. acres (42m. ha). Nearly 56% of the system is in Alaska (58·18m acres or 23·54m. ha).

Fisheries. The catch for 1993 was 2·7m. lb of fish and shellfish having a value to fishermen of $905m. The most important species are salmon, crab, herring, halibut and pollock.

Rail. There is a railway of 111 miles from Skagway to the town of Whitehorse, the White Pass and Yukon route, in the Canadian Yukon region (this service operates seasonally). The government-owned Alaska Railroad runs from Seward to Fairbanks, a distance of 471 miles. This is a freight service with only occasional passenger use. A passenger service operates from Anchorage to Fairbanks via Denali National Park in the tourist season.

Civil Aviation. Alaska's largest international airports are Anchorage and Fairbanks. In 1999 Alaska Airlines flew 209·2m. km, carrying 13,604,000 passengers (1,530,300 on international flights). There were 2,710,848 passenger enplanements statewide in 1999. General aviation aircraft in the state per 1,000 population is about 10 times the US average.

Shipping. Regular shipping services to and from the USA are furnished by two steamship and several barge lines operating out of Seattle and other Pacific coast ports. A Canadian company also furnishes a regular service from Vancouver, BC. Anchorage is the main port.

A 1,435 nautical-mile ferry system for motor cars and passengers (the 'Alaska Marine Highway') operates from Bellingham, Washington and Prince Rupert (British Columbia) to Juneau, Haines (for access to the Alaska Highway) and Skagway. A second system extends throughout the south-central region of Alaska linking the Cook Inlet area with Kodiak Island and Prince William Sound.

ARIZONA

KEY HISTORICAL EVENTS

Spaniards looking for sources of gold or silver entered Arizona in the 16th century, finding there people from several Native American groups, including Tohono O'odham, Navajo, Hopi and Apache. The first Spanish Catholic mission was founded in the early 1690s by Father Eusebio Kino, settlements were made in 1752 and a Spanish army headquarters was set up at Tucson in 1776. The area was governed by Mexico after the collapse of Spanish colonial power. Mexico ceded it to the USA in the Treaty of Guadelupe Hidalgo after the Mexican-American war (1848). Arizona was then part of New Mexico; the Gadsen Purchase (of land south of the Gila River) was added to it in 1853. The whole was organized as the Arizona Territory on 24 Feb. 1863.

Miners and ranchers began settling in the 1850s. Conflicts between Indian and immigrant populations intensified when troops were withdrawn to serve in the Civil War. The Navajo surrendered in 1865, but the Apache continued to fight, under Geronimo and other leaders, until 1886. Arizona was admitted to the Union as the 48th state in 1912.

Large areas of the state have been retained as Indian reservations and as parks to protect the exceptional desert and mountain landscape. In recent years this landscape and the Indian traditions have been used to attract tourist income.

TERRITORY AND POPULATION

Arizona is bounded north by Utah, east by New Mexico, south by Mexico, west by California and Nevada. Land area, 113,634 sq. miles (294,313 sq. km). Of the total area in 1992, 28% was Indian Reservation, 17% was in individual or corporate ownership, 19% was held by the US Bureau of Land Management, 15% by the US Forest Service, 13% by the State and 8% by others. Census population on 1 April 2000 was 5,130,632, an increase of 40·0% over 1990. July 2002 estimate, 5,456,453. The rate of Arizona's population increase during the 1990s was the second fastest in the USA, at 40%. Nevada is the only state to have had faster growth.

ARKANSAS

KEY HISTORICAL EVENTS

In the 16th and 17th centuries French and Spanish explorers entered Arkansas, finding there tribes of Chaddo, Osage and Quapaw. The first European settlement was French, at Arkansas Post in 1686, and the area became part of French Louisiana. The USA bought Arkansas from France as part of the Louisiana Purchase in 1803, it was organized as a Territory in 1819 and entered the Union on 15 June 1836 as the 25th state.

The eastern plains by the Mississippi were settled by white plantation-owners who grew cotton with black slave labour. The rest of the state attracted a scattered population of small farmers. The plantations were the centre of political power. Arkansas seceded from the Union in 1861 and joined the Confederate States of America. At that time the slave population was about 25% of the total.

In 1868 the state was re-admitted to the Union. Attempts to integrate the black population into state life achieved little, and a policy of segregation was rigidly adhered to until the 1950s. In 1957 federal authorities ordered that high school segregation must end. The state governor called on the state militia to prevent desegregation; there was rioting, and federal troops entered Little Rock, the capital, to restore order. It was another ten years before school segregation finally ended.

The main industrial development followed the discovery of large reserves of bauxite.

CALIFORNIA

KEY HISTORICAL EVENTS

There were many small Indian tribes, but no central power, when the area was discovered in 1542 by the Spanish navigator Juan Cabrillo. The Spaniards did not begin to establish missions until the 18th century, when the Franciscan friar Junipero Serra settled at San Diego in 1769. The missions became farming and ranching villages with large Indian populations. When the Spanish empire collapsed in 1821, the area was governed from newly independent Mexico.

The first wagon-train of American settlers arrived from Missouri in 1841. In 1846, during the war between Mexico and the USA, Americans in California proclaimed it to be part of the USA. The territory was ceded by Mexico on 2 Feb. 1848 and became the 31st state of the Union on 9 Sept. 1850.

Gold was discovered in 1848–49 and there was an immediate influx of population. The state remained isolated, however, until the development of railways in the 1860s. From then on the population doubled on average every 20 years. The sunny climate attracted fruit-growers, market-gardeners and wine producers. In the early 20th century the bright lights and cheap labour attracted film-makers to Hollywood, Los Angeles.

Southern California remained mainly agricultural with an Indian or Spanish-speaking labour force until after the Second World War. Now more than 90% of the population is urban, with the main manufacture being hi-technology equipment, much of it for the aerospace, computer and office equipment industries.

TERRITORY AND POPULATION

Land area, 155,959 sq. miles (403,932 sq. km). Census population, 1 April 2000, 33,871,648, an increase of 4,111,627, or 13·8%, over 1990. July 2002 estimate, 35,116,033, an increase of 1·74% from 2001. The growth rate reflects continued high though somewhat reduced natural increase (excess of births over deaths) as well as substantial net immigration.

California has the largest Hispanic population of any state in the USA in terms of numbers and the second largest in terms of percentage of population. In 2000 there were 10,966,556 Hispanics living in California (32·4% of the overall population), representing a rise of 3,278,618 since 1990, the largest numeric rise of any state over the same period. By 2015 Hispanics are projected to form a majority.

Budget. For the year ending 30 June 2002, total state revenues were $82·9bn. Total expenditures were $96·2bn. (education, $40·4bn.; health and human services, $26·5bn.; youth and adult corrections, $5·7bn.). Debt outstanding (2002) $25·3bn.

Performance. California's economy, the largest among the 50 states and one of the largest in the world, has major components in high technology, trade, entertainment,

agriculture, manufacturing, tourism, construction and services. California experienced an economic recession in 2001 and a sluggish recovery in 2002, with greatest impacts in the high technology sector. The economy improved in the first half of 2002, with employment and total state personal income posting gains. The improvement had faltered by the middle of the year, however, and the economy was sluggish in the second half of 2002, with unemployment varying narrowly between 6·4% and 6·6% and employment faltering by about 28,000. If California were a country in its own right it would be the world's fifth largest economy, after the USA, Japan, Germany and the United Kingdom. 2000 Gross State Product was $1,344,623m., representing more than 13% of the USA's total GDP. Taxable sales in 2001 totalled $441,518m.

Banking and Finance. In 1997 there were 9,796 establishments of depository institutions which included 5,740 commercial banks, 2,626 savings institutions and 1,306 credit unions.

In 2001 savings and loan associations had deposits of $169,637m. Total mortgage loans were $243,326m. On 31 Dec. 2001 all insured commercial banks had demand deposits of $45,428m. and time and savings deposits of $197,217m. Total loans reached $241,927m., of which real-estate loans were $145,732m.

ENERGY AND NATURAL RESOURCES

Electricity. Californians spent $20bn. on electricity in 1999. Total consumption amounted to 260,936m. kWh. 75% of electricity is derived from in-state resources. In Jan. 2001 Governor Gray Davis announced a state of emergency after power shortages led to a series of blackouts.

Oil and Gas. California is the nation's 4th largest oil producing state. Total onshore and offshore production was 261m. bbls. in 2001. California ranks 10th out of US states for the production of natural gas. Net natural gas production in 2001 was 338bn. cu. ft.

Water. The total area covered by water is approximately 2,895 sq. miles. Water quality is judged to be good along 83% of the 960 miles of assessed coastal shoreline.

Minerals. Gold output was 13,972 kg in 2001. Asbestos, boron minerals, diatomite, sand and gravel, lime, salt, magnesium compounds, clays, cement, silver, gypsum and iron ore are also produced.

In 2001 California ranked 1st among the states in non-fuel mineral production, accounting for more than 8% of the US total. The value of non-fuel minerals produced (2001) was $3·27bn.; the mining industry employed around 24,000 persons in 2001 (compared to 48,000 in the early 1980s).

Agriculture. California is the most diversified agricultural economy in the world, producing more than 350 agricultural commodities. In 2001 California led the nation in the production of more than 75 agricultural products. There were some 88,000 farms, comprising 28m. acres; average farm, 315 acres. Agricultural production and gross cash income in 2001 increased to $27·6bn., 1% more than the previous year but fractionally less than the record income set in 1997. Nuts and fruit remained the most significant cash crop (2001), accounting for 41% of the nation's total fruit and nut production and 26% of the state's gross agricultural income. Livestock and poultry accounted for 27%; vegetables, 22%; field crops, 9%; nursery, greenhouse products and floriculture, 11%. The state's leading billion-dollar agricultural products included milk and cream with receipts of $4·63bn.; grapes, $2·65bn.; nursery products, $2·09bn.; lettuce, $1·37bn.; cattle and calves, $1·35bn.; hay, $1·02bn.

Production of cotton lint, 2000, was 578,200 short tons; other field and seed crops included (in 1m. short tons): hay and alfalfa, 9; sugarbeet, 2; rice, 1·9; wheat, 1·1. Principal fruit, nut and vegetable crops in 2001 (in 1,000 short tons): tomatoes, 9,183; wine, table and raisin grapes, 5,962; lettuce, 3,623; oranges, 2,044; lemons, 859; almonds, 415; grapefruit, 211.

In 2001 there were 1·6m. milch cows; 5·2m. all cattle and calves; 0·84m. sheep and lambs; and 0·15m. hogs and pigs.

Forestry. There are about 16·6m. acres of productive forest land, from which about 2,900m. bd ft are harvested annually. Total value of timber harvest, 2000, $909m ($764m. in 1999). Lumber production, 2001, 1,603m. bd ft.

Fisheries. The catch in 2001 was 443m. lb; leading species in landings were squid, sardine, anchovy, mackerel, urchin, tuna, sole, herring, whiting and crab.

INDUSTRY

In 2002 the fastest-growing industries were in public and private education, retail trade, health services, social services, management consulting and engineering. The continuing high technology slump made high technology business services and manufacturing the leading job-losing sectors. The manufacturing sector employed 1,816,608 people in 2002, including 242,025 in the field of electronic equipment, 264,275 in industrial machinery and 184,608 in food and similar products.

Labour. In 2002 the civilian labour force was 17·6m., of whom 16·5m. were employed. A total of 38,408 jobs were lost during 2002, led by electronic equipment manufacturing, computer-related services and computer and office equipment manufacturing. By the end of 2002 unemployment had risen to 6·6% from 6·1% a year earlier.

INTERNATIONAL TRADE

Imports and Exports. Estimated foreign trade through Californian ports totalled $341bn. in 2001. Exports of made-in-California goods slowed in 2001 as the global economy slipped into recession. Exports to all but five of California's top 25 trading partners declined during 2001. High technology goods dominate California's exports, comprising almost three-quarters of all made-in-California exports. Electronic components and computers account for almost half of total exports. Even though exports of other commodities grew almost 4% during 2001 the reduction of high technology exports was great enough to cause a 10·8% overall drop.

Total agricultural exports for 2000 were $6·6bn. California's top markets are Canada, Japan, Mexico, South Korea, UK, Taiwan, Hong Kong, Germany, Netherlands and Spain.

COMMUNICATIONS

Roads. In 2001 California had 71,131 miles of roads inside cities and 97,678 miles outside. There were about 19·7m. registered cars and about 6·4m. commercial vehicles. Motor vehicle collision fatalities in 2001 were 3,926.

Rail. In addition to Amtrak's long-distance trains, local and medium-distance passenger trains run in the San Francisco Bay area sponsored by the California Department of Transportation, and a network of commuter trains around Los Angeles opened in 1992. There are metro and light rail systems in San Francisco and Los Angeles, and light rail lines in Sacramento, San Diego and San Jose.

Civil Aviation. In 1996 there were a total of 933 public and private airports, heliports, stolports and seaplane bases.

A total of 61,606,253 passengers (15,950,228 international; 45,656,025 domestic) embarked/disembarked at Los Angeles airport in 2001. It handled approximately 1,779,065 tonnes of freight (931,092 international; 847,972 domestic). At San Francisco airport, in 2001, 34,632,474 passengers (7,539,723 international; 26,404,659 domestic) embarked/disembarked, and 517,124 tonnes of freight (325,224 tonnes international; 191,900 tonnes domestic) were handled.

An individual recipient may own assets up to $2,000; a couple up to $3,000, subject to specific exclusions. In 2000–01 fiscal year an average of 87,935 cases per month were receiving an average of $233·00 in assistance in the general relief programme.

COLORADO

KEY HISTORICAL EVENTS

Spanish explorers claimed the area for Spain in 1706; it was then the territory of the Arapaho, Cheyenne, Ute and other Plains and Great Basin Indians. Eastern Colorado, the hot, dry plains, passed to France in 1802 and then to the USA as part of the Louisiana Purchase in 1803. The rest remained Spanish, becoming Mexican when Spanish power in the Americas ended. In 1848, after war between Mexico and the USA, Mexican Colorado was ceded to the USA. A gold rush in 1859 brought a great influx of population, and in 1861 Colorado was organized as a Territory.

The Territory officially supported the Union in the Civil War of 1861–65, but its settlers were divided and served on both sides.

Colorado became a state in 1876. Mining and ranching were the mainstays of the economy. In the 1920s the first large projects were undertaken to exploit the Colorado River. The Colorado River Compact was agreed in 1922, and the Boulder Dam (now Hoover Dam) was authorized in 1928. Since then irrigated agriculture has overtaken mining as an industry and is as important as ranching. In 1945 the Colorado-Big Thompson project diverted water by tunnel beneath the Rocky Mountains to irrigate 700,000 acres (284,000 ha) of northern Colorado. Now more than 80% of the population is urban, with the majority engaged in telecommunications, aerospace and computer technology.

TERRITORY AND POPULATION

Colorado is bounded north by Wyoming, northeast by Nebraska, east by Kansas, southeast by Oklahoma, south by New Mexico and west by Utah. Land area, 103,718 sq. miles (268,628 sq. km).

Qualified as electors are all citizens, male and female (except convicted, incarcerated criminals), 18 years of age, who have resided in the state and the precinct for 32 days immediately preceding the election. There is a seven-member State Supreme Court.

For the 108th Congress, which convened in Jan. 2003, Colorado sends seven members to the House of Representatives. It is represented in the Senate by Ben Campbell (R. 1993–2005) and Wayne Allard (R. 1997–2009).

CONNECTICUT

KEY HISTORICAL EVENTS

Formerly territory of Algonquian-speaking Indians, Connecticut was first colonized by Europeans during the 1630s, when English Puritans moved there from Massachusetts Bay. Settlements were founded in the Connecticut River Valley at Hartford, Saybrook, Wethersfield and Windsor in 1635. They formed an organized commonwealth in 1637. A further settlement was made at New Haven in 1638 and was united to the commonwealth under a royal charter in 1662. The charter confirmed the commonwealth constitution, drawn up by mutual agreement in 1639 and called the Fundamental Orders of Connecticut.

The area was agricultural and its population of largely English descent until the early 19th century. After the War of Independence Connecticut was one of the original 13 states of the Union. Its state constitution came into force in 1818 and survived with amendment until 1965 when a new one was adopted.

In the early 1800s a textile industry was established using local water power. By 1850 the state had more employment in industry than in agriculture, and immigration from the continent of Europe (and especially from southern and eastern Europe) grew rapidly throughout the 19th century. Some immigrants worked in whaling and iron-mining, but most sought industrial employment. Settlement was spread over a large number of small towns, with no single dominant culture.

Yale University was founded at New Haven in 1701. The US Coastguard Academy was founded in 1876 at New London, a former whaling port.

TERRITORY AND POPULATION

Connecticut is bounded in the north by Massachusetts, east by Rhode Island, south by the Atlantic and west by New York. Land area, 4,845 sq. miles (12,548 sq. km).

Census population, 1 April 2000, 3,405,565, an increase of 3·6% since 1990. July 2002 estimate, 3,460,503.

Population in five census years was:

	White	*Black*	*Indian*	*Asian*	*Total*	*Per sq. mile*

DELAWARE

KEY HISTORICAL EVENTS

Delaware was the territory of Algonquian-speaking Indians who were displaced by European settlement in the 17th century. The first settlers were Swedes who came in 1638 to build Fort Christina (now Wilmington), and colonize what they called New Sweden. Their colony was taken by the Dutch from New Amsterdam in 1655. In 1664 the British took the whole New Amsterdam colony, including Delaware, and called it New York.

In 1682 Delaware was granted to William Penn, who wanted access to the coast for his Pennsylvania colony. Union of the two colonies was unpopular, and Delaware gained its own government in 1704, although it continued to share a royal governor with Pennsylvania until the War of Independence. Delaware then became one of the 13 original states of the Union and the first to ratify the federal constitution (on 7 Dec. 1787).

The population was of Swedish, Finnish, British and Irish extraction. The land was low-lying and fertile, and the use of slave labour was legal. There was a significant number of black slaves, but Delaware was a border state during the Civil War (1861–65) and did not leave the Union.

19th-century immigrants were mostly European Jews, Poles, Germans and Italians. The north became industrial and densely populated, more so after the Second World War with the rise of the petrochemical industry. Industry in general profited from the opening of the Chesapeake and Delaware Canal in 1829; it was converted to a toll-free deep channel for ocean-going ships in 1919.

DISTRICT OF COLUMBIA

KEY HISTORICAL EVENTS

The District of Columbia, organized in 1790, is the seat of the government of the USA, for which the land was ceded by the states of Maryland and Virginia to the USA as a site for the national capital. It was established under Acts of Congress in 1790 and 1791. Congress first met in it in 1800 and federal authority over it became

vested in 1801. In 1846 the land ceded by Virginia (about 33 sq. miles) was given back.

TERRITORY AND POPULATION

The District forms an enclave on the Potomac River, where the river forms the southwest boundary of Maryland. The land area of the District of Columbia is 61 sq. miles (159 sq. km).

Census population, 1 April 2000, was 572,059 (100% urban), a decrease of 5·72% from that of 1990. July 2002 estimate, 570,898. Metropolitan area of Washington, D.C.–Baltimore (2000), 7,608,070. The Hispanic population in 2000 was 44,953, up from 32,710 in 1990 (an increase of 37·4%). Of the total population in 2000, 302,693 were female and 457,067 were 18 years old or older.

Marriages (1997), 3,800 (7·3 per 1,000 population in 1995); divorces, 1,200 (1997), 2·3. The abortion rate, at 68·1 for every 1,000 women in 2000, is the highest of any US state.

CLIMATE

Washington, Jan. 34°F (1·1°C), July 77°F (25°C). Annual rainfall 43" (1,064 mm). The District of Columbia belongs to the Atlantic Coast climate zone (*see* UNITED STATES: Climate).

CONSTITUTION AND GOVERNMENT

Local government, from 1 July 1878 until Aug. 1967, was that of a municipal corporation administered by a board of three commissioners, of whom two were appointed from civil life by the President, and confirmed by the Senate, for a term of three years each. The other commissioner was detailed by the President from the Engineer Corps of the Army. The Commission form of government was abolished in 1967 and a new Mayor Council instituted with officers appointed by the President with the advice and consent of the Senate. On 24 Dec. 1973 the appointed officers were replaced by an elected Mayor and councillors, with full legislative powers in local matters as from 1974. Congress retains the right to legislate, to veto or supersede the Council's acts. The 23rd amendment to the federal constitution (1961) conferred the right to vote in national elections. The District has two delegates in Congress who may vote in committees but not on the House floor.

RECENT ELECTIONS

In the 2000 presidential election Gore polled 171,923 votes; Bush, 18,073; Nader, 10,576.

ENERGY AND NATURAL RESOURCES

Water. The total area covered by water is approximately 7 sq. miles.

Justice. The death penalty was declared unconstitutional in the District of Columbia on 14 Nov. 1973. In June 2000 there were 8,575 federal and state prisoners.

The District's Court system is the Judicial Branch of the District of Columbia. It is the only completely unified court system in the United States, possibly because of the District's unique city-state jurisdiction. Until the District of Columbia Court Reform and Criminal Procedure Act of 1970, the judicial system was almost entirely in the hands of Federal government. Since that time, the system has been similar in most respects to the autonomous systems of the states.

Religion. The largest churches are the Protestant and Roman Catholic Christian churches; there are also Jewish, Eastern Orthodox and Islamic congregations.

Education. In 1996 there were an estimated 105,700 pupils enrolled at elementary and secondary public schools. Average expenditure per pupil in 1997 was $8,167.

FLORIDA

KEY HISTORICAL EVENTS

There were French and Spanish settlements in Florida in the 16th century, of which the Spanish, at St Augustine in 1565, proved permanent. Florida was claimed by Spain until 1763 when it passed to Britain. Although regained by Spain in 1783, the British used it as a base for attacks on American forces during the war of 1812. Gen. Andrew Jackson captured Pensacola for the USA in 1818. In 1819 a treaty was signed which ceded Florida to the USA with effect from 1821 and it became a Territory of the USA in 1822.

Florida had been the home of the Apalachee and Timucua Indians. After 1770 groups of Creek Indians began to arrive as refugees from the European-Indian wars. These 'Seminoles' or runaways attracted other refugees including slaves, the recapture of whom was the motive for the first Seminole War of 1817–18. A second war followed in 1835–42, when the Seminoles retreated to the Everglades swamps. After a third war in 1855–58 most Seminoles were forced or persuaded to move to reserves in Oklahoma.

Florida became a state in 1845. About half of the population were black slaves. At the outbreak of Civil War in 1861 the state seceded from the Union.

During the 20th century Florida continued to grow fruit and vegetables, but real-estate development (often for retirement) and the growth of tourism and the aerospace industry set it apart from other ex-plantation states.

TERRITORY AND POPULATION

Florida is a peninsula bounded in the west by the Gulf of Mexico, south by the Straits of Florida, east by the Atlantic, north by Georgia and northwest by Alabama. GEORGIA

KEY HISTORICAL EVENTS

Originally the territory of Creek and Cherokee tribes, Georgia was first settled by Europeans in the 18th century. James Oglethorpe founded Savannah in 1733, intending it as a colony which offered a new start to debtors, convicts and the poor. Settlement was slow until 1783, when growth began in the cotton-growing areas west of Augusta. The Indian population was cleared off the rich cotton land and moved beyond the Mississippi. Georgia became one of the original 13 states of the Union.

A plantation economy developed rapidly, using slave labour. In 1861 Georgia seceded from the Union and became an important source of supplies for the Confederate cause, although some northern areas never accepted secession and continued in sympathy with the Union during the Civil War. At the beginning of the war 56% of the population were white, descendants of British, Austrian and New England immigrants; the remaining 44% were black slaves.

The city of Atlanta, which grew as a railway junction, was destroyed during the war but revived to become the centre of southern states during the reconstruction period. Atlanta was confirmed as state capital in 1877. Also in Atlanta were developed successive movements for black freedom in social, economic and political life. The Southern Christian Leadership Conference, led by Martin Luther King (assassinated in 1968), was based in King's native city of Atlanta.

HAWAII

KEY HISTORICAL EVENTS

The islands of Hawaii were settled by Polynesian immigrants, probably from the Marquesas Islands, about AD 400. A second major immigration, from Tahiti, occurred around 800–900. In the late 18th century all the islands of the group were united into one kingdom by Kamehameha I. Western exploration began in 1778, and Christian missions were established after 1820. Europeans called Hawaii the Sandwich Islands. The main foreign states interested were the USA, Britain and France. Because of the threat imposed by their rivalry, Kamehameha III placed Hawaii under US protection in 1851. US sugar-growing companies became dominant in the economy and in 1887 the USA obtained a naval base at Pearl Harbour. A struggle developed between forces for and against annexation

by the USA. In 1893 the monarchy was overthrown. The republican government agreed to be annexed to the USA in 1898, and Hawaii became a US Territory in 1900.

The islands and the naval base were of great strategic importance during the Second World War, when the Japanese attack on Pearl Harbour brought the USA into the war.

Hawaii became the 50th state of the Union in 1959. The 19th-century plantation economy encouraged the immigration of workers, especially from China and Japan. Hawaiian laws, religions and culture were gradually adapted to the needs of the immigrant community.

TERRITORY AND POPULATION

The Hawaiian Islands lie in the North Pacific Ocean, between 18° 54' and 28° 15' N. lat. and 154° 40' and 178° 25' W. long., about 2,090 nautical miles southwest of San Francisco. There are 137 named islands and islets in the group, of which 7 major and 5 minor islands are inhabited. Land area, 6,423 sq. miles (16,636 sq. km). Census population, 1 April 2000, 1,211,537, an increase of 9·3% since 1990; density was 188·6 per sq. mile in 1990. July 2002 estimate, 1,244,898. Of the total population in 2000, 608,671 were male, 915,770 were 18 years old or older, and 1,108,225 were urban (91·47%, the fourth most urban state).

The principal islands are Hawaii, 4,028 sq. miles, population 1990, 120,317; Maui, 727 sq. miles, population 91,361; Oahu, 600 sq. miles, population 836,231; Kauai, 552 sq. miles, population 50,947; Molokai, 260 sq. miles, population 6,717; Lanai, 141 sq. miles, population 2,426; Niihau, 70 sq. miles, population 230; Kahoolawe, 45 sq. miles (uninhabited). The capital Honolulu—on the island of Oahu—had a population in 2000 of 371,657, and Hilo—on the island of Hawaii—40,759.

Estimated figures in 1999 for racial groups (excluding persons in institutions or military barracks) were: 252,742 white; 223,193 Hawaiian; 219,855 Japanese; 145,248 Filipinos; 44,787 Chinese; 17,430 black (1998); 13,693 Samoan and Tongan; 11,737 Korean; 95,456 Hispanic; 128,144 all others (1998).

SOCIAL STATISTICS

Births, 1999, were 16,864 (14·2 per 1,000 population); deaths, 8,369 (7·1). Infant deaths, 1998, were at a rate of 6·8 per 1,000 live births. There were 22,873 resident marriages (7·4 per 1,000 population), and divorces and annulments numbered 4,376 (4·1 per 1,000 population) in 1999. Inter-marriage between the races is common. In 1998, 46·3% of marriages were inter-racial. 58·3% were non-resident marriages.

CLIMATE

All the islands have a tropical climate, with an abrupt change in conditions between windward and leeward sides, most marked in rainfall. Temperatures vary little. Average temperatures in Honolulu in 1999: warmest month 81·4°F, coolest month 72·9°F. Annual rainfall in Honolulu (1997) 22·02".

CONSTITUTION AND GOVERNMENT

Hawaii was officially admitted into the United States on 21 Aug. 1959. However, the constitution of the State of Hawaii was created by the 1950 Constitutional Convention, ratified by the voters of the Territory on 7 Nov. 1950, and amended on 27 June 1959. There have been two constitutional conventions since 1950, in 1968 and 1978. In addition to amendments proposed by these conventions the Legislature is able to propose amendments to voters during the general election. This has resulted in numerous amendments.

For the 108th Congress, which convened in Jan. 2003, Hawaii sends two members to the House of Representatives. It is represented in the Senate by Daniel Inouye (D. 1963–2005) and Daniel Akaka (D. 1990–2007).

IDAHO

KEY HISTORICAL EVENTS

The original people of Idaho were Kutenai, Kalispel, Nez Percé and other tribes, living on the Pacific watershed of the northern Rocky Mountains. European exploration began in 1805, and after 1809 there were trading posts and small

settlements, with fur-trapping as the primary economic activity. The area was disputed between Britain and the USA until 1846 when British claims were dropped. In 1860 gold and silver were found, and there was a rush of immigrant prospectors. The newly enlarged population needed organized government. An area including that which is now Montana was created a Territory in March 1863. Montana was separated from it in 1864. Population growth continued, stimulated by refugees from the Confederate states after the Civil War and by settlements of Mormons from Utah.

Fur-trapping and mining gave way to farming, especially of grains, as the main economic activity. Idaho became a state in 1890, with its capital at Boise. The Territory capital, Idaho City, had been a gold-mining boom town in the 1860s whose population (about 40,000 at its height) was the largest in the Pacific Northwest. The population declined to 1,000 by 1869.

During the 20th century the Indian population shrunk to nearly 1%. The Mormon community has grown to include much of southeastern Idaho and more than half the church-going population of the state.

Industrial history has been influenced by the development of the Snake River of southern Idaho for hydro-electricity and irrigation, especially at the American Falls and reservoir. Processing food, minerals and timber are important to the economy. Much of the state, however, remains sparsely populated and rural. Rapid growth of high technology companies in Idaho's metropolitan areas has prompted economic diversification and rapid population growth.

TERRITORY AND POPULATION

Idaho is within the Rocky Mountains and bounded north by Canada, east by Montana and Wyoming, south by Nevada and Utah, west by Oregon and Washington. Land area, 82,747 sq. miles (214,314 sq. km). Census population, 1 April 2000, 1,293,953; an increase of 28·5% since 1990. July 2002 estimate, 1,341,131.

Population in five census years was:

ILLINOIS

KEY HISTORICAL EVENTS

Territory of a group of Algonquian-speaking tribes, Illinois was explored first by the French in 1673. France claimed the area until 1763 when, after the French and Indian War, it was ceded to Britain along with all the French land east of the Mississippi. In 1783 Britain recognized the US' title to Illinois, which became part of the North West Territory of the USA in 1787, and of Indiana Territory in 1800. Illinois became a Territory in its own right in 1809, and a state in 1818.

Settlers from the eastern states moved on to the fertile farmland, immigration increasing greatly with the opening in 1825 of the Erie Canal from New York along which settlers could move west and their produce back east for sale. Chicago was incorporated as a city in 1837 and quickly became the transport, trading and distribution centre of the middle west. Once industrial growth had begun there, a further wave of immigration took place in the 1840s, mainly of European refugees looking for work. This movement continued with varying force until the 1920s, when it was largely replaced by immigration of black work-seekers from the southern states.

During the 20th century the population became largely urban and heavy industry was established along an intensive network of rail and waterway routes. Chicago recovered from a destructive fire in 1871 to become the hub of this network and at one time the second largest American city.

INDIANA

KEY HISTORICAL EVENTS

The area was inhabited by Algonquian-speaking tribes when the first European explorers (French) laid claim to it in the 17th century. They established some fortified trading posts but there was little settlement. In 1763 the area passed to Britain, with other French-claimed territory east of the Mississippi. In 1783 Indiana became part of the North West Territory of the USA; it became a separate territory in 1800 and a state in 1816. Until 1811 there had been continuing conflict with the Indian inhabitants, who were then defeated at Tippecanoe.

Early farming settlement was by families of British and German descent, including Amish and Mennonite communities. Later industrial development offered an incentive for more immigration from Europe, and, later, from the southern states. In 1906 the town of Gary was laid out by the United States Steel Corporation and named after its chairman, Elbert H. Gary. The industry flourished on navigable water midway between supplies of iron ore and of coal. Trade and distribution in general benefited from Indiana Port on Lake Michigan, especially after the opening of the St Lawrence Seaway in 1959. The Ohio River was also exploited for carrying freight.

Indianapolis was built after 1821 and became the state capital in 1825. Natural gas was discovered in the neighbourhood in the late 19th century. This stimulated the growth of a motor industry, celebrated by the Indianapolis 500 race, held annually since 1911.

TERRITORY AND POPULATION

Indiana is bounded west by Illinois, north by Michigan and Lake Michigan, east by Ohio and south by Kentucky across the Ohio River. Land area, 35,867 sq. miles (92,895 sq. km). Census population, 1 April 2000, was 6,080,485, an increase of 9·7% since 1990. July 2002 estimate, 6,159,068.

Population in five census years was:

IOWA

KEY HISTORICAL EVENTS

Originally the territory of the Iowa Indians, the area was explored by the Frenchmen Marquette and Joliet in 1673. French trading posts were set up, but there was little other settlement. In 1803 the French sold their claim to Iowa to the USA as part of the Louisiana Purchase. The land was still occupied by Indians but, in the 1830s, the tribes sold their land to the US government and migrated to reservations. Iowa became a US Territory in 1838 and a state in 1846.

The state was settled by immigrants drawn mainly from neighbouring states to the east. Later there was more immigration from Protestant states of northern Europe. The land was extremely fertile and most immigrants came to farm. Not all the Indian population had accepted the cession and there were some violent confrontations, notably the murder of settlers at Spirit Lake in 1857. The capital, Des Moines, was founded in 1843 as a fort to protect Indian rights. It expanded rapidly with the growth of a local coal field after 1910.

KANSAS

KEY HISTORICAL EVENTS

The area was explored from Mexico in the 16th century, when Spanish travellers found groups of Kansas, Wichita, Osage and Pawnee tribes. The French claimed Kansas in 1682 and they established a valuable fur trade with local tribes in the 18th century. In 1803 the area passed to the USA as part of the Louisiana Purchase and became a base for pioneering trails further west. After 1830 it was 'Indian Territory' and a number of tribes displaced from eastern states were settled there. In 1854 the Kansas Territory was created and opened for white settlement. The early settlers were farmers from Europe or New England, but the Territory's position brought it into contact with southern ideas also. Until 1861 there were frequent outbreaks of violence over the issue of slavery. Slavery had been excluded from the future Territory by the Missouri Compromise of 1820, but the 1854 Kansas-Nebraska Act had affirmed the principle of 'popular sovereignty' to settle the issue, which was then fought out by opposing factions throughout 'Bleeding Kansas'.

Kansas finally entered the Union (as a non-slavery state) in 1861; the part of Colorado which had formed part of the Kansas Territory was then separated from it.

The economy developed through a combination of cattle-ranching and railways. Herds were driven to the railheads and shipped from vast stockyards, or slaughtered and processed in railhead meat-packing plants. Wheat and sorghum also became important once the plains could be ploughed on a large scale.

TERRITORY AND POPULATION

Kansas is bounded north by Nebraska, east by Missouri, with the Missouri River as boundary in the northeast, south by Oklahoma and west by Colorado. Land area, 81,815 sq. miles (211,900 sq. km). KENTUCKY

KEY HISTORICAL EVENTS

Lying west of the Appalachians and south of the Ohio River, the area was the meeting place and battleground for the eastern Iroquois and the southern Cherokees.

Northern Shawnees also penetrated. The first successful white settlement took place in 1769 when Daniel Boone reached the Bluegrass plains from the eastern, trans-Appalachian, colonies. After 1783 immigration from the east was rapid, settlers travelling by river or crossing the mountains by the Cumberland Gap. The area was originally attached to Virginia but became a separate state in 1792.

Large plantations dependent on slave labour were established, as were small farms worked by white owners. The state became divided on the issue of slavery, although plantation interests (mainly producing tobacco) dominated state government. In the event the state did not secede in 1861, and the majority of citizens supported the Union. Public opinion swung round in support of the south during the difficulties of the reconstruction period.

The eastern mountains became an important coal-mining area, tobacco-growing continued and the Bluegrass plains produced livestock, including especially fine thoroughbred horses.

LOUISIANA

KEY HISTORICAL EVENTS

Originally the Territory of Choctaw and Caddo tribes, the whole area was claimed for France in 1682. The French founded New Orleans in 1718 and it became the centre of a crown colony in 1731. During the wars which the European powers fought over their American interests, the French ceded the area west of the Mississippi (most of the present state) to Spain in 1762 and the eastern area, north of New Orleans, to Britain in 1763. The British section passed to the USA in 1783, but France bought back the rest from Spain in 1800, including New Orleans and the mouth of the Mississippi. The USA, fearing to be excluded from a strategically important and commercially promising shipping area, persuaded France to sell Louisiana again in 1803. The present states of Missouri, Arkansas, Iowa, North Dakota, South Dakota, Nebraska and Oklahoma were included in the purchase.

The area became the Territory of New Orleans in 1804 and was admitted to the Union as a state in 1812. The economy at first depended on cotton and sugarcane plantations. The population was of French, Spanish and black descent, with a growing number of American settlers. Plantation interests succeeded in achieving secession in 1861, but New Orleans was occupied by the Union in 1862. Planters re-emerged in the late 19th century and imposed rigid segregation of the black population, denying them their new rights.

The state has become mainly urban industrial, with the Mississippi ports growing rapidly. There is petroleum and natural gas, and a strong tourist industry based on the French culture and Caribbean atmosphere of New Orleans.

MAINE

KEY HISTORICAL EVENTS

Originally occupied by Algonquian-speaking tribes, the Territory was disputed between different groups of British settlers, and between the British and French, throughout the 17th and most of the 18th centuries. After 1652 it was governed as part of Massachusetts, and French claims finally failed in 1763. Most of the early settlers were English and Protestant Irish, with many Quebec French.

The Massachusetts settlers had gained control when the original colonist, Sir Ferdinando Gorges, supported the losing royalist side in the English civil war. Their control was questioned during the English-American war of 1812, when Maine residents claimed that the Massachusetts government did not protect them against British raids. Maine was separated from Massachusetts and entered the Union as a state in 1820.

Maine is a mountainous state and even the coastline is rugged, but the coastal belt is where most settlement has developed. In the 19th century there were manufacturing towns making use of cheap water-power, and the rocky shore supported a shell-fish industry. The latter still flourishes, together with intensive horticulture, producing potatoes and fruit. The other main economic development has been in exploiting the forests for timber, pulp and paper.

The capital is Augusta, a river trading post which was fortified against Indian attacks in 1754, incorporated as a town in 1797 and chosen as capital in 1832.

TERRITORY AND POPULATION

Maine is bounded west, north and east by Canada, southeast by the Atlantic, south and southwest by New Hampshire. Land area, 30,862 sq. miles (79,932 sq. km). Census population, 1 April 2000, 1,274,923, an increase of 3·8% since 1990. July 2002 estimate, 1,294,464.

Of the total population in 2000, 654,614 were female, 973,685 were 18 years old or older and 762,045 were rural (59·8%). Only Vermont has a more rural population. In 2000 the Hispanic population was 9,360, an increase of 37·1% on the 1990 census figure of 6,829. Only North Dakota and Vermont have fewer persons of Hispanic origin in the USA.

MARYLAND

KEY HISTORICAL EVENTS

The first European visitors found groups of Algonquian-speaking tribes, often under attack by Iroquois from further north. The first white settlement was made by the Calvert family, British Roman Catholics, in 1634. The settlers received some legislative rights in 1638. In 1649 their assembly passed the Act of Toleration, granting freedom of worship to all Christians. A peace treaty was signed with the Iroquois in 1652, after which it was possible for farming settlements to expand north and west. The capital (formerly at St Mary's City) was moved to Annapolis in 1694. Baltimore, which became the state's main city, was founded in 1729.

The first industry was tobacco-growing, which was based on slave-worked plantations. There were also many immigrant British small farmers, tradesmen and indentured servants.

At the close of the War of Independence the treaty of Paris was ratified in Annapolis. Maryland became a state of the Union in 1788. In 1791 the state ceded land for the new federal capital, Washington, and its economy has depended on the capital's proximity ever since. Baltimore also grew as a port and industrial city, attracting much European immigration in the 19th century. Although strong sympathy for the south was expressed, Maryland remained within the Union in the Civil War albeit under the imposition of martial law.

TERRITORY AND POPULATION

Maryland is bounded north by Pennsylvania, east by Delaware and the Atlantic, south by Virginia and West Virginia, with the Potomac River forming most of the boundary, and west by West Virginia. MASSACHUSETTS

KEY HISTORICAL EVENTS

The first European settlement was at Plymouth, when the *Mayflower* landed its company of English religious separatists in 1620. In 1626–30 more colonists arrived, the main body being a large company of English Puritans who founded a Puritan commonwealth. This commonwealth, of about 1,000 colonists led by John Winthrop, became the Massachusetts Bay Colony and was founded under a company charter. Following disagreement between the English government and the colony the charter was withdrawn in 1684, but in 1691 a new charter united a number of settlements under the name of Massachusetts Bay. The colony's government was rigidly theocratic.

Shipbuilding, iron-working and manufacturing were more important than farming from the beginning, the land being poor. The colony was Protestant and of English descent until the War of Independence. The former colony adopted its present constitution in 1780. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part, and on 6 Feb. 1788 became the 6th state to ratify the US constitution. The state acquired its present boundaries (having previously included Maine) in 1820.

During the 19th century industrialization and immigration from Europe both increased while Catholic Irish and Italian immigrants began to change the population's character. The main inland industry was textile manufacture, the main coastal occupation was whaling; both have now gone. Boston has remained the most important city of New England, attracting a large black population since 1950.

MICHIGAN

KEY HISTORICAL EVENTS

The French were the first European settlers, establishing a fur trade with the local Algonquian Indians in the late 17th century. They founded Sault Ste Marie in 1668

and Detroit in 1701. In 1763 Michigan passed to Britain, along with other French territory east of the Mississippi, and from Britain it passed to the USA in 1783. Britain, however, kept a force at Detroit until 1796, and recaptured Detroit in 1812. Regular American settlement did not begin until later. The Territory of Michigan (1805) had its boundaries extended after 1818 and 1834. It was admitted to the Union as a state (with its present boundaries) in 1837.

During the 19th century there was rapid industrial growth, especially in mining and metalworking. The largest groups of immigrants were British, German, Irish and Dutch. Other significant groups came from Scandinavia, Poland and Italy. Many groups of immigrants came to settle as miners, farmers and industrial workers. The motor industry became dominant, especially in Detroit. Lake Michigan ports shipped bulk cargo, especially iron ore and grain.

Detroit was the capital until 1847, when that function passed to Lansing. Detroit remained, however, an important centre of flour-milling and shipping and, after the First World War, of the motor industry.

TERRITORY AND POPULATION

Michigan is divided into two by Lake Michigan. The northern part is bounded south by the lake and by Wisconsin, west and north by Lake Superior, east by the North Channel of Lake Huron; between the two latter lakes the Canadian border runs through straits at Sault Ste Marie. The southern part is bounded in the west and north by Lake Michigan, east by Lake Huron, Ontario and Lake Erie, south by Ohio and Indiana. Total area is 96,716 sq. miles (250,493 sq. km) of which 56,804 sq. miles (147,122 sq. km) are land and 39,912 sq. miles (103,372 sq. km) water. Census population, 1 April 2000, 9,938,444, an increase of 6·9% since 1990. July 2002 estimate, 10,050,446.

Population of five federal census years was:

MINNESOTA

KEY HISTORICAL EVENTS

Minnesota remained an Indian territory until the middle of the 19th century, the main groups being Chippewa and Sioux, many of whom are still there. In the 17th century there had been some French exploration, but no permanent settlement. After passing under the nominal control of France, Britain and Spain, the area became part of the Louisiana Purchase and so was sold to the USA in 1803.

Fort Snelling was founded in 1819. Early settlers came from other states, especially New England, to exploit the great forests. Lumbering gave way to homesteading, and the American settlers were joined by Germans, Scandinavians and Poles. Agriculture, mining and forest industries became the mainstays of the economy. Minneapolis, founded as a village in 1856, grew first as a lumber centre, processing the logs floated down the Minnesota River, and then as a centre of flour-milling and grain marketing. St Paul, its twin city across the river, became Territorial capital in 1849 and state capital in 1858. St Paul also stands at the head of navigation on the Mississippi, which rises in Minnesota.

The Territory (1849) included parts of North and South Dakota, but at its admission to the Union in 1858, the state of Minnesota had its present boundaries.

TERRITORY AND POPULATION

Minnesota is bounded north by Canada, east by Lake Superior and Wisconsin, with the Mississippi River forming the boundary in the southeast, south by Iowa, west by South and North Dakota, with the Red River forming the boundary in the northwest. Land area, 79,610 sq. miles (206,189 sq. km). Census population, 1 April 2000, 4,919,479, an increase of 12·4% since 1990. July 2002 estimate, 5,019,720.

Population in five census years was:

MISSISSIPPI

KEY HISTORICAL EVENTS

Mississippi was one of the territories claimed by France after the 17th century and ceded to Britain in 1763. The indigenous people were Choctaw and Natchez. French settlers at first traded amicably with them, but in the course of three wars (1716, 1723 and 1729) the French allied with the Choctaw to drive the Natchez out. During hostilities the Natchez massacred the settlers of Fort Rosalie, which the French had founded in 1716 and which was later renamed Natchez.

In 1783 the area became part of the USA except for Natchez which was under Spanish control until 1798. The United States then made it the capital of the Territory of Mississippi. The boundaries of the Territory were extended in 1804 and again in 1812. In 1817 it was divided into two territories, with the western part becoming the state of Mississippi. (The eastern part became the state of Alabama in 1819.) The city of Jackson was laid out in 1822 as the new state capital.

A cotton plantation economy developed, based on black slave labour, and by 1860 the majority of the population was black. Mississippi joined the Confederacy during the Civil War. After defeat and reconstruction there was a return to rigid segregation and denial of black rights. This situation lasted until the 1960s. There was a black majority until the Second World War, when out-migration began to change the pattern. By 1990 about 35% of the population was black, and manufacture (especially clothing and textiles) had become the largest single employer of labour.

MISSOURI

KEY HISTORICAL EVENTS

Territory of several Indian groups, including the Missouri, the area was not settled by European immigrants until the 18th century. The French founded Ste Genevieve in 1735, partly as a lead-mining community. St Louis was founded as a fur-trading base in 1764. The area was nominally under Spanish rule from 1770 until 1800 when it passed back to France. In 1803 the USA bought it as part of the Louisiana Purchase.

St Louis was made the capital of the whole Louisiana Territory in 1805, and of a new Missouri Territory in 1812. In that year American immigration increased markedly. The Territory became a state in 1821, but there had been bitter disputes between slave-owning and anti-slavery factions, with the former succeeding in obtaining statehood without the prohibition of slavery required of all other new states north of latitude 36° 30'; this was achieved by the Missouri Compromise of 1820. The Compromise was repealed in 1854 and declared unconstitutional in 1857. During the Civil War the state held to the Union side, although St Louis was placed under martial law.

With the development of steamboat traffic on the Missouri and Mississippi rivers, and the expansion of railways, the state became the transport hub of all western movement. Lead and other mining remained important, as did livestock farming. European settlers came from Germany, Britain and Ireland.

MONTANA

KEY HISTORICAL EVENTS

Originally the territory of many groups of Indian hunters including the Sioux, Cheyenne and Chippewa, Montana was not settled by American colonists until the 19th century. The area passed to the USA with the Louisiana Purchase of 1803, but the area west of the Rockies was disputed with Britain until 1846. Trappers and fur-traders were the first immigrants, and the fortified trading post at Fort Benton (1846) became the first permanent settlement. Colonization increased when gold was found in 1862. Montana was created a separate Territory (out of Idaho and Dakota Territories) in 1864. In 1866 large-scale grazing of sheep and cattle was allowed, and this provoked violent confrontation with the indigenous people whose hunting lands were invaded. Indian wars led to the defeat of federal forces at Little Bighorn in 1876 and at Big Hole Basin in 1877, but the Indians could not continue the fight and they had been moved to reservations by 1880. Montana became a state in 1889.

Helena, the capital, was founded as a mining town in the 1860s. In the early 20th century there were many European immigrants who settled as farmers or in the mines, especially in copper-mining at Butte.

NEBRASKA

KEY HISTORICAL EVENTS

The Nebraska region was first reached by Europeans from Mexico under the Spanish general Coronado in 1541. It was ceded by France to Spain in 1763, retroceded to France in 1801, and sold by Napoleon to the USA as part of the Louisiana Purchase in 1803. During the 1840s the Platte River valley became an established trail for thousands of pioneers' wagons heading for Oregon and California. The need to serve and protect the trail led to the creation of Nebraska as a Territory in 1854. In 1862 the Homestead Act opened the area for settlement, but colonization was not very rapid until the Union Pacific Railroad was completed in 1869. The largest city, Omaha, developed as the starting point of the Union Pacific and became one of the largest railway towns in the country.

Nebraska became a state in 1867, with approximately its present boundaries except that it later received small areas from the Dakotas. Many early settlers were from Europe, brought in by railway-company schemes, but from the late 1880s eastern Nebraska suffered catastrophic drought. Crop and stock farming recovered, but crop growing was only established in the west by means of irrigation.

TERRITORY AND POPULATION

Nebraska is bounded in the north by South Dakota, with the Missouri River forming the boundary in the northeast and the boundary with Iowa and Missouri to the east, south by Kansas, southwest by Colorado and west by Wyoming. The present constitution was adopted in 1875; it has been amended 184 times. By an amendment of 1934 Nebraska has a single-chambered legislature (elected for four years) of 49 members elected on a non-party ballot and classed as senators—the only state in the USA to have one. It meets annually.

NEVADA

KEY HISTORICAL EVENTS

The area was part of Spanish America until 1821, when it became part of the newly independent state of Mexico. Following a war between Mexico and the USA, Nevada was ceded to the USA as part of California in 1848. Settlement began in 1849, and the area was separated from California and joined with Utah Territory in 1850. In 1859 a rich deposit of silver was found in the Comstock Lode. Virginia City was founded as a mining town and immigration increased rapidly. Nevada Territory was formed in 1861. During the Civil War the Federal government, allegedly in order to obtain the wealth of silver for the Union cause, agreed to admit Nevada to the Union in 1864 as the 36th state. Areas of Arizona and Utah Territories were added to it in 1866–67.

The mining boom lasted until 1882, by which time cattle ranching had become equally important in the valleys where the climate is less arid. Carson City, the capital, developed in association with the nearby mining industry. The largest cities, Las Vegas and Reno, grew most in the 20th century with the building of the Hoover dam, the introduction of legal gambling and of easily obtained divorce.

After 1950 much of the desert area was adopted by the Federal government for weapons testing and other military purposes.

Nevada is bounded north by Oregon and Idaho, east by Utah, southeast by Arizona, with the Colorado River forming most of the boundary, south and west by California. Land area, 109,889 sq. miles (284,613 sq. km). In 1999 the federal government owned 83% of the land area.

Census population on 1 April 2000, 1,998,257, an increase of 66·3% since 1990. July 2002 estimate, 2,173,491.

NEW HAMPSHIRE

KEY HISTORICAL EVENTS

The area was part of a grant by the English crown made to John Mason and fellow-colonists, and was first settled in 1623. In 1629 an area between the Merrimack and Piscataqua rivers was called New Hampshire. More settlements followed, and in 1641 they were taken under the jurisdiction of the governor of Massachusetts. New Hampshire became a separate colony in 1679.

After the War of Independence New Hampshire became one of the 13 original states of the Union, ratifying the US constitution in 1788. The state constitution, which dates from 1776, was almost totally rewritten in 1784 and amended again in 1792.

The settlers were Protestants from Britain and Northern Ireland. They developed manufacturing industries, especially shoe-making, textiles and clothing, to which large numbers of French Canadians were attracted after the Civil War.

Portsmouth, originally a fishing settlement, was the colonial capital and is the only seaport. In 1808 the state capital was moved to Concord (having had no permanent home since 1775); Concord produced the Concord Coach which was widely used on the stagecoach routes of the West until at least 1900.

TERRITORY AND POPULATION

New Hampshire is bounded in the north by Canada, east by Maine and the Atlantic, south by Massachusetts and west by Vermont. Land area, 8,968 sq. miles (23,227 sq. km). Census population, 1 April 2000, 1,235,786, an increase of 11·4% since 1990. July 2002 estimate, 1,275,056.

CONSTITUTION AND GOVERNMENT

While the present constitution dates from 1784, it was extensively revised in 1792 when the state joined the Union. Since 1775 there have been 16 state conventions with 49 amendments adopted to amend the constitution.

The Legislature (called the General Court) consists of a Senate of 24 members, elected for two years, and a House of Representatives, of 400 members, elected for two years. It meets annually. The Governor and five administrative officers called 'Councillors' are also elected for two years.

NEW JERSEY

KEY HISTORICAL EVENTS

Originally the territory of Delaware Indians, the area was first settled by immigrant colonists in the early 17th century, when Dutch and Swedish traders established fortified posts on the Hudson and Delaware Rivers. The Dutch took control but lost it to the English in 1664. In 1676 the English divided the area in two; the eastern portion was assigned to Sir George Carteret and the western granted to Quaker settlers. This division lasted until 1702 when New Jersey was united as a colony of the Crown and placed under the jurisdiction of the governor of New York. It became a separate colony in 1738.

During the War of Independence crucial battles were fought at Trenton, Princeton and Monmouth. New Jersey became the 3rd state of the Union in 1787. Trenton, the state capital since 1790, began as a Quaker settlement and became an iron-working town. Industrial development grew rapidly, there and elsewhere in the state, after the opening of canals and railways in the 1830s. Princeton, also a Quaker settlement, became an important post on the New York road; the college of New Jersey (Princeton University) was transferred there from Newark in 1756.

The need for supplies in the Civil War stimulated industry and New Jersey became a manufacturing state. The growth beyond its borders of New York and Philadelphia, however, produced a pattern of commuting to employment in both centres. By 1980 about 60% of the state's population lived within 30 miles of New York.

TERRITORY AND POPULATION

NEW MEXICO

KEY HISTORICAL EVENTS

The first European settlement was established in 1598. Until 1771 New Mexico was the Spanish kings' 'Kingdom of New Mexico'. In 1771 it was annexed to the northern province of New Spain. When New Spain won its independence in 1821, it took the name of Republic of Mexico and established New Mexico as its northernmost department. Ceded to the USA in 1848 after war between the USA and Mexico, the area was organized as a Territory in 1850, by which time its population was Spanish and Indian. There was frequent conflict, especially between new settlers and raiding parties of Navajo and Apaches. The Indian war lasted from 1861 until 1866, and from 1864–68 about 8,000 Navajo were imprisoned at Bosque Redondo.

The boundaries were altered several times when land was taken into Texas, Utah, Colorado and lastly (1863) Arizona. New Mexico became a state in 1912.

Settlement proceeded by means of irrigated crop-growing and Mexican-style ranching. During the Second World War the desert areas were brought into use as testing zones for atomic weapons. Mineral extraction also developed, especially after the discovery of uranium and petroleum.

TERRITORY AND POPULATION

New Mexico is bounded north by Colorado, northeast by Oklahoma, east by Texas, south by Texas and Mexico and west by Arizona. Land area, 121,356 sq. miles (316,901 sq. km). Public lands, administered by federal agencies (1975) amounted to 26·7m. acres or 34% of the total area. The Bureau of Indian Affairs held 7·3m. acres; the State of New Mexico held 9·4m. acres; 34·4m. acres were privately owned.

Census population. 1 April 2000, 1,819,046, an increase of 20·1% since 1990. Of the total population in 2000, 924,729 were female, 1,310,472 were 18 years old or older and 1,363,501 were urban. July 2002 estimate, 1,855,059.

The population in five census years was:

	White	*Black*	*American Indian*	*Asian and Pacific Island*	*Other*	*Total*	*Per sq. mile*
1910	304,594	1,628	20,575	506	...	327,301	2·7
1940	492,312	4,672	34,510	324	...	531,818	4·4
1980	977,587	24,020	106,119	6,825	188,345	1,302,894	10·7
1990	1,146,028	30,210	134,355	14,124	190,352	1,515,069	12·5
2000	1,214,253	34,343	173,483	20,758	376,209	1,819,046	15·0

Before 1930 New Mexico was largely a Spanish-speaking state, but after 1945 an influx of population from other states considerably reduced the percentage of persons of Spanish origin or descent. However, in recent years the percentage of the Hispanic population has begun to rise again. In 2000 the Hispanic population was 765,386, up from 579,224 in 1990 (an increase of 32·1%). At 42·1%, New Mexico has the largest percentage of persons of Hispanic origin of any state in the USA.

NEW YORK STATE

KEY HISTORICAL EVENTS

The first European immigrants came in the 17th century, when there were two powerful Indian groups in rivalry: the Iroquois confederacy (Mohawk, Oneida, Onondaga, Cayuga and Seneca) and the Algonquian-speaking Mohegan and Munsee. The Dutch made settlements at Fort Orange (now Albany) in 1624 and at New Amsterdam in 1625, trading with the Indians for furs. In the 1660s there was conflict between the Dutch and the British in the Caribbean; as part of the concluding treaty the British in 1664 received Dutch possessions in the Americas, including New Amsterdam, which they renamed New York.

In 1763 the Treaty of Paris ended war between the British and the French in North America (in which the Iroquois had allied themselves with the British). Settlers of British descent in New England then felt confident enough to expand westward into the area. The climate of northern New York being severe, most settled in the Hudson river valley. After the War of Independence New York became the 11th state of the Union (1778), having first declared itself independent of Britain in 1777.

The economy depended on manufacturing, shipping and other means of distributing goods, and trade. During the 19th century New York became the most important city in the USA. Its manufacturing industries, especially clothing, attracted thousands of European immigrants. Industrial development spread along the Hudson-Mohawk valley, which was made the route of the Erie Canal (1825) linking New York with Buffalo on Lake Erie and thus with the developing farmlands of the middle west.

On 11 Sept. 2001 New York City was attacked by hijackers when two commercial airliners were flown into the World Trade Center. The building was destroyed and 2,800 people died.

TERRITORY AND POPULATION

New York is bounded west and north by Canada with Lake Erie, Lake Ontario and the St Lawrence River forming the boundary; east by Vermont, Massachusetts and Connecticut, southeast by the Atlantic, south by New Jersey and Pennsylvania. Land

CONSTITUTION AND GOVERNMENT

The present constitution dates from 1894; a later constitutional convention, 1938, is now legally considered merely to have amended the 1894 constitution, which has now had 93 amendments. A proposed new constitution in 1967 was rejected by the electorate. The Senate consists of 60 members, and the Assembly of 150 members, both elected every two years. The state capital is Albany. For local government the state is divided into 62 counties, five of which constitute the city of New York. There were state parks and recreation areas covering 260,198 acres in 1990.

Each of the state's 62 cities is incorporated by charter, under special legislation. The government of New York City is vested in the mayor (Michael Bloomberg), elected for four years, and a city council, whose president and members are elected for four years. The council has a President and 51 members, each elected from a district wholly within the city. The mayor appoints all the heads of departments, except the comptroller, who is elected. Each of the five city boroughs (Manhattan, Bronx, Brooklyn, Queens and Staten Island) has a president, elected for four years. Each borough is also a county bearing the same name except Manhattan borough, which, as a county, is called New York, and Brooklyn, which is Kings County.

For the 108th Congress, which convened in Jan. 2003, New York State sends 29 members to the House of Representatives. It is represented in the Senate by Charles Schumer (D. 1999–2005) and Hillary Clinton (D. 2001–07).

NORTH CAROLINA

KEY HISTORICAL EVENTS

The early inhabitants were Cherokees. European settlement was attempted in 1585–87, following an exploratory visit by Sir Walter Raleigh, but this failed. Settlers from Virginia came to the shores of Albemarle Sound after 1650, and in 1663 Charles II chartered a private colony of Carolina. In 1691 the north was put under a deputy governor who ruled from Charleston in the south. The colony was formally separated into North and South Carolina in 1712. In 1729 control was taken from the private proprietors and vested in the Crown, whereupon settlement grew, and the boundary between north and south was finally fixed (1735).

After the War of Independence North Carolina became one of the original 13 states of the Union. The city of Raleigh was laid out as the new capital. Having been a plantation colony North Carolina continued to develop as a plantation state, growing tobacco with black slave labour. It was also an important source of gold before the western gold-rushes of 1848.

In 1861 at the outset of the Civil War North Carolina seceded from the Union, but General Sherman occupied the capital unopposed. A military governor was admitted in 1862, and civilian government restored with re-admission to the Union in 1868.

NORTH DAKOTA

KEY HISTORICAL EVENTS

The original inhabitants were various groups of Plains Indians. French explorers and traders were active among them in the 18th century, often operating from French possessions in Canada. France claimed the area until 1803, when it passed to the USA as part of the Louisiana Purchase, except for the northeastern part which was held by the British until 1818.

Trading with the Indians, mainly for furs, continued until the 1860s, with American traders succeeding the French. In 1861 the Dakota Territory (North and

South) was established. In 1862 the Homestead Act was passed (allowing 160 acres of public land free to any family who had worked and lived on it for five years) and this greatly stimulated settlement. Farming settlers came on to the wheat lands in great numbers, many of them from Canada, Norway and Germany.

Bismarck, the capital, began as a crossing-point on the Missouri and was fortified in 1872 to protect workers building the Northern Pacific Railway. There followed a gold-rush nearby, and the town became a service centre for prospectors. In 1889 North and South Dakota were admitted to the Union as separate states, and Bismarck became the Northern capital. The largest city is Fargo which was also a railway town, named after William George Fargo the express-company founder.

The population grew rapidly until 1890 and steadily until 1930 by which time it was about one-third European in parentage. Between 1930 and 1970 there was a steady population drain, increasing whenever farming was affected by the extremes of the continental climate.

TERRITORY AND POPULATION

North Dakota is bounded north by Canada, east by the Red River (forming a boundary with Minnesota), south by South Dakota and west by Montana. Land area, 68,976 sq. miles (178,647 sq. km). July 2002 estimate, 634,110.

Population at five census years was:

OHIO

KEY HISTORICAL EVENTS

The land was inhabited by Delaware, Miami, Shawnee and Wyandot Indians. It was explored by French and British traders in the 18th century and confirmed as part of British North America in 1763. After the War of Independence it became part of the Northwest Territory of the new United States. Former American soldiers of the war came in from New England in 1788 and made the first permanent white settlement at Marietta, at the confluence of the Ohio and Muskingum rivers. In 1803 Ohio was separated from the rest of the Territory and admitted to the Union as the 17th state.

During the early 19th century there was steady immigration from Europe, mainly of Germans, Swiss, Irish and Welsh. Industrial growth began from the processing of local farm, forest and mining products; it increased rapidly with the need to supply the Union armies in the Civil War of 1861–65.

As the industrial cities grew, so immigration began again, with many whites from eastern Europe and the Balkans and blacks from the southern states looking for work in Ohio.

Cleveland, which developed rapidly as a Lake Erie port after the opening of commercial waterways to the interior and the Atlantic coast (1825, 1830 and 1855), became an iron-and-steel town during the Civil War.

OKLAHOMA

KEY HISTORICAL EVENTS

Francisco Coronado led a Spanish expedition in 1541, claiming the land for Spain. There were several Indian groups, but no strong political unit. In 1714 Juchereau de Saint Denis made the first French contact. During the 18th century French fur-traders were active, and France and Spain struggled for control, a struggle which was resolved by the French withdrawal in 1763. France returned briefly in 1800–03, and the territory then passed to the USA as part of the Louisiana Purchase.

In 1828 the Federal government set aside the area of the present state as Indian Territory, that is, a reservation and sanctuary for Indian tribes who had been driven off their lands elsewhere by white settlement. About 70 tribes came, among whom were Créeks, Choctaws and Cherokees from the southeastern states, and Plains Indians.

In 1889 the government took back about 2·5m. acres of the Territory and opened it to white settlement. About 10,000 homesteaders gathered at the site of Oklahoma

City on the Santa Fe Railway in the rush to stake their land claims. The settlers' area, and others subsequently opened to settlement, were organized as the Oklahoma Territory in 1890. In 1907 the Oklahoma and Indian Territories were combined and admitted to the Union as a state. Indian reservations were established within the state.

The economy first depended on ranching and farming, with packing stations on the railways. A mining industry grew in the 1870s attracting foreign immigration, mainly from Europe. In 1901 oil was found near Tulsa, and the industry grew rapidly.

TERRITORY AND POPULATION

Oklahoma is bounded north by Kansas, northeast by Missouri, east by Arkansas, south by Texas (the Red River forming part of the boundary) and, at the western extremity of the 'panhandle', by New Mexico and Colorado. OREGON

KEY HISTORICAL EVENTS

The area was divided between many Indian groups including the Chinook, Tillamook, Cayuse and Modoc. In the 18th century English and Spanish visitors tried to establish national claims, based on explorations of the 16th century. The USA also laid claim by right of discovery when an expedition entered the mouth of the Columbia River in 1792.

Oregon was disputed between Britain and the USA. An American fur company established a trading settlement at Astoria in 1811, which the British took in 1812. The Hudson Bay Company were the most active force in Oregon until the 1830s when American pioneers began to migrate westwards along the Oregon Trail. The dispute between Britain and the USA was resolved in 1846 with the boundary fixed at 49°N. lat. Oregon was organized as a Territory in 1848 but with wider boundaries; it became a state with its present boundaries in 1859.

Early settlers were mainly American. They came to farm in the Willamette Valley and to exploit the western forests. Portland developed as a port for ocean-going traffic, although it was 100 miles inland at the confluence of the Willamette and Columbia rivers. Industries followed when the railways came and the rivers were exploited for hydro-electricity. The capital of the Territory from 1851 was Salem, a mission for Indians on the Willamette river; it was confirmed as state capital in 1864. Salem became the processing centre for the farming and market-gardening Willamette Valley.

TERRITORY AND POPULATION

Oregon is bounded in the north by Washington, with the Columbia River forming most of the boundary, east by Idaho, with the Snake River forming most of the boundary, south by Nevada and California and west by the Pacific. Land area, 95,997 sq. miles (248,631 sq. km). The federal government owned (1994) 32,132,581 acres (51·73% of the state area). Census population, 1 April 2000, 3,421,399, an increase of 20·4% since 1990. July 2002 estimate, 3,521,515.

Population at five federal censuses was:

PENNSYLVANIA

KEY HISTORICAL EVENTS

Pennsylvania was occupied by four powerful tribes in the 17th century: Delaware, Susquehannock, Shawnee and Iroquois. The first white settlers were Swedish, arriving in 1643. The British became dominant in 1664, and in 1681 William Penn, an English Quaker, was given a charter to colonize the area as a sanctuary for his fellow Quakers. Penn's ideal was peaceful co-operation with the Indians and religious toleration within the colony. Several religious groups were attracted to Pennsylvania because of this policy, including Protestant sects from Germany and France. During the 18th century, co-operation with the Indians failed as the settlers pushed into more territory and the Indians resisted.

During the War of Independence the Declaration of Independence was signed in Philadelphia, the main city. Pennsylvania became one of the original 13 states of the Union. In 1812 the state capital was moved to its current location in Harrisburg, which began as a trading post and ferry point on the Susquehanna River in the south-central part of the state. The Mason-Dixon line, the state's southern boundary, became the dividing line between free and slave states during the conflict leading to the Civil War. During the war crucial battles were fought in the state, including

the battle of Gettysburg. Industrial growth was rapid after the war. Pittsburgh, founded as a British fort in 1761 during war with the French, had become an iron-making town by 1800 and grew rapidly when canal and railway links opened in the 1830s. The American Federation of Labor was founded in Pittsburgh in 1881, by which time the city was of national importance in producing coal, iron, steel and glass.

At the beginning of the 20th century, industry attracted immigration from Italy and eastern Europe. In farming areas the early sect communities survive, notably Amish and Mennonites. (The Pennsylvania 'Dutch' are of German extraction.)

TERRITORY AND POPULATION

Pennsylvania is bounded north by New York, east by New Jersey, south by Delaware and Maryland, southwest by West Virginia, west by Ohio and northwest by Lake Erie. RHODE ISLAND

KEY HISTORICAL EVENTS

The earliest white settlement was founded by Roger Williams, an English Puritan who was expelled from Massachusetts because of his dissident religious views and his insistence on the land-rights of the Indians. At Providence he bought land from the Narragansetts and founded a colony there in 1636. A charter was granted in 1663. The colony was governed according to policies of toleration, which attracted Jewish and nonconformist settlers; later there was French Canadian settlement also.

Shipping and fishing developed strongly, especially at Newport and Providence; these two cities were twin capitals until 1900, when the capital was fixed at Providence.

Significant actions took place in Rhode Island during the War of Independence. In 1790 the state accepted the federal constitution and was admitted to the Union.

Early farming development was most successful in dairying and poultry. Early industrialization was mainly in textiles, beginning in the 1790s, and flourishing on abundant water power. Textiles dominated until the industry began to decline after the First World War. British, Irish, Polish, Italian and Portuguese workers settled in the state, working in the mills or in the shipbuilding, shipping, fishing and naval ports. The crowding of a new population into cities led to the abolition of the property qualification for the franchise in 1888.

TERRITORY AND POPULATION

SOUTH CAROLINA

KEY HISTORICAL EVENTS

Originally the territory of Yamasee Indians, the area attracted French and Spanish explorers in the 16th century. There were attempts at settlement on the coast, none of which lasted. Charles I of England made a land grant in 1629, but the first permanent white settlement began at Charles Town in 1670, moving to Charleston in 1680. This was a proprietorial colony including North Carolina until 1712, both passed to the Crown in 1729.

The coastlands developed as plantations worked by slave labour. In the hills there were small farming settlements and many trading posts, dealing with Indian suppliers.

After active campaigns during the War of Independence, South Carolina became one of the original states of the Union in 1788.

In 1793 the cotton gin was invented, enabling the speedy mechanical separation of seed and fibre. This made it possible to grow huge areas of cotton and meet the rapidly growing needs of new textile industries. Plantation farming spread widely, and South Carolina became hostile to the anti-slavery campaign which was strong in northern states. The state first attempted to secede from the Union in 1847, but was not supported by other southern states until 1860, when secession led to civil war.

At that time the population was about 703,000, of whom 413,000 were black. During the reconstruction periods there was some political power for black citizens, but control was back in white hands by 1876. The constitution was amended in 1895 to disenfranchise most black voters, and they remained with hardly any voice in government until the Civil Rights movement of the 1960s. Columbia became the capital in 1786.

SOUTH DAKOTA

KEY HISTORICAL EVENTS

The area was part of the hunting grounds of nomadic Dakota (Sioux) Indians. French explorers visited the site of Fort Pierre in 1742–43, and claimed the area for France. In 1763 the claim fell and, together with French claims to all land west of the Mississippi, passed to Spain. Spain held the Dakotas until defeated by France in the Napoleonic Wars, when France regained the area and sold it to the USA as part of the Louisiana Purchase in 1803.

Fur-traders were active, but there was no settlement until Fort Randall was founded on the Missouri river in 1856. In 1861 North and South Dakota were organized as the Dakota Territory, and the Homestead Act of 1862 stimulated settlement, mainly in the southeast until there was a gold-rush in the Black Hills of the west in 1875–76. Colonization developed as farming communities in the east, miners and ranchers in the west. Livestock farming predominated, attracting European settlers from Scandinavia, Germany and Russia.

In 1889 the North and South were separated and admitted to the Union as states. The capital of South Dakota is Pierre, founded as a railhead in 1880, chosen as a temporary capital and confirmed as permanent capital in 1904. It faces Fort Pierre, the former centre of the fur trade, across the Missouri river. During the 20th century there have been important schemes to exploit the Missouri for power and irrigation.

TERRITORY AND POPULATION

South Dakota is bounded in the north by North Dakota, east by Minnesota, southeast by the Big Sioux River (forming the boundary with Iowa), south by Nebraska (with

TENNESSEE

KEY HISTORICAL EVENTS

Bordered on the west by the Mississippi, Tennessee was part of an area inhabited by Cherokee. French, Spanish and British explorers penetrated the area up the Mississippi and traded with the Cherokee in the late 16th and 17th centuries. French claims were abandoned in 1763, colonists from the British colonies of Virginia and Carolina then began to cross the Appalachians westwards, but there was no organized Territory until after the War of Independence. In 1784 there was a short-lived, independent state called Franklin. In 1790 the South West Territory (including Tennessee) was formed, and Tennessee entered the Union as a state in 1796.

The state was active in the war against Britain in 1812. After the American victory, colonization increased and pressure for land mounted. The Cherokee were forcibly removed during the 1830s and taken to Oklahoma, a journey on which many died.

Tennessee was a slave state and seceded from the Union in 1861, although eastern Tennessee was against secession. There were important battles at Shiloh, Chattanooga, Stone River and Nashville. In 1866 Tennessee was re-admitted to the Union.

Nashville, the capital since 1843, Memphis, Knoxville, and Chattanooga all developed as river towns, Memphis becoming an important cotton and timber port. Growth was greatly accelerated by the creation of the Tennessee Valley Authority in the 1930s, producing power for a manufacturing economy. Industry increased to the extent that, by 1970, the normal southern pattern of emigration and population loss had been reversed.

TEXAS

KEY HISTORICAL EVENTS

A number of Indian tribes occupied the area before French and Spanish explorers arrived in the 16th century. In 1685 La Salle established a colony at Fort St Louis, but Texas was confirmed as Spanish in 1713. Spanish missions increased during the 18th century with San Antonio (1718) as their headquarters.

In 1820 a Virginian colonist, Moses Austin, obtained permission to begin a settlement in Texas. In 1821 the Spanish empire in the Americas came to an end, and Texas, together with Coahuila, formed a state of the newly independent Mexico. The Mexicans agreed to the Austin venture, and settlers of British and American descent came in.

The settlers became discontented with Mexican government and declared their independence in 1836. Warfare, including the siege of the Alamo fort, ended with the foundation of the independent Republic of Texas, which lasted until 1845. During this period the Texas Rangers were organized as a policing force and border patrol. Texas was annexed to the Union in Dec. 1845, as the Federal government feared its vulnerability to Mexican occupation. This led to war between Mexico and the USA from 1845 to 1848. In 1861 Texas left the Union and joined the southern states in the Civil War, being re-admitted in 1869. Ranching and cotton-growing were the main activities before the discovery of oil in 1901.

UTAH

KEY HISTORICAL EVENTS

Spanish Franciscan missionaries explored the area in 1776, finding Shoshoni Indians. Spain laid claim to Utah and designated it part of Spanish Mexico. As such it passed into the hands of the Mexican Republic when Mexico rebelled against Spain and gained independence in 1821.

In 1848, at the conclusion of war between the USA and Mexico, the USA received Utah along with other southwestern territory. Settlers had already arrived in 1847 when the Mormons (the Church of Jesus Christ of Latter-day Saints) arrived, having been driven on by local hostility in Ohio, Missouri and Illinois. Led by Brigham Young, they entered the Great Salt Valley and colonized it. In 1849 they applied for statehood but were refused. In 1850 Utah and Nevada were joined as one Territory. The Mormon community continued to ask for statehood but this was only granted in 1896, after they had renounced polygamy and disbanded their People's Party.

Mining, especially of copper, and livestock farming were the base of the economy. Settlement had to adapt to desert conditions, and the main centres of population were in the narrow belt between the Wasatch Mountains and the Great Salt Lake. Salt Lake City, the capital, was founded in 1847 and laid out according to Joseph Smith's plan for the city of Zion. It was the centre of the Mormons' provisional 'State of Deseret' and Territorial capital from 1856 until 1896, except briefly in 1858 when federal forces occupied it during conflict between territorial and Union governments.

TERRITORY AND POPULATION

Utah is bounded north by Idaho and Wyoming, east by Colorado, south by Arizona and west by Nevada. Land area, 82,144 sq. miles (212,752 sq. km). The Bureau of Indian Affairs in 1990 administered 2,317,604 acres, 2,284,766 acres of which were allotted to Indian tribes.

Census population, 1 April 2000, 2,233,169, an increase of 29·6% since 1990. July 2002 estimate, 2,316,256.

Population at five federal censuses was:

VERMONT

KEY HISTORICAL EVENTS

The original Indian hunting grounds of the Green Mountains and lakes was explored by the Frenchman Samuel de Champlain in 1609 who reached Lake Champlain on the northwest border. The first attempt at permanent settlement was also French, on Isle la Motte in 1666. In 1763 the British gained the area from the French by the Treaty of Paris. The Treaty, which also brought peace with the Indian allies of the French, opened the way for settlement, but in a mountain state transport was slow and difficult. Montpelier, the state capital from 1805, was chartered as a township site in 1781 to command the main pass through the Green Mountains.

During the War of Independence Vermont declared itself an independent state, to avoid being taken over by New Hampshire and New York. In 1791 it became the 14th state of the Union.

Most early settlers were New Englanders of British and Protestant descent. After 1812 a granite-quarrying industry grew around the town of Barre, attracting

immigrant workers from Italy and Scandinavia. French Canadians also settled in Winooski. When textile and engineering industries developed in the 19th century these brought more European workers.

Vermont saw the only Civil War action north of Pennsylvania, when a Confederate raiding party attacked from Canada in 1864.

During the 20th century the textile and engineering industries have declined but paper and lumber industries flourish. Settlement is still mainly rural or in small towns, and farming is pastoral.

TERRITORY AND POPULATION

Vermont is bounded in the north by Canada, east by New Hampshire, south by Massachusetts and west by New York. Land area, 9,250 sq. miles (23,957 sq. km). Census population, 1 April 2000, 608,827, an increase of 8·2% since 1990. July 2002 estimate, 616,592.

Population at five census years was:

	White	*Black*	*Indian*	*Asiatic*	*Total*	*Per sq. mile*
1910	354,298	1,621	26	11	355,956	39·0

1980	506,736	1,135	984	1,355	511,456	55·1
1990	555,088	1,951	1,696	3,213[1]	562,758	60·8
2000	589,208	3,063	2,420	5,358[1]	608,827	65·8

Of the total population in 2000, 310,490 were female, 461,304 were 18 years old or older and 376,379 (61·8%) were rural (67·8% in 1990). Vermont still has the highest rural population percentage of any state in the USA. In 2000 the Hispanic population was 5,504, the lowest total of any state. However, this figure represents a rise of 50·3% compared to the 1990 census figure of 3,661. The largest cities are Burlington, with a population (2000 census) of 38,889; Essex, 18,626; Rutland, 17,292; Colchester, 16,986.

SOCIAL STATISTICS

Births, 2000, were 6,501 (10·9 per 1000 population); deaths, 5,127; infant deaths, 39; marriages, 6,271; civil unions, 1704; divorces, 2,526.

CLIMATE

Burlington, Jan. 17°F (–8·3°C), July 70°F (21·1°C). Annual rainfall 33" (820 mm). Vermont belongs to the New England climate zone (*see* UNITED STATES: Climate).

CONSTITUTION AND GOVERNMENT

The constitution was adopted in 1793 and has since been amended. Amendments are proposed by two-thirds vote of the Senate every four years, and must be accepted by two sessions of the legislature; they are then submitted to popular vote. The state Legislature, consisting of a Senate of 30 members and a House of Representatives of 150 members (both elected for two years), meets in Jan. every year. The Governor and Lieut.-Governor are elected for two years. Electors are all citizens who possess certain residential qualifications and have taken the freeman's oath set forth in the constitution.

For the 108th Congress, which convened in Jan. 2003, Vermont sends one member to the House of Representatives. It is represented in the Senate by Patrick Leahy (D. 1975–2005) and Jim Jeffords (R. 1989–2001, ind. 2001–07).

The capital is Montpelier (8,035 in 2000). There are 14 counties and 251 cities, towns and other administrative divisions.

VIRGINIA

KEY HISTORICAL EVENTS

In 1607 a British colony was founded at Jamestown, on a peninsula in the James River, to grow tobacco. The area was marshy and unhealthy but the colony survived and in 1619 introduced a form of representative government. The tobacco plantations expanded and African slaves were imported. Jamestown was later abandoned, but tobacco-growing continued and spread through the eastern part of the territory.

In 1624 control of the colony passed from the Virginia Company of London to the Crown. Growth was rapid during the 17th and 18th centuries. The movement for American independence was strong in Virginia; George Washington and Thomas Jefferson were both Virginians, and crucial battles of the War of Independence were fought there.

When the Union was formed, Virginia became one of the original states, but with reservations regarding the constitution because of its attachment to slave-owning. In 1831 there was a slave rebellion. The tobacco plantations began to decline, and plantation owners turned to the breeding of slaves. While the eastern plantation lands seceded from the Union in 1861, the small farmers and miners of the western hills refused to secede and remained in the Union as West Virginia.

Richmond, the capital, became the capital of the Confederacy. Much of the Civil War's decisive conflict took place in Virginia, with considerable damage to the economy. After the war the position of the black population was little improved. Blacks remained without political or civil rights until the 1960s.

WASHINGTON

KEY HISTORICAL EVENTS

The strongest Indian tribes in the 18th century were Chinook, Nez Percé, Salish and Yakima. The area was designated by European colonizers as part of the Oregon Country. Between 1775 and 1800 it had been claimed by explorers for Spain, Britain and the USA; the dispute between the two latter nations was not settled until 1846.

The first small white settlements were Indian missions and fur-trading posts. In the 1840s American settlers began to push westwards along the Oregon Trail, making a speedy solution of the dispute with Britain necessary. When this was achieved the whole area was organized as the Oregon Territory in 1848, and Washington was made a separate Territory in 1853.

Apart from trapping and fishing, the important industry was logging, mainly to supply building timbers to the new settlements of California. After 1870 the westward extension of railways helped to stimulate settlement. Statehood was granted in 1889. The early population was composed mainly of Americans from neighbouring states to the east, and Canadians. Scandinavian immigrants followed. Seattle, the chief city, was laid out in 1853 as a saw-milling town and named after the Indian chief who had ceded the land and befriended the settlers. It grew as a port during the Alaskan and Yukon gold-rushes of the 1890s. The economy thrived on exploiting the Columbia River for hydro-electric power.

WEST VIRGINIA

KEY HISTORICAL EVENTS

In 1861 the state of Virginia seceded from the Union over the issue of slave-owning. The 40 western counties of the state were composed of hilly country, settled by miners and small farmers who were not slave-owners, and these counties ratified an ordinance providing for the creation of a new state that same year. On 20 June 1863 West Virginia became the 35th state of the Union.

The capital, Charleston, was an 18th-century fortified post on the early westward migration routes across the Appalachians. In 1795 local brine wells were tapped and the city grew as a salt town. Coal, oil, natural gas and a variety of salt brines were all found in due course. Huntington, the next largest town, developed as a railway terminus serving the same industrial area, and also providing transport on the Ohio river. Wheeling, the original state capital, was a well established, cosmopolitan city when it hosted the statehood meetings in 1861, located on the major transportation routes of the Ohio River, Baltimore and Ohio Railroad and the National Road.

Three-quarters of the state is forest and settlement has been concentrated in the mineral-bearing Kanawha valley, along the Ohio river and in the industrial Monongahela valley of the north. More than half of the population is still classified as rural. The traditional small firms and small hill-mines, however, support few, and the majority of rural dwellers commute to industrial employment.

TERRITORY AND POPULATION

West Virginia is bounded in the north by Pennsylvania and Maryland, east and south by Virginia, southwest by the Big Sandy River (forming the boundary with Kentucky) and west by the Ohio River (forming the boundary with Ohio). WISCONSIN

KEY HISTORICAL EVENTS

The French were the first European explorers of the territory; Jean Nicolet landed at Green Bay in 1634, a mission was founded in 1671 and a permanent settlement at Green Bay followed. In 1763 French claims were surrendered to Britain. In 1783 Britain ceded them to the USA, which designated the Northwest Territory, of which Wisconsin was part. In 1836 a separate Territory of Wisconsin was organized, including the present Iowa, Minnesota and parts of the Dakotas.

Territorial organization was a great stimulus to settlement. In 1836 James Duane Doty founded the town site of Madison and successfully pressed its claim to be the capital of the Territory even before it was inhabited. In 1848 Wisconsin became a state, with its present boundaries.

The city of Milwaukee was founded, on Lake Michigan, when Indian tribes gave up their claims to the land in 1831–33. It grew rapidly as a port and industrial town, attracting Germans in the 1840s, Poles and Italians 50 years later. The Lake Michigan shore was developed as an industrial area; the rest of the south proved suitable for dairy farming; the north, mainly forests and lakes, has remained sparsely settled except for tourist bases.

There are 11 Indian reservations where more than 15,500 of Wisconsin's 47,000 Indians live. Since the Second World War there has been black immigration from the southern states to the industrial lake-shore cities.

WYOMING

KEY HISTORICAL EVENTS

The territory was inhabited by Plains Indians (Arapahoes, Sioux and Cheyenne) in the early 19th century. There was some trading between them and white Americans, but very little white settlement. In the 1840s the great western migration routes, the Oregon and the Overland Trails, ran through the territory, Wyoming offering mountain passes accessible to wagons. Once migration became a steady flow it was necessary to protect the route from Indian attack, and forts were built.

In 1867 coal was discovered. In 1868 Wyoming was organized as a separate Territory, and in 1869 the Sioux and Arapaho were confined to reservations. At the same time the route of the Union Pacific Railway was laid out, and working settlements and railway towns grew up in southern Wyoming. Settlement of the north was delayed until after the final defeat of hostile Indians in 1876.

The economy of the settlements at first depended on ranching. Cheyenne had been made Territorial capital in 1869, and also functioned as a railway town moving cattle. Casper, on the site of a fort on the Pony Express route, was also a railway town on the Chicago and North Western. Laramie started as a Union Pacific construction workers' shanty town in 1868. In 1890 oil was discovered at Casper, and Wyoming became a state in the same year. Subsequently, mineral extraction became the leading industry, as natural gas, uranium, bentonite and trona were exploited as well as oil and coal.

OUTLYING TERRITORIES

The outlying territories of the USA comprise the two Commonwealths of the Northern Mariana Islands and Puerto Rico, a number of unincorporated territories in the Pacific Ocean and one unincorporated territory in the Caribbean Sea.

COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS

KEY HISTORICAL EVENTS

In 1889 Spain ceded Guam (largest and southernmost of the Marianas Islands) to the USA and sold the rest to Germany. Occupied by Japan in 1914, the islands were administered by Japan under a League of Nations mandate until occupied by US forces in Aug. 1944. In 1947 they became part of the US-administered Trust Territory of the Pacific Islands. On 17 June 1975 the electorate adopted a covenant to establish a Commonwealth in association with the USA; this was approved by the US government in April 1976 and came into force on 1 Jan. 1978. In Nov. 1986 the islanders were granted US citizenship. The UN terminated the Trusteeship status on 22 Dec. 1990.

The Northern Marianas form a single chain of 16 mountainous islands extending north of Guam for about 560 km, with a total area of 5,050 sq. km (1,950 sq. miles) of which 464 sq. km (179 sq. miles) are dry land, and with a population (2000 census) of 69,221 (female, 37,237).

In 1917 US citizenship was conferred and in 1932 there was a name change from Porto Rico to Puerto Rico. In 1952 Puerto Rico was proclaimed a commonwealth with a representative government and a directly elected governor.

TERRITORY AND POPULATION

Puerto Rico is the most easterly of the Greater Antilles and lies between the Dominican Republic and the US Virgin Islands. The total area is 13,791 sq. km (5,325 sq. miles), of which 8,871 sq. km (3,425 sq. miles) are dry land; the population, according to the census of 2000, was 3,808,610, an increase of 8·1% over 1990. They have one non-voting representative in Washington. The island is given billions of dollars each year in food stamps and other federal aid from Washington and although Puerto Ricans fight in the US army, the island sends its own teams to the Olympic Games. The executive power resides in a Governor, elected directly by the people every four years. 22 heads of departments form the Governor's Council of Secretaries. The legislative functions are vested in a Senate, composed of 28 members, and the House of Representatives, composed of 51 members. Both houses meet annually in Jan. Puerto Rican men are subject to conscription in US services.

A new constitution was drafted by a Puerto Rican Constituent Assembly and approved by the electorate at a referendum on 3 March 1952. AMERICAN SAMOA

KEY HISTORICAL EVENTS

The Samoan Islands were first visited by Europeans in the 18th century; the first recorded visit was in 1722. On 14 July 1889 a treaty between the USA, Germany and Great Britain proclaimed the Samoan islands neutral territory, under a four-power government consisting of the 3 treaty powers and the local native government. By the Tripartite Treaty of 7 Nov. 1899, ratified 19 Feb. 1900, Great Britain and Germany renounced in favour of the USA all rights over the islands of the Samoan group east of 171° long. west of Greenwich, the islands to the west of that meridian being assigned to Germany (now the independent state of Samoa). The islands of Tutuila and Aunu'u were ceded to the USA by their High Chiefs on 17 April 1900, and the islands of the Manu'a group on 16 July 1904. Congress accepted the islands under a Joint Resolution approved 20 Feb. 1929. Swain's Island, 210 miles north of the Samoan Islands, was annexed in 1925 and is administered as an integral part of American Samoa.

TERRITORY AND POPULATION

The islands (Tutuila, Aunu'u, Ta'u, Olosega, Ofu and Rose) are approximately 650 miles east-northeast of the Fiji Islands. The total area is 1,511 sq. km (583 sq. miles), of which 200 sq. km (77 sq. miles) are dry land; population (2000 census), 57,291 (29,264 males), nearly all Polynesians or part-Polynesians; density 37·9 per sq. km.

In 1995 an estimated 50·3% of the population lived in urban areas. The capital is Pago Pago, which had a population of 14,000 in 1999. The island's three Districts are Eastern (population, 1980, 17,311), Western (13,227) and Manu'a (1,732). There is also Swain's Island, with an area of 1·9 sq. miles and 100 inhabitants (1994), which lies 210 miles to the northwest. Rose Island (uninhabited) is 0·4 sq. mile in area. In 1990 some 85,000 American Samoans lived in the USA.

Samoan and English are spoken.

SOCIAL STATISTICS

In 1996 the birth rate was 35·6 per 1,000 population and the death rate 4·0 per 1,000 population. Infant mortality was 18·8 per 1,000 live births. Annual growth rate, 1995–99, 4·0%.

CLIMATE

A tropical maritime climate with a small annual range of temperature and plentiful rainfall. Pago Pago, Jan. 83°F (28·3°C), July 80°F (26·7°C). Annual rainfall 194" (4,850 mm).

CONSTITUTION AND GOVERNMENT

American Samoa is constitutionally an unorganized, unincorporated territory of the USA administered under the Department of the Interior. Its indigenous inhabitants are US nationals and are classified locally as citizens of American Samoa with certain privileges under local laws not granted to non-indigenous persons. Polynesian customs (not inconsistent with US laws) are respected.

Fagatogo is the seat of the government.

The islands are organized in 15 counties grouped in 3 districts; these counties and districts correspond to the traditional political units. On 25 Feb. 1948 a bicameral legislature was established, at the request of the Samoans, to have advisory legislative functions. With the adoption of the Constitution of 22 April 1960, and the revised Constitution of 1967, the legislature was vested with limited law-making authority. The lower house, or House of Representatives, is composed of 20 members elected by universal adult suffrage and 1 non-voting member for Swain's Island. The upper house, or Senate, is comprised of 18 members elected, in the traditional Samoan manner, in meetings of the chiefs. The Governor and Lieut.-Governor have been popularly elected since 1978.

RECENT ELECTIONS

At elections to the Senate and House of Representatives on 5 and 19 Nov. 2002, only non-partisans were elected.

At gubernatorial elections on 7 Nov. 2000, Tauese P. Sunia (Democrat) won with 50·7% of the vote against 47·8% for the independent Lealaifuaneva Reid.

ECONOMY

Overview. An Economic Development and Planning Office was introduced in 1971. Much has been done to promote economic expansion and outside investment interest has been stimulated. The Office has initiated the first Territorial Comprehensive Plan. This plan when completed will provide a guideline to territorial development for 20 years. The focus will be on physical development and the problems of a rapidly increasing population with limited labour resources.

Budget. The chief sources of revenue are annual federal grants from the USA, local revenues from taxes, duties, receipts from commercial operations (enterprise and special revenue funds), utilities, rents and leases, and liquor sales. In 1990–91 revenues were $97m. ($43m. in local revenue and $54m. in grant revenue).

Banking and Finance. The American Samoa branch of the Bank of Hawaii and the American Samoa Bank offer all commercial banking services. The Development Bank of American Samoa, government-owned, is concerned primarily through loans and guarantees with the economic advancement of the Territory.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* American Samoa's carbon dioxide emissions in 1998 were the equivalent of 4·5 tonnes per capita.

Electricity. Installed capacity was 33,000 kW in 1993. Production in 1998 was 125m. kWh. Per capita consumption in 1995 was an estimated 1,743 kWh. All the Manu'a islands have electricity.

Water. The total area covered by water is approximately 13 sq. miles.

Agriculture. Of the 48,640 acres of land area, 11,000 acres are suitable for tropical crops; most commercial farms are in the Tafuna plains and west Tutuila. Principal crops are coconuts, taro, bread-fruit, yams and bananas.

Livestock (1996): pigs, 11,000.

Fisheries. Total catch in 2000 was 866 tonnes.

INDUSTRY

Fish canning is important, employing the second largest number of people (after government). Attempts are being made to provide a variety of light industries. Tuna fishing and local inshore fishing are both expanding. In 1990 there were 27,991 persons of employable age, of whom 14,400 were in the workforce. The unemployment rate in 1991 was 12%.

GUAM

KEY HISTORICAL EVENTS

Magellan is said to have discovered the island in 1521; it was ceded by Spain to the USA by the Treaty of Paris (10 Dec. 1898). The island was captured by the Japanese on 10 Dec. 1941, and retaken by American forces from 21 July 1944. Guam is of great strategic importance; substantial numbers of naval and air force personnel occupy about one-third of the usable land.

TERRITORY AND POPULATION

Guam is the largest and most southern island of the Marianas Archipelago, in 13° 26' N. lat., 144° 43' E. long. Total area, 209 sq. miles (541 sq. km). Agaña, the seat of government, is about 8 miles from the anchorage in Apra Harbor. The census in 2000 showed a population of 154,805 (79,181 males), of whom 80,737 were born in Guam; density, 286·1 per sq. km. In 1995 an estimated 61·7% of the population lived in rural areas. The Malay strain is predominant. The native language is Chamorro; English is the official language and is taught in all schools.

CONSTITUTION AND GOVERNMENT

Guam's constitutional status is that of an 'unincorporated territory' of the USA. Entry of US citizens is unrestricted; foreign nationals are subject to normal regulations. In 1949–50 the President transferred the administration of the island from the Navy Department (who held it from 1899) to the Interior Department. The transfer conferred full citizenship on the Guamanians, who had previously been 'nationals' of the USA. There was a referendum on status on 30 Jan. 1982. 38% of eligible voters voted; 48·5% of those favoured Commonwealth status.

The Governor and his staff constitute the executive arm of the government. The legislature is a 21-member Senate; its powers are similar to those of an American state legislature.

RECENT ELECTIONS

At the election of 5 Nov. 2002 for the Guam Legislature the Democrats won 9 seats and the Republicans won 6. In gubernatorial elections held on the same day, Republican candidate Felix Camacho won 55·2% of the vote against 44·8% for Democrat Robert Underwood.

VIRGIN ISLANDS OF THE UNITED STATES

KEY HISTORICAL EVENTS

The Virgin Islands of the United States, formerly known as the Danish West Indies, were named and claimed for Spain by Columbus in 1493. They were later settled by Dutch and English planters, invaded by France in the mid-17th century and abandoned by the French *c.* 1700, by which time Danish influence had been established. St Croix was held by the Knights of Malta between two periods of French rule.

The Virgin Islands were purchased by the United States from Denmark for $25m. in a treaty ratified by both nations and proclaimed on 31 March 1917. Their value was wholly strategic, inasmuch as they commanded the Anegada Passage from the Atlantic Ocean to the Caribbean Sea and the approach to the Panama Canal. Although the inhabitants were made US citizens in 1927, the islands are, constitutionally, an 'unincorporated territory'.

TERRITORY AND POPULATION

The Virgin Islands group, lying about 40 miles due east of Puerto Rico, comprises the islands of St Thomas (31 sq. miles), St Croix (83 sq. miles), St John (20 sq. miles) and 65 small islets or cays, mostly uninhabited. The total area is 1,910 sq. km (738 sq. miles), of which 346 sq. km (134 sq. miles) are dry land.

The population according to the 2000 census was 108,612 (females, 56,748); density 811 per sq. mile. Official population estimate for July 2002 was 123,498. An estimated 54·9% of the population were rural in 1995.

Population (2000 census) of St Croix, 53,234; St Thomas, 51,181; St John, 4,197. In 2000, 69·8% of the population were native born.

The capital and only city, Charlotte Amalie, on St Thomas, had a population (2000 census) of 11,044. There are two towns on St Croix with 2000 census populations of: Christiansted, 2,637; Frederiksted, 732.

SOCIAL STATISTICS

1997 births, 2,017; deaths, 620. Rates, 1997 (per 1,000 population); birth, 17·6; death, 5·4; infant mortality, 12·9 per 1,000 live births.

CLIMATE

Average temperatures vary from 77°F to 82°F throughout the year; humidity is low. Average annual rainfall, about 45". The islands lie in the hurricane belt; tropical storms with heavy rainfall can occur in late summer.

CONSTITUTION AND GOVERNMENT

The Organic Act of 22 July 1954 gives the US Department of the Interior full jurisdiction; some limited legislative powers are given to a single-chambered legislature, composed of 15 senators elected for two years representing the two legislative districts of St Croix and St Thomas-St John.

The Governor is elected by the residents. Since 1954 there have been four attempts to redraft the Constitution, to provide for greater autonomy. Each has been rejected by the electorate. The latest was defeated in a referendum in Nov. 1981, 50% of the electorate participating.

For administration, there are 14 executive departments, 13 of which are under commissioners and the other, the Department of Justice, under an Attorney-General. The US Department of the Interior appoints a Federal Comptroller of government revenue and expenditure.

The franchise is vested in residents who are citizens of the United States, 18 years of age or over. In 1986 there were 34,183 voters, of whom 26,377 participated in the local elections that year. They do not participate in the US presidential election but they have a non-voting representative in Congress.

The capital is Charlotte Amalie, on St Thomas Island.

RECENT ELECTIONS

Elections for governor held on 5 Nov. 2002 were won by Charles Turnbull II (Democrat) with 50·5% of the votes, ahead of John DeJongh in second place with 24·4%. The turn-out was 62%. In Senate elections held on 7 Nov. 2000 the Democratic Party of the Virgin Islands won 8 out of 15 seats.

KEY HISTORICAL EVENTS

Uruguay was the last colony settled by Spain in the Americas. Part of the Spanish viceroyalty of Rio de la Plata until revolutionaries expelled the Spanish in 1811 and subsequently a province of Brazil, Uruguay declared independence on 25 Aug. 1825. Conflict between two political parties, the *blancos* (conservatives) and the *colorados* (liberals), led, in 1865–70, to the War of the Triple Alliance. In 1903 peace and prosperity were restored under President José Batlle y Ordoñez. Since 1904 Uruguay has been unique in her constitutional innovations, all designed to protect her from dictatorship. A favoured device was the collegiate system of government, in which the two largest political parties were represented.

The early part of the 20th century saw the development of a welfare state in Uruguay which encouraged extensive immigration. In 1919 a new constitution was adopted providing for a *colegiado*—a plural executive based on the Swiss pattern. However, the system was abolished in 1933 and replaced by presidential government, with quadrennial elections. From 1951 to 1966 a collective form of leadership again replaced the presidency. During the 1960s, following a series of strikes and riots, the Army became increasingly influential, repressive measures were adopted and presidential government was restored in 1967. The Tupamaro, Marxist urban guerrillas, sought violent revolution but were finally defeated by the Army in 1972. The return to civilian rule came on 12 Feb. 1985.

CONSTITUTION AND GOVERNMENT

Congress consists of a *Senate* of 31 members and a *Chamber of Deputies* of 99 members, both elected by proportional representation for five-year terms. The electoral system provides that the successful presidential candidate be a member of the party which gains a parliamentary majority. Electors vote for deputies on a first-past-the-post system, and simultaneously vote for a presidential candidate of the same party. The winners of the second vote are credited with the number of votes obtained by their party in the parliamentary elections. Referendums may be called at the instigation of 10,000 signatories.

ECONOMY

In 1998 services contributed 64·0% of GDP, industry 27·5% and agriculture 8·5%.

Overview. Uruguay's small economy benefits from a favourable climate for agriculture and a substantial hydropower potential. Economic development has been restrained in recent years by high—though declining—inflation and extensive government regulation. Uruguayan trade has continued to expand and the potential for new markets continued to open through negotiations with neighbouring countries and the EU.

Currency. The unit of currency is the *Uruguayan peso* (UYP), of 100 *centésimos*, which replaced the nuevo peso in March 1993 at 1 Uruguayan peso = 1,000 nuevos pesos. In June 2002 Uruguay allowed the peso to float freely. Foreign exchange reserves were US$1,791m. and gold reserves 8,000 troy oz in May 2002 (1·8m. troy oz in Nov. 1999). Inflation, which had been over 100% in 1990, was 4·4% in 2001. Total money supply in Feb. 2002 was 12,456m. pesos.

Budget. Central government finance (1m. pesos):

	1995	*1996*	*1997*	*1998*	*1999*	*2000*
Revenue	33,923	45,535	60,165	70,664	67,197	68,167
Expenditure	35,390	47,914	62,363	72,673	76,079	76,489

Standard rate of VAT is 23%.

Performance. Uruguay depends heavily on its two large neighbours, Uruguay and Argentina. In 1999, as a consequence of the devaluation of the Brazilian *real* and the worst drought since 1988, Uruguay's economy shrank by 2·8%. In 2000 there was negative growth again, of 1·4%, and the general downturn in the world economy exacerbated by Argentina's crisis caused the economy to contract again in 2001, by 3·1%. Total GDP in 2001 was US$18·4bn.

Banking and Finance. The Central Bank (*President*, Julio de Brun) was inaugurated on 16 May 1967. It is the bank of issue and supreme regulatory authority. In 1994 there were 22 commercial banks, 3 state-supported and 18 foreign-owned. Savings banks deposits were 1,993,029m. pesos in 1995. KEY HISTORICAL EVENTS

Descended from nomadic Mongol tribes who settled in Central Asia in the 13th century, the Uzbeks came under Russian control in the late 19th century. In Oct. 1917 the Tashkent Soviet assumed authority. The semi-independent Khanates of Khiva and Bokhara were first (1920) transformed into People's Republics, then (1923–24) into Soviet Socialist Republics, and finally merged in the Uzbek SSR and other republics. On 20 June 1990 the Supreme Soviet adopted a declaration of sovereignty and in Aug. 1991, following an unsuccessful coup, declared independence as the Republic of Uzbekistan. In Dec. 1991 Uzbekistan became a member of the CIS.

Islam Karimov became head of state in 1990 and was elected president in 1991 and again in 2000. In that year Uzbek border guards moved their posts 5 km into a part of neighbouring Kazakhstan. Borders with Russia and Kyrgyzstan still remain undefined, yet the chief cause for concern is the Islamist Movement of Uzbekistan's fight to create an Islamic state in the Fergana Valley. Bomb blasts in Tashkent, one of which almost killed the president in 1999, were blamed on religious extremists and the army suffered losses fighting the IMU in 2000. Central Asian governments have agreed to co-operate on the issue.

The population in 1997 was 23,467,700 (11,842,800 females); density, 52·5 per sq. km. In 1999, 62·8% of the population lived in rural areas.

KEY HISTORICAL EVENTS

Vanuatu occupies the group of islands formerly known as the New Hebrides, in the southwestern Pacific Ocean. Captain Bligh and his companions, cast adrift by the *Bounty* mutineers, sailed through part of the island group in 1789. Sandalwood merchants and European missionaries came to the islands in the mid-19th century and were then followed by cotton planters—mostly French and British—in 1868. In response to Australian calls to annexe the islands, Britain and France agreed on joint supervision. Joint sovereignty was held over the indigenous Melanesian people but each nation retained responsibility for its own nationals according to a protocol of 1914. The island group escaped Japanese invasion during the Second World War and became an Allied base. On 30 July 1980 New Hebrides became an independent nation under the name of Vanuatu, meaning 'Our Land Forever'.

TERRITORY AND POPULATION

Vanuatu comprises 80 islands, which lie roughly 800 km west of the Fiji Islands and 400 km northeast of New Caledonia. The estimated land area is 4,706 sq. miles (12,190 sq. km). They also claim Matthew and Hunter islands. 67 islands were inhabited in 1990. Population at the 1999 census, 186,678; density, 15·3 per sq. km.

The UN gives a projected population for 2010 of 252,000.

VATICAN CITY STATE

Population estimate, 2000: 900

Stato della Città del Vaticano

KEY HISTORICAL EVENTS

For many centuries the Popes bore temporal sway over a territory stretching across mid-Italy. In the 19th century the Papal States were incorporated into the Italian Kingdom. On 11 Feb. 1929 a treaty between the Italian Government and the Vatican recognized the sovereignty of the Holy See in the city of the Vatican.

TERRITORY AND POPULATION

The area of Vatican City is 44 ha (108·7 acres). It includes the Piazza di San Pietro (St Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (for freight only), postal facilities, coins and radio. Twelve buildings in and outside Rome enjoy extra-territorial rights, including the Basilicas of St John Lateran, St Mary Major and St Paul without the Walls, the Pope's summer villa at Castel Gandolfo and a further Vatican radio station on Italian soil. *Radio Vaticana* broadcasts an extensive service in 34 languages from the transmitters in Vatican City and in Italy. The Holy See and the Vatican are not synonymous—the Holy See, referring to the primacy of the Pope, is located in Vatican City. The official language is Latin.

Vatican City has about 900 inhabitants.

CONSTITUTION AND GOVERNMENT

Vatican City State is governed by a Commission appointed by the Pope. The reason for its existence is to provide an extra-territorial, independent base for the Holy See, the government of the Roman Catholic Church. The Pope exercises sovereignty and has absolute legislative, executive and judicial powers. The judicial power is delegated to a tribunal in the first instance, to the Sacred Roman Rota in appeal and to the Supreme Tribunal of the Signature in final appeal.

The Pope is elected by the College of Cardinals, meeting in secret conclave. The election is by scrutiny and requires a two-thirds majority.

CURRENT ADMINISTRATION

Supreme Pontiff: **John Paul II** (Karol Wojtyła), born at Wadowice near Kraków, Poland, 18 May 1920. Archbishop of Krakow 1964–78, created Cardinal in 1967; elected Pope 16 Oct. 1978, inaugurated 22 Oct. 1978.

Pope John Paul II was the first non-Italian to be elected since Pope Adrian VI (a Dutchman) in 1522.

Secretary of State: Cardinal Angelo Sodano.

Secretary for Relations with Other States: H. E. Mgr Jean-Louis Tauran.

Office of the Sovereign of the Vatican City: http://www.vatican.va

ECONOMY

Currency. Since 1 Jan. 2002 the Vatican City has been using the euro. Italy has agreed that the Vatican City may mint a small part of the total Italian euro coin contingent with their own motifs. Average annual inflation in the period 1997–2001 was 11·2%.

Budget. The Vatican's budget is financed primarily by contributions from Roman Catholics around the world, various investment income, visitors to museums, and

sales of souvenirs and postage stamps. Revenues in 1994 were US$175·5m. and expenditures US$175m.

Performance. Real GDP growth was 1·7% in 2001.

SOCIAL INSTITUTIONS

Justice. In 2002 the Vatican City's legal system hosted 397 civil cases and 608 criminal cases—more cases than there are inhabitants. Many of the offences are committed by outsiders, principally at St Peter's Basilica and the museums.

Roman Catholic Church. The Roman Pontiff is in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity. The Pope is the Vicar of Christ and the Successor of St Peter, who exercises universal governance over the Church. He is also the sovereign ruler of Vatican City State. He has for advisers the Sacred College of Cardinals, consisting in Jan. 2003 of 171 Cardinals from 66 countries (150 created by Pope John Paul II), of whom 112 are cardinal electors—those under the age of 80 who may enter into conclave to elect a new Pope. Cardinals, addressed by the title of 'Eminence', are appointed by the Pope from senior ecclesiastics who are either the bishops of important Sees or the heads of departments at the Roman Curia. In addition to the College of Cardinals, there is a Synod of Bishops, created by Pope Paul VI and formally instituted on 15 Sept. 1965. This consists of the Patriarchs and certain Metropolitans of the Catholic Church of Oriental Rite, of elected representatives of the national episcopal conferences and religious orders of the world, of the Cardinals in charge of the Roman Congregations and of other persons nominated by the Pope. The Synod meets in both general (global) and special (regional) assemblies. General Synods are scheduled to take place every three years. The last was held in Oct. 2001 on the theme of the mission of the local bishop in the universal church.

The central administration of the Roman Catholic Church is carried out by a number of permanent organisms called Congregations, Council, Commissions and Offices. The Congregations are composed of a number of Cardinals and diocesan bishops (both appointed for five-year periods), with Consultors and Officials. Besides the Secretariat of State (which has two sections, including the Section for Relations with States) there are now nine Congregations, viz.: Doctrine, Oriental Churches, Bishops, the Sacraments and Divine Worship, Clergy, Religious, Catholic Education, Evangelization of the Peoples and Causes of the Saints. Pontifical Councils have replaced some of the previously designated Secretariats and Prefectures and now represent the Laity, Christian Unity, the Family, Justice and Peace, Cor Unum, Migrants, Health Care Workers, Interpretation of Legislative Texts, Inter-Religious Dialogue, Culture, Preserving the Patrimony of Art and History, and a Commission, for Latin America. There are also various Offices. There are three academies: the Pontifical Academy for Sciences, the Pontifical Academy for Life and the Pontifical Academy for Social Sciences, the latter two instituted by Pope John Paul II.

CULTURE

Broadcasting. There were 3 AM, 4 FM and 2 shortwave radio broadcasting stations in 1998, and 1 television station in 1996.

KEY HISTORICAL EVENTS

Columbus sighted Venezuela in 1498 and it was visited by Alonso de Ojeda and Amerigo Vespucci in 1499 who named it Venezuela (Little Venice). It was part of the Spanish colony of New Granada until 1821 when it became independent, at first in union with Colombia and then as an independent republic from 1830. Up to 1945 the country was governed mainly by dictators. In 1945 a three-day revolt against the reactionary government of Gen. Isaías Medina led to constitutional and economic reforms. In 1961 a new constitution provided for a presidential election every five years, a national congress, and state and municipal legislative assemblies. Twenty political parties participated in the 1983 elections. By now the economy was in crisis and corruption linked to drug trafficking was widespread. In Feb. 1992 there were two abortive coups. A state of emergency was declared. In Dec. 1993 Dr Rafael Caldera Rodríguez's election as president reflected disenchantment with the established political parties. He took office in the early stages of a banking crisis which cost 15% of GDP to resolve. Fiscal tightening backed by the IMF brought rapid recovery. Hugo Chávez Frías, who succeeded as president in Feb. 1999, continued with economic reforms and amended the constitution to increase presidential powers.

In Dec. 1999 the north coast of Venezuela was hit by devastating floods and mudslides which resulted in approximately 30,000 deaths.

President Chávez was deposed and arrested on 12 April 2002 in a coup following a general strike, but he was back in the presidential palace just 48 hours later.

TERRITORY AND POPULATION

Venezuela is bounded to the north by the Caribbean with a 2,813 km coastline, east by the Atlantic and Guyana, south by Brazil, and southwest and west by Colombia. The area is 916,490 sq. km (353,857 sq. miles) including 72 islands in the Caribbean. Population (1990) census, 19,455,429 (86·6% urban, 1999). Estimate (1997) 21·8m.; density, 23·9 per sq. km.

The UN gives a projected population for 2010 of 28·72m.

The official language is Spanish. English is taught as a mandatory second language in high schools.

CLIMATE

The climate ranges from warm temperate to tropical. Temperatures vary little throughout the year and rainfall is plentiful. The dry season is from Dec. to April. The hottest months are July and August. Caracas, Jan. 65°F (18·3°C), July 69°F (20·6°C). Annual rainfall 32" (833 mm). Ciudad Bolívar, Jan. 79°F (26·1°C), July 81°F (27·2°C). Annual rainfall 41" (1,016 mm). Maracaibo, Jan. 81°F (27·2°C), July 85°F (29·4°C). Annual rainfall 23" (577 mm).

CONSTITUTION AND GOVERNMENT

The current constitution was approved in a referendum held on 15 Dec. 1999. Venezuela is a federal republic, comprising 34 federal dependencies, 23 states and 1 federal district. Executive power is vested in the President. The ministers, who together constitute the Council of Ministers, are appointed by the President and head various executive departments. There are 17 ministries and 7 officials who also have the rank of Minister of State.

90% of votes cast in a referendum (the first in Venezuela's history) on 25 April 1999 were in favour of the plan to rewrite the constitution proposed by President Chávez. As a result, on 25 July the public was to elect a constitutional assembly to write a new constitution, which was subsequently to be voted on in a national referendum. In Aug. 1999 the constitutional assembly declared a national state of emergency. It subsequently suspended the Supreme Court, turned the elected Congress into little more than a sub-committee, stripping it of all its powers, and assumed many of the responsibilities of government. In Dec. 1999 the President's plan to redraft the constitution was approved by over 70% of voters in a referendum. As a result presidents are able to serve two consecutive six-year-terms instead of terms of five years which cannot be consecutive, the senate is abolished and greater powers are being given to the state and the armed forces. President Chávez has effectively taken over both the executive and the judiciary. The constitution provides for procedures by which the president may reject bills passed by Congress, as well as provisions by which Congress may override such presidential veto acts.

National Anthem. 'Gloria al bravo pueblo' ('Glory to the brave people'); words by Vicente Salias, tune by Juan Landaeta.

RECENT ELECTIONS

Exchange controls were abolished in April 1996. The bolívar was devalued by 12·6% in 1998, and in Feb. 2002 it was floated, ending a regime that permitted the bolívar to trade only within a fixed band. However, in Feb. 2003 it was pegged to the dollar. The inflation rate in 2001 was 12·5%, the lowest in more than 15 years and down from nearly 100% in 1996. There was then a steady rise in inflation, with the annualized rate reaching 30·7% in Nov. 2002. Total money supply in May 2002 was Bs 7,232·47bn.

President for five-year terms. Since 1993 foreign banks have been allowed a controlling interest in domestic banks.

There is a stock exchange in Caracas.

SOCIAL INSTITUTIONS

Justice. A new penal code was implemented on 1 July 1999. The new, US-style system features public trials, verbal arguments, prosecutors, citizen juries and the presumption of innocence, instead of an inquisitorial system inherited from Spain which included secretive trials and long exchanges of written arguments.

In Aug. 1999 the new constitutional assembly declared a judicial emergency, granting itself sweeping new powers to dismiss judges and overhaul the court system. The assembly excluded the Supreme Court and the national Judicial Council from a commission charged with reorganizing the judiciary. President Chávez declared the assembly the supreme power in Venezuela.

The court system is plagued by chronic corruption and an astounding case backlog. Only about 9,700 of the country's 23,000 prisoners in 1999 had actually been convicted. In Oct. 1999 over 100 judges accused of corruption were suspended.

KEY HISTORICAL EVENTS

By the end of the 15th century, the Vietnamese had conquered most of the Kingdom of Champa (now Vietnam's central area) and by the end of the 18th century had acquired Cochin-China (now its southern area). At the end of the 18th century, France helped to establish the Emperor Gia-Long as ruler of a unified Vietnam. Cambodia had become a French protectorate in 1863 and in 1899, after the extension of French protection to Laos in 1893, the Indo Chinese Union was proclaimed.

In 1940 Vietnam was occupied by the Japanese. In Aug. 1945 they allowed the Vietminh movement to seize power, dethrone the Emperor and establish a republic known as Vietnam. On 6 March 1946 France recognized 'the Democratic Republic of Vietnam' as a 'Free State within the Indo-Chinese Federation'. On 19 Dec. Vietminh forces made a surprise attack on Hanoi, the signal for nearly eight years of hostilities. An agreement on the cessation of hostilities was reached on 20 July 1954. The French withdrew and by the Paris Agreement of 29 Dec. 1954 completed the transfer of sovereignty to Vietnam which was divided along the 17th parallel into Communist North Vietnam and the non-Communist South. From 1959 the North promoted insurgency in the south, provoking retaliation from the USA. A full scale guerrilla war developed.

In Paris on 27 Jan. 1973 an agreement was signed ending the war in Vietnam. However, hostilities continued between the North and the South until the latter's defeat in 1975. Between 150,000 and 200,000 South Vietnamese fled the country. The unification of North and South Vietnam into the Socialist Republic of Vietnam finally took place on 2 July 1976. Vietnam invaded Cambodia in Dec. 1978 and China attacked Vietnam in consequence. In 1986 Vietnam implemented economic reforms, gradually shifting to a multi-sectoral market economy under state regulation. On 11 July 1995 Vietnam and the USA normalized relations. On 28 July 1995 Vietnam became an official member of the Association of South East Asian Nations (ASEAN) and in the same month signed a trade agreement with the European Union.

CONSTITUTION AND GOVERNMENT

The National Assembly unanimously approved a new constitution on 15 April 1992. Under this the Communist Party retains a monopoly of power and the responsibility for guiding the state according to the tenets of Marxism-Leninism and Ho Chi Minh, but with certain curbs on its administrative functions. The powers of the National Assembly are increased. The 450-member *National Assembly* is elected for five-year terms. Candidates may be proposed by the Communist Party or the Fatherland Front (which groups various social organizations), or they may propose themselves as individual independents. The Assembly convenes three times a year and appoints a prime minister and cabinet. It elects the *President*, the head of state. The latter heads a *State Council* which issues decrees when the National Assembly is not in session.

The ultimate source of political power is the Communist Party of Vietnam, founded in 1930; it had 2·2m. members in 1996.

Further reforms in the 1990s failed to prevent the effects of the Asian economic crisis. A deepening of the *Doi Moi* process, with further economic liberalization, was scheduled in a 'Ten Year Socio-Economic Development Strategy 2001–10'.

The 1992 constitution embodies the market-oriented reforms of recent years, recognizing citizens' right to engage in private business. A bankruptcy law was passed in Jan. 1994.

KEY HISTORICAL EVENTS

Following an agreement in Dec. 1989 on a constitution for a unified state, the (northern) Yemen Arab Republic and the (southern) People's Democratic Republic of Yemen were united as the Republic of Yemen on 22 May 1990. In Aug. 1993 Vice-President Ali Salem Albidh withdrew to Aden demanding reforms as a condition of re-joining President Saleh in Sana'a. Albidh agreed to a modified reform programme but clashes between north and south escalated into full civil war at the beginning of May. Southern officials announced their secession from Yemen on 21 May 1994. Aden was captured by northern forces on 7 June 1994. The former vice-president and government went into exile.

TERRITORY AND POPULATION

Yemen is bounded in the north by Saudi Arabia, east by Oman, south by the Gulf of Aden and west by the Red Sea. The territory includes 112 islands including Kamaran (181 sq. km) and Perim (300 sq. km) in the Red Sea and Socotra (3,500 sq. km) in the Gulf of Aden. The islands of Greater and Lesser Hanish are claimed by both Yemen and Eritrea. On 15 Dec. 1995 Eritrean troops occupied them, and Yemen retaliated with aerial bombardments. A ceasefire was agreed at presidential level on 17 Dec. On 20 Dec. the UN resolved to send a good offices mission to the area. In an agreement of 21 May 1996 brokered by France, Yemen and Eritrea renounced the use of force to settle the dispute and agreed to submit it to arbitration. The area is 555,000 sq. km excluding the desert Empty Quarter (Rub Al-Khahi). A dispute with Saudi Arabia broke out in Dec. 1994 over some 1,500–2,000 km of undemarcated desert boundary. A memorandum of understanding signed on 26 Feb. 1995 reaffirmed the border agreement reached at Taif in 1934, and on 12 June 2000 a 'final and permanent' border treaty between the two countries was signed. An agreement of June 1995 completed the demarcation of the border with Oman.

The population was estimated at 15·8m. in 1995; density, 21 persons per sq. km.

The UN gives a projected population for 2010 of 27·36m.

In 1999, 75·5% of the population lived in rural areas. At the census of 1994 the population was 14,832,673. There were 1,168,199 citizens working abroad, mainly in Saudi Arabia and the United Arab Emirates, not included in the census total. Since 1990 Saudi Arabia has compulsorily repatriated almost all Yemeni workers. In 1994 there were 17 governorates plus the capital city, Sana'a:

	1994 census population		*1994 census population*
Abyan	414,543	Lahej	634,652
Aden	562,162	Mahrah	112,512
Bayd	509,265	Mahwit	403,465
Dhamar	1,050,346	Marib	167,388
Hadhrama	870,025	Sa'adah	486,059

Ibb	1,959,313	Shabwah	377,080
Jawf	157,096	Ta'iz	2,205,947

The population of the capital, Sana'a, was 1,231,000 in 1999. The commercial capital is the port of Aden, with a population of (1995) 562,000. Other important towns are Ta'iz, the port of Hodeida, Mukalla, Ibb and Abyan.

On 28 Sept. 1994 the Assembly of Representatives unanimously adopted a new constitution founded on Islamic law. It abolished the former five-member Presidential Council and installed a *President* elected by parliament for a five-year term, subsequently amended to a seven-year term through a referendum held on 20 Feb. 2001. As a result of the same referendum the term for MPs was extended from four to six years.

KEY HISTORICAL EVENTS

The majority of the population is of Bantu origin. There are more than 70 different tribes, the most important being the Bemba and the Ngoni in the northeast. One of the more successful of the invading tribes was the Lozi under Lewanika, who obtained the protection of the British government in 1891. In 1900 the British South Africa Company acquired trading and mining rights. From 1911 the territory was known as Northern Rhodesia and in 1924 the Crown took over the administration.

In 1953 the Federation of Rhodesia and Nyasaland, of which Northern Rhodesia was a part, was created. Federation brought economic benefits to Northern Rhodesia but it was from the outset opposed by African leaders. In March 1963 Britain agreed to Northern Rhodesia's right to secede from the Federation. In Jan. 1964 full internal self-government was attained. On 24 Oct. Northern Rhodesia became an independent republic within the Commonwealth, changing its name to Zambia. A highly centralized one-party state was created which suffocated the emergent economy. Living standards fell sharply and the production of copper, Zambia's biggest foreign exchange earner, almost halved. In 1991 the Movement for Multiparty Democracy (MMD) was elected on a promise to transform the economy.

TERRITORY AND POPULATION

Zambia is bounded by the Democratic Republic of the Congo in the north, Tanzania in the northeast, Malawi in the east, Mozambique in the southeast, Zimbabwe and Namibia in the south, and by Angola in the west. The area is 290,586 sq. miles (752,614 sq. km). Population estimate (1997), 9·35m.; population density, 11·7 per sq. km. In 1999, 60·5% of the population were rural.

The projected population for 2010 is 12·99m.

The republic is divided into nine provinces. Area, population and chief towns:

Province	*Area (in sq. km)*	*Population (1990 census)*	*Chief Town*
Central	94,395	725,611	Kabwe
Copperbelt	31,328	1,579,542	Ndola
Eastern	69,106	973,818	Chipata
Luapula	50,567	526,705	Mansa
Lusaka	21,898	1,207,980	Lusaka
Northern	147,826	867,795	Kasama
North-Western	125,827	383,146	Solwezi
Southern	85,283	946,353	Livingstone
Western	126,386	607,447	Mongu

The capital is Lusaka, which had a population in 1999 of 1,577,000. Other major towns (with estimated 1990 population in 1,000) are: Ndola, 329; Kitwe, 288; Kabwe, 154; Chingola, 142; Mufulira, 124; Luanshya, 118; Livingstone, 77.

The official language is English and the main ethnic groups are the Bemba (34%), Tonga (16%), Nyanja (14%) and Lozi (9%).

SOCIAL STATISTICS

Births, 1995, 351,000; deaths, 149,000. 1995 birth rate per 1,000 population, 43·4; death rate, 18·5. Zambia's life expectancy at birth in 2000 was 40 years, down from 50 in 1990. The sharp decline is largely attributed to the huge number of people in the country with HIV. Annual population growth rate, 1990–99, 2·4%. Infant mortality, 1999, 112 per 1,000 live births; fertility rate, 1999, 5·4 births per woman.

CLIMATE

The climate is tropical, but has three seasons. The cool, dry one is from May to Aug., a hot dry one follows until Nov., when the wet season commences. Frosts may occur in some areas in the cool season. Lusaka, Jan. 70°F (21·1°C), July 61°F (16·1°C). Annual rainfall 33" (836 mm). Livingstone, Jan. 75°F (23·9°C), July 61°F (16·1°C). Annual rainfall 27" (673 mm). Ndola, Jan. 70°F (21·1°C), July 59°F (15°C). Annual rainfall 52" (1,293 mm).

CONSTITUTION AND GOVERNMENT

In Aug. 1991 the National Assembly adopted a new constitution by 107 votes to 15 permitting multi-party elections for a new wholly elected parliament of 150 members. Candidates for election as president must have both parents born in Zambia (this excludes ex-president Kaunda). The constitution was amended in 1996 shortly before the parliamentary and presidential elections. The amendment restricts the president from serving more than two terms of office.

National Anthem. 'Stand and Sing of Zambia'; words collective, tune by M. E. Sontonga.

RECENT ELECTIONS

Parliamentary and presidential elections took place on 27 Dec. 2001. The elections were beset by allegations of vote rigging, prompting investigations from EU monitors. Levy Mwanawasa, former president Frederick Chiluba's chosen successor, defeated ten other candidates running for the presidency yet only won 28·8% of votes cast.

In the parliamentary elections, Levy Mwanawasa's party, the Movement for Multiparty Democracy (MMD), gained 69 seats in the 159-seat National Assembly; the United Party for National Development gained 49; the United National Independence Party, 13; the Forum for Democracy and Development, 12; and the Heritage Party, 4. Mwanawasa's inaugural speech was boycotted by all ten opposition parties.

INTERNATIONAL RELATIONS

Zambia is a member of the UN, WTO, the Commonwealth, SADC, the African Union, African Development Bank, COMESA, IOM and is an ACP member state of the ACP-EU relationship.

During the 1990s Zambia received foreign aid equivalent to approximately US$900 a head, but according to the *World Bank* GNP per head declined from US$390 in 1991 to US$330 in 1999.

ECONOMY

In 1998 agriculture accounted for 17·3% of GDP, industry 26·4% and services 56·3%.

Overview. The privatization programme of 280 state-owned companies (255 had been sold by Aug. 2001) has created one of the most liberal economies in Africa. The most significant privatization has been that of the Zambia Consolidated Copper Mines Ltd (ZCCM), which previously accounted for approximately 70% of economic activity in the country.

Currency. The unit of currency is the *kwacha* (ZMK) of 100 *ngwee*. Foreign exchange reserves were US$98m. in April 2002. In Dec. 1992 the official and free market exchange rates were merged and the kwacha devalued 29%. Inflation, which was 183·3% in 1993, was brought down to 21·7% in 2001. Total money supply in May 2002 was 99,836m. kwacha.

Budget. The fiscal year is the calendar year. Budget in 1bn. kwacha:

	1996	*1997*	*1998*[1]	*1999*[2]
Revenue	745·3	957·0	1,097·6	1,430·4
Expenditure	842·7	1,313·6	1,717·1	1,874·3

[1]Provisional. [2]Forecast.

Performance. In 1998 there was a recession, with the economy shrinking by 1·9%. This was caused by various problems including the non-completion of the privatization of the Zambia Consolidated Copper Mines, the negative effects of the El Niño climate phenomenon and the economic crisis in East Asia which adversely affected the price of copper. There was a slight recovery in 1999, with the economy expanding by 2·4%, followed by growth of 3·6% in 2000 and 4·9% in 2001. Total GDP in 2001 was US$3·6bn.

Banking and Finance. The central bank is the Bank of Zambia (*Governor*, Dr Caleb Fundanga). In 1996, 20 banks were operating. The Bank of Zambia monitors and supervises the operations of financial institutions. Banks and building societies are governed by the Banking and Financial Services Act 1994.

There is a stock exchange in Lusaka. Its market capitalization was US$301m. in 1998, a 58% fall from 1997's figure of US$705m.

Electricity. Installed capacity in 1997 was 2m. kW. Production in Jan.–Nov. 1998 was 6·99bn. kWh; consumption per capita (1998) was 539 kWh.

Zambia is a net exporter of hydro-electric power and has huge potential for energy growth. Between Jan. and Sept. 1998 Zambian electricity exports were worth US$3·6m. compared to US$11·9m. in the same period in 1997.

Oil and Gas. Imports of petroleum feedstock from Jan.–Nov. 1998 stood at 503,055 tonnes, a 31% increase on 1997.

Zambia is the world's fourth leading producer of copper and produces a fifth of the world's cobalt. It is well-endowed with gemstones, especially emeralds, amethysts, aquamarine, tourmaline and garnets. In 1990 the government freed the gemstones trade from restrictions. In 1998, 192,189 tonnes of washed coal were produced (164,443 tonnes in 1997).

Agriculture. 70% of the population is dependent on agriculture. There were 5·26m. ha of arable land in 1998 and 19,000 ha of permanent crops. In 1998 the value of exports of goods and services declined by around 25%. In 1997 copper provided 80% of all exports (by value), cobalt 10%, zinc 2%. Zambia ranks 7th in the world for copper production. Since 1990 non-copper exports have increased in value from US$50m. to US$230m. The main import sources in 1995 were South Africa (27·7%), UK (11·3%), Zimbabwe (9·2%) and Japan (8·6%). The Supreme Court hears and determines appeals from the High Court. Its seat is at Lusaka. The High Court exercises the powers vested in the High Court in England, subject to the High Court ordinance of Zambia. Its sessions are held where occasion requires, mostly at Lusaka and Ndola. All criminal cases tried by subordinate courts are subject to revision by the High Court.

KEY HISTORICAL EVENTS

The territory which now forms Zimbabwe was administered by the British South Africa Company from the beginning of European colonization in 1890 until 1923 when it was granted the status of a self-governing colony. In 1911 it was divided into Southern and Northern Rhodesia (*see* Zambia). In 1953 Southern and Northern Rhodesia were again united, along with Nyasaland, to form the Federation of Rhodesia and Nyasaland. When this federation was dissolved on 31 Dec. 1963 Southern Rhodesia reverted to the status of a self-governing colony within the British Commonwealth.

On 11 Nov. 1965 the white-dominated government issued a unilateral declaration of independence (UDI). Thereupon the Governor dismissed the prime minister, Ian Smith, and his cabinet and the British government reasserted formal responsibility for Rhodesia, but effective internal government was carried on by the Smith cabinet. From 1–3 Dec. Harold Wilson, the British prime minister, met Smith on board H.M.S. *Tiger* and drafted a 'Working Document' on progress towards legal independence. This statement was rejected by the Smith government. On 2 March 1970 the Smith government declared Rhodesia a republic and adopted a new constitution. On 3 March 1978 Smith signed a constitutional agreement with the internationally-backed nationalist leaders. A draft constitution was published in Jan. 1979 and was accepted by the white electorate in a referendum. Following the Commonwealth Conference held in Lusaka in Aug. 1979, elections took place in March 1980 resulting in a victory for the Zimbabwe African National Union (ZANU). Southern Rhodesia became the Republic of Zimbabwe.

Almost immediately, the question of land redistribution became a hot political issue. In colonial days, Africans had been ejected from the best farming country. All sides recognized the need for reform but were unable to agree on the means of achieving it. In 20 years, 3·5m. ha of land have been acquired from white farmers, with the UK footing the £44m. bill for resettlement, but only 70,000 families have benefited. Another 400,000 ha went to senior colleagues in President Mugabe's government. The economy, meanwhile, suffered roaring inflation, unemployment and acute shortages. A policy of land occupation, with black settlers taking over white-owned farms, started in early 2000. Pressures on President Mugabe to restore the rule of law were ignored and violence escalated. Elections took place in June 2000, in which President Mugabe achieved a narrow victory. Violence continued during the months which followed, as support for Mugabe dwindled. In the lead-up to the 2002 presidential election, again won by Mugabe but by dubious means, the opposition leader, Morgan Tsvangirai, was charged with treason. The land reform plan, involving the redistribution of white-owned land to landless black Zimbabweans, continued in 2002 with large numbers of farms seized by war veterans. Several African countries, including Zimbabwe, faced famine in 2002.

TERRITORY AND POPULATION

Zimbabwe is bounded in the north by Zambia, east by Mozambique, south by South Africa and west by Botswana and the Caprivi Strip of Namibia. The area is 150,872 sq. miles (390,759 sq. km). The population was (1992 census) 10,401,767 (51·2% female). Estimate, 1995, 11,475,000 (50·2% female); density, 29·4 per sq. km. In 1999, 65·4% of the population were rural.

By 2010 the effects of AIDS are expected to result in the population declining to 9m.

There are eight provinces and two cities, Harare and Bulawayo, with provincial status. Area and population (1992 census):

	Area (sq. km)	Population		Area (sq. km)	Population
Bulawayo	479	620,936	Mashonaland West	57,441	1,116,928
Harare	872	1,478,810	Masvingo	56,566	1,221,845
Manicaland	36,459	1,537,676	Matabeleland North	75,025	640,957
Mashonaland Central	28,374	857,318	Matebeleland South	54,172	591,747
Mashonaland East	32,230	1,033,336	Midlands	49,166	1,302,212

Harare, the capital, had a population in 1999 of 1,686,000. Other main cities (with 1992 census populations) were Bulawayo (620,936), Chitungwiza (274,035), Mutare (131,808) and Gweru (124,735). The population is approximately 98% African, 1% mixed and Asian and there are approximately 70,000 whites. The main ethno-linguistic groups are the Shona (71%), Ndebele (16%), Ndau (3%) and Nyanja (3%). Other smaller ones include Kalanga, Manyika, Tonga and Lozi.

The official language is English.

SOCIAL STATISTICS

1995 births, 434,000; deaths, 158,000. Rates, 1995: birth 38·8 per 1,000 population; death 14·1 per 1,000. Annual population growth rate, 1990–99, 1·7%. Zimbabwe's expectation of life at birth in 1999 was 43·2 years for males and 42·6 for females, down from (average) 54 years in 1993. The sharp decline is largely attributed to the huge number of people in the country with HIV. Researchers predict that by 2008 it will have dropped to 31 years. Approximately 25% of all adults are infected with HIV. Infant mortality, 1999, 60 per 1,000 live births; fertility rate, 1999, 3·7 births per woman.

CLIMATE

Though situated in the tropics, conditions are remarkably temperate throughout the year because of altitude, and an inland position keeps humidity low. The warmest weather occurs in the three months before the main rainy season, which starts in Nov. and lasts till March. The cool season is from mid-May to mid-Aug. and, though days are mild and sunny, nights are chilly. Harare, Jan. 69°F (20·6°C), July 57°F (13·9°C). Annual rainfall 33" (828 mm). Bulawayo, Jan. 71°F (21·7°C), July 57°F (13·9°C). Annual rainfall 24" (594 mm). Victoria Falls, Jan. 78°F (25·6°C), July 61°F (16·1°C). Annual rainfall 28" (710 mm).

CONSTITUTION AND GOVERNMENT

The Constitution provides for a single-chamber 150-member Parliament (*House of Assembly*), universal suffrage for citizens over the age of 18, an *Executive President* (elected for a six-year term of office by Parliament), an independent judiciary enjoying security of tenure and a Declaration of Rights, derogation from certain of the provisions being permitted, within specified limits, during a state of emergency. The House of Assembly is elected for five-year terms: 120 members are elected by universal suffrage, 10 are chiefs elected by all the country's tribal chiefs, 12 are appointed by the President and 8 are provincial governors. The constitution can be amended by a two-thirds parliamentary majority.

In a referendum on 12–13 Feb. 2000 on the adoption of a new constitution 697,754 (54·6%) voted against and only 578,210 in favour. Under the new constitution Zimbabwe would have had an Executive President and an Executive Prime Minister sharing power, but many people felt that it would have strengthened President Mugabe's hold on power.

National Anthem. 'Ngaikomborerwe Nyika yeZimbabwe' ('Blessed be the Land of Zimbabwe'); words by Dr Solomon M. Mutswairo; tune by Fred Changundega.

RECENT ELECTIONS

At the parliamentary elections of 24–25 June 2000 turn-out was 57%. The Zimbabwe African National Union-Patriotic Front (ZANU-PF) gained 62 of the 150 available seats (48·6% of votes cast). The Movement for Democratic Change, established in Jan. 2000, won 57 seats (47·0%) and the Zimbabwe African National Union-Ndonga gained 1 seat. 12 seats went to appointed non-constituency members, 8 went to *ex-officio* governor members and 10 to *ex-officio* chief members. The conduct of Mugabe's ZANU-PF during the pre-election campaign received widespread

international condemnation. White-owned farms were illegally seized and there was a campaign of intimidation against opposition supporters that saw more than 30 people die.

Presidential elections were held between 9–11 March 2002. Incumbent Robert Mugabe was re-elected with 56·2% of votes cast, against 42·0% for Morgan Tsvangirai. There were three other candidates. Observers claimed the elections failed to meet international standards for a democratic poll.

CURRENT ADMINISTRATION

Executive President: Robert G. Mugabe; b. 1924 (ZANU-PF; sworn in on 30 Dec. 1987, having previously been prime minister from 1980 to 1987; re-elected April 1990, March 1996 and again in March 2002).

The headquarters of the ZAF and the main ZAF stations are in Harare; the second main base is at Gweru, with many secondary airfields throughout the country. There were 58 combat aircraft, including Hunters and F-7s (MiG-21), and 24 armed helicopters.

INTERNATIONAL RELATIONS

Zimbabwe is a member of UN, WTO, the Commonwealth, the African Union, African Development Bank, COMESA, SADC, IOM, and is an ACP member state of the ACP-EU relationship. Following the controversial presidential election of March 2002 Zimbabwe was suspended from the Commonwealth's councils for a year, extended for nine months in March 2003.

ECONOMY

Agriculture accounted for 19·5% of GDP in 1998, industry 24·4% and services 56·1%.

Robert Mugabe's 20-year rule has left the economy in a desperate situation. There is roaring inflation, heavy unemployment and shortages of food and other necessities, culminating in the authorities making an international appeal for food in July 2001. In Feb. 2000 the country ran out of gasoline because it could not pay the import bills.

Overview. The second phase of structural adjustment dubbed Zimbabwe Programme for Economic and Social Transformation (ZIMPREST) was launched in early 1998. Its goals are similar to those of the first phase (1991–95), promoting economic stabilization, liberalization of trade, deregulation, reform of the public sector and social reform. But confidence in the economy was undermined by

promises to pay compensation (Z$365m.) to war veterans and to take over 1,471 privately-owned farms for resettlement. Meanwhile, inflation is beyond control and unemployment is high. Were it not for support from South Africa and other neighbouring states, the economy would collapse.

Currency. The unit of currency is the *Zimbabwe dollar* (ZWD), divided into 100 *cents*. Gold reserves were 121,000 troy oz in April 2002 and foreign exchange reserves US$72m. The currency was devalued 17% in Jan. 1994 and made fully convertible. Its value dropped by 65% in 1998. It was devalued again in Aug. 2000 by 24%. Whereas at the time of independence the Zimbabwean dollar was on a parity with the US dollar, by 2000 it was worth less than 2 cents. Inflation, which stood at 18·8% in 1997, had risen to 76·7% by 2001. Total money supply was Z$176,427m. in April 2002.

Budget. The 1999 budget forecast a budget deficit of 6%.

Revenue and expenditure (in Z$1,000):

	1996–97	*1997–98*
Revenue	27,289	52,152
Expenditure	32,366	63,857

The top rate of income tax is 50%; the top corporate income tax rate is 35%.

Performance. Real GDP growth was 2·5% in 1998, but in 1999 the economy contracted by 0·2%. In 2000 and 2001 it shrank further by 5·1% and 8·5% respectively. Zimbabwe's total GDP in 2001 was US$9·1bn.

Banking and Finance. The Reserve Bank of Zimbabwe is the central bank (established 1965; *Governor*, Dr Leonard Tsumba). It acts as banker to the government and to the commercial banks, is the note-issuing authority and co-ordinates the application of the government's monetary policy. The Zimbabwe Development Bank, established in 1983 as a development finance institution, is 51% government-owned. In 1997 there were seven commercial and five merchant banks. There are five registered finance houses, three of which are subsidiaries of commercial banks.

The IMF announced in June 1998 that it was to lend Zimbabwe US$175m. in the form of a 13-month standby credit which would allow Harare to draw US$52m. immediately to replenish its depleted reserves.

There is a stock exchange.

Weights and Measures. The metric system is in use but the US short ton is also used.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* carbon dioxide emissions were the equivalent of 1·2 tonnes per capita in 1998.

Electricity. Installed capacity was 2m. kW in 1997. In 1997 Zimbabwe Electricity Supply Authority's (Zesa) five power stations supplied 7,323·3 GWh, and a further 3,171·5 GWh was imported via the Southern African Power Pool (SAPP). Electricity sales during the financial year 1995–96 increased by 3·6% and revenues grew by 28% from US$2,222·7m. to US$2,852·7m. Consumption per capita in 1998 was 896 kWh.

Minerals. The total value of all minerals produced in 1995 was Z$5,249·3m. 1995 production: gold, 23·9 tonnes, value Z$2,395m., nickel, value (1993) Z$369·1m.; asbestos, 0·70m. tonnes; coal (1996), 5·2m. tonnes. Diamond production in 1998 totalled 70,000 carats.

Agriculture. Agriculture is the largest employer, providing jobs for 25% of the workforce. In 1998 there were 3·25m. ha of arable land and 0·13m. ha of permanent crops.

A constitutional amendment providing for the compulsory purchase of land for peasant resettlement came into force in March 1992. A provision to seize white-owned farmland for peasant resettlement was part of the government's new draft constitution that was rejected in the referendum of Feb. 2000. Various deadlines were given for white farmers to abandon their property during Aug. and Sept. 2002. The government claims that 300,000 landless black Zimbabweans have been resettled on seized land.

The staple food crop is maize, but 2002 production was less than a third of that in 2000. Tobacco is the most important cash crop. Production, 2000, in 1,000 tonnes: sugarcane, 4,228; maize, 2,108; seed cotton, 327; wheat, 250; tobacco, 228; cottonseed, 199; groundnuts, 191; cassava, 175; soybeans, 144; cotton lint, 128; sorghum, 103; bananas, 80; oranges, 80. Zimbabwe is the world's second largest exporter of flue-cured tobacco. In 1996 more than 201m. kg of tobacco were sold, fetching Z$5·8bn. More than 150,000 people work in the tobacco industry. Tobacco is a highly commercial crop, worth nearly 60 times as much as the same acreage planted with soya or maize.

Livestock (2000): cattle, 5·55m.; sheep, 530,000; pigs, 275,000; goats, 2·79m.; chickens, 16m. Dairy products (2000, in 1,000 tonnes): milk, 310; meat, 177.

Forestry. In 1995 forests covered 8·71m. ha, or 22·5% of the total land area (down from 8·96m. ha in 1990). Timber production in 1999 was 9·27m. cu. metres.

Fisheries. Trout, prawns and bream are farmed to supplement supplies of fish caught in dams and lakes. The catch in 1999 was 12,406 tonnes (all from inland waters).

INDUSTRY

Metal products account for over 20% of industrial output. Important agro-industries include food processing, textiles, furniture and other wood products.

Labour. The labour force in 1996 totalled 5,281,000 (56% males). Unemployment in Jan. 1998 was around 50%.

Recent estimates suggest a marked deterioration in balance of payments.

Trade Fairs. The highlight of the year is the Zimbabwe International Book Fair, held in Harare in August.

COMMUNICATIONS

Roads. In 1996 the road network covered 18,338 km, of which 8,700 km were paved. Number of vehicles, 1996: passenger cars, 323,000; commercial vehicles, 32,000; motorcycles, 362,000. There were 38,777 road accidents in 1996 with 1,205 fatalities.

Civil Aviation. There are three international airports: Harare (the main airport), Bulawayo and Victoria Falls. Air Zimbabwe, the state-owned national carrier, operates domestic services and in 1998 flew to the major centres in Africa and Europe. In 1999 it flew 11·5m. km, carrying 460,400 passengers (248,200 on international flights). Zimbabwe Express Airlines likewise operates internal services, and had flights in 1998 to Johannesburg. In 1998 Harare handled 1,262,000 passengers (905,000 on international flights).

Shipping. Zimbabwe's outlets to the sea are Maputo and Beira in Mozambique, Dar es Salaam, Tanzania and the South African ports.

Telecommunications. In 2000 Zimbabwe had 294,400 main telephone lines (18·5 for every 1,000 persons), and 160,000 PCs were in use (11·9 for every 1,000

persons). There were 256,000 mobile phone subscribers in Sept. 2000 and 30,000 Internet users in May 1999. In 1995 there were 4,100 fax machines.

Postal Services. In Aug. 1995 there were 170 post offices, 47 postal telegraph agencies and 86 postal agencies. A total of 298m. pieces of mail were handled in 1995, or 26 items per person.

SOCIAL INSTITUTIONS

Justice. The general common law of Zimbabwe is the Roman Dutch law as it applied in the Colony of the Cape of Good Hope on 10 June 1891, as subsequently modified by statute. Provision is made by statute for the application of African customary law by all courts in appropriate cases.

The death penalty is authorized. The last executions took place in May 2002.

The Supreme Court consists of the Chief Justice and at least two Supreme Court judges. It is the final court of appeal. It exercises appellate jurisdiction in appeals from the High Court and other courts and tribunals; its only original jurisdiction is that conferred on it by the Constitution to enforce the protective provisions of the Declaration of Rights. The Court's permanent seat is in Harare but it also sits regularly in Bulawayo.

The High Court is also headed by the Chief Justice, supported by the Judge President and an appropriate number of High Court judges. It has full original jurisdiction, in both Civil and Criminal cases, over all persons and all matters in Zimbabwe. The Judge President is in charge of the Court, subject to the directions of the Chief Justice. The Court has permanent seats in both Harare and Bulawayo and sittings are held three times a year in three other principal towns.

Regional courts, established in Harare and Bulawayo but also holding sittings in other centres, exercise a solely criminal jurisdiction which is intermediate between that of the High Court and the Magistrates' courts. Magistrates' courts, established in 20 centres throughout the country, and staffed by full-time professional magistrates, exercise both civil and criminal jurisdiction.

Primary courts consist of village courts and community courts. Village courts are presided over by officers selected for the purpose from the local population, sitting with two assessors. They deal with certain classes of civil cases only and have jurisdiction only where African customary law is applicable. Community courts are presided over by presiding officers in full-time public service who may be assisted by assessors. They have jurisdiction in all civil cases determinable by African customary law and also deal with appeals from village courts. They also have limited criminal jurisdiction in respect of petty offences.

The population in penal institutions in Aug. 1998 was 18,271 (155 per 100,000 of national population).

Religion. Over a third of the population adhere to traditional animist religion. In 1997 approximately 2·42m. persons were Protestants, 1·54m. African Christians, 800,000 Roman Catholics and 2·03m. followers of other religions.

Education. Education is compulsory. 'Manageable' school fees were introduced in 1991; primary education had hitherto been free to all. All instruction is given in English. There are also over 3,800 private primary schools and over 950 private secondary schools, all of which must be registered by the Ministry of Education. In 1998 there were 2,507,098 pupils at primary schools and 847,296 pupils at secondary schools. In 1999 the adult literacy rate was 88% (92·3% among males and 83·8% among females). Both the overall rate and the rate for males are the highest in Africa.

There are ten teachers' training colleges, eight of which are in association with the University of Zimbabwe. In addition, there are four special training centres for teacher trainees in the Zimbabwe Integrated National Teacher Education Course. In 1990 there were 17,873 students enrolled at teachers' training colleges, 1,003 students at agricultural colleges and 20,943 students at technical colleges. There are 4 universities and 10 technical colleges.

Health. There were 1,378 government hospitals in 1993. All mission health institutions get 100% government grants-in-aid for recurrent expenditure. In 1993 there were 1,551 doctors, 194 dentists, 22,590 nurses, 411 pharmacists and 2,894 midwives. It is estimated that one in five adults are HIV infected.

Welfare. It is a statutory responsibility of the government in many areas to provide: processing and administration of war pensions and old age pensions; protection of children; administration of remand, probation and correctional institutions; registration and supervision of welfare organizations.

CULTURE

Broadcasting. Zimbabwe Broadcasting Corporation is a statutory body broadcasting a general service in English, Shona, Ndebele, Nyanja, Tonga and Kalanga. There are three national semi-commercial services—Radio 1, 2 and 3, in English, Shona and Ndebele. Radio 4 transmits formal and informal educational programmes. Zimbabwe Television broadcasts on two channels (colour by PAL). In 1997 there were 370,000 TV and 1·14m. radio sets in use.

Press. In 1996 there were two daily newspapers with a combined circulation of 209,000, giving a rate of 19 per 1,000 inhabitants. In Jan. 2002 parliament passed an Access to Information Bill restricting press freedom, making it an offence to report from Zimbabwe unless registered by a state-appointed commission.

Tourism. There were 2,328,000 foreign tourists in 1999, bringing revenue of US$145m.

Festivals. Of particular importance are Amakhosi Inxusa Festival, a festival of soul, dance and theatre in Bulawayo (March) and the Zimbabwe National Jazz Festival in Harare (Sept.–Nov.).

Libraries. There is a City Library in Harare.

Theatre and Opera. Harare has a Repertory Theatre.
